GENERAL INFORMATION

Karnatak Univ is one of the regional univs which came into existence with the splitting up of Bombay Univ. In response to an insistent demand from the Kannadigas for a separate univ for Karnataka, the govt of Bombay appointed the Karnatak Univ Ctee in April 1947, under the chairmanship of Mr. Justice N S Lokur. The Karnatak Univ. bill, based on this ctee's report, was passed by the Bombay legislature in April 1949. In June 1949 R A Jahagirdar was apptd by the govt of Bombay as first vice-chancellor of the univ and on March 1, 1950, Karnatak Univ. was brought into existence as a corporate body. At present its jurisdiction extends over the districts of Dharwar, Belgaum, Bysapur, North Kanara, Raichur, Gulbarga and Bidar. The univ. is situated on a 283-acre site, given by the govt. of Bombay. The univ is both an affiliating and teaching univ. It aims to develop into a residential univ with emphasis on postgrad instrcn, affiliation being one of its subord functions. The univ also runs two colls in Dharwar, one in arts and one in sci. (see above, under 'Constituent Colls'). These two colls, which were formerly run by govt., were transferred in 1958 to the management of the univ. The Kannada Res Inst., formerly attached to the colls, has been maintained as a separate inst since they were transferred to management of the univ.

CONSTITUTION The senate is the supreme governing body of the univ. The executive powers are vested in the syndicate. The other authorities are the academic council, the facs, the

GENERAL INFORMATION

The Univ. of Travancore, now reconstituted as the Univ. of Kerala, was established under an act promulgated by H H the Maharaja of Travancore on Nov. 1, 1937. The chief aims of the univ. were stated as being to effect a reorganization of the system of educn in the state with a view to the gradual devel of technical and technol educn., to make greater and more systematic provision for furtherance of original res in the various branches of appl sci., and to provide for conservation and promotion of Kerala art and culture.

With the reorganization of states and the formation of the new state of Kerala, it was found necessary to reconstitute the univ into a teaching and federal univ for the whole of the state of Kerala in order to enable it to provide for the conservation, promotion and development of Kerala art and culture and the Malayalam lang. and for the gradual change of the medium of instructn into Malayalam in all educnl instns of the state, and to provide greater facilities for postgrad study and original res in all branches of learning by establishing centres of postgrad. study and res in different parts of the state. The Kerala Univ. Act came into force on Aug. 30, 1957, and the Univ. of Travancore became the Univ. of Kerala from that date.

CONSTITUTION. The governor of the state of Kerala is chancellor of the univ., and the pro-chancellor is the minster of education for the state. The vice-chancellor, the principal academic and executive officer of the univ., is apptd. by the chancellor on the unanimous recommendation of a sp. cttee of 3 members (1 elected by the senate, 1 by the syndicate, and 1 nominated by the chancellor), to hold office for 3 yrs., the appt. of the first vice-chancellor under the Kerala Univ. Act being made, however, by the chancellor.

The other authorities of the univ. are the senate, syndicate and facs. The senate, to be reconstituted every 3 yrs., includes, *ex officio*, elected and nominated members and has general superintendence over the affairs, concerns and properties of the univ. The syndicate, of 16 members, is the executive body and exercises general superintendence and control over the instns of the univ. The facs advise the senate and syndicate on all academic matters.

GENERAL INFORMATION

Founded in 1857, the univ continued to be an examining body till the early part of this century, when it took up also res and teaching functions. This was given an impetus by the report of the Sadler Commission, and later by the Madras Univ Act of 1923, which clearly laid down that the univ would take up the devel. of res. and teaching depts. The univ. is federal, catering for postgrad studies, and exercising control over the quality of the teaching given by its constituent and affiliated colls. Colls. within a radius of 10 mls of the univ are known as constituent colls, the affiliated colls are spread over the different parts of Madras State. The univ at present has 30 teaching and res depts comprising almost all the facs. Postgrad teaching has also been organized on an inter-collegiate univ co-operation basis.

CONSTITUTION The authorities of the univ consist of the senate, academic council, syndicate, facs. and bds of studies. The senate is democratic in constitution and is representative of the colls, registered grads, legislature, local bodies, and certain learned socs and assocns. This is the supreme governing body which considers the annual report and budget and frames statutes. The academic council is the supreme authority which regulates courses of studies and standards of exams., and in general deals with all academic matters which emanate from the syndicate or the bds of studies. The facs consist of members of the academic council who are assigned to them, and the hds. of the univ depts. These facs generally advise the syndicate on matters referred to it. The bds. of studies form the primary academic body. For each subj of study, a bd is constituted consisting of the univ hd of the dept, and profs. drawn from the different colls. These bds meet twice a yr and advise the syndicate and academic council on courses of studies, prescription of textbooks, and the panel of examiners, they report also on matters academic referred to them. These recommendations invariably come up before the academic council and before the syndicate. The syndicate is the executive authority which consists of the vice-chancellor, the dir of public instrcn. of Madras State, certain members elected by the senate and the academic council, and 3 members nominated by the chancellor. It meets monthly to consider matters pertaining to the admin. of the univ. The vice-chancellor, a full-time salaried officer, is the chief executive officer of the univ. The registrar is sec of the syndicate and the authorities of the univ, and carries out the various decisions of the authorities.

GENERAL INFORMATION

The region comprising the districts of Aurang-
abad, Parbhani, Nanded, Bhur and Osmanabad
is known as Marathwada and is now a unit of
Maharashtra state. It formed a part of the
former Hyderabad state and subsequently a unit of
the reorganized Bombay state. For nearly a
decade there was a demand for a separate univ
for this region from the citizens of Marathwada.
On the eve of the reorganization of states in India,
the govt of Hyderabad recommended to the suc-
cessor govt of Bombay the establt of this univ.
The govt of Bombay accordingly appointed a
cttee. on whose report the legislature passed the
Marathwada University Act, 1958, to establt and
incorporate a teaching and affiliating univ at
Aurangabad. The act received the assent of the
governor on May 5, 1958, and the univ was in-
augurated by Mr. Nehru, the prime minister of
India, on Aug 23, 1958.

CONSTITUTION The main authorities of the
univ are the court, the executive council, the
academic council, the facs, the bds of studies,
the bd of univ teaching and the bd of extra-
mural studies. The court is a body with wide
powers, which include the taking of decisions on
questions of the affiliation of colls, the establt of
depts, hostels and insts of 1es and specialized
studies, the conferment of degrees, the instn of
teaching posts such as professorships, readerships
and lectureships. The executive council is the
executive authority of the univ, which is in
charge of the day-to-day admin. The academic
council has the control and general regn of the
maintenance of the standards of teaching and
exams within the univ. The duties of the bds
of studies are to recommend text-books, draw up
courses of study in their respective depts, and
panels of examiners, etc. The bd of univ teach-
ing reports direct to the executive council regard-
ing the conduct of all instructn, teaching, trg
and res.

INCOME (1960-61) Rs 1,550,170 (exam &
other fees, 18 per cent, state govt grant, 59 per
cent., grants from U G C & govt of India, 21
per cent, misc., 2 per cent.)

GENERAL INFORMATION

The Univ of Mysore was the first univ to be founded in the Indian states. The two state colls. (Central Coll, Bangalore, and Maharaja's Coll, Mysore) which had long been affiliated to Madras Univ formed the nuclei of the new univ, and the establ. of the univ received the sanction of H.H. the Maharaja of Mysore in 1916. A regn amending and consolidating the provisions of the Mysore Univ. Regn. V of 1916, as amended from time to time, received the assent of H.H. the Maharaja in 1933. Further amendment in 1956 made the univ an autonomous body.

There are two univ. centres, Mysore and Bangalore, at each of which there are univ colls. (see p 571).

The univ. is empowered to affiliate colls. under conditions prescribed in the statutes and ordinances. Inspection of colls is made by profs deputed by the syndicate.

CONSTITUTION The principal univ authorities are the senate, the syndicate, the academic council, the facs., the bds of studies, the bd. of appts and the cttee of finance. The vice-chancellor, who is a full-time officer, is the *ex-officio* chairman of the senate, the syndicate and the academic council. He is also the principal executive officer and the academic officer of the senate and of the council. The executive govt. of the univ is vested with the univ syndicate which consists of 14 members. The senate, with a max strength of 60 members, is in charge of the general organization of the univ. and its admin, incl the instn and conferment of degrees. The academic council is the academic authority of the univ and is responsible for the maintenance of the standards of teaching and examination in the univ.

GENERAL INFORMATION

The univ. was established in 1923. Teaching is
provided partly through the affiliated colleges and
partly through the teaching depts. of the univ.
itself.

CONSTITUTION The court is the supreme
governing body with power to revise the acts of
the executive and academic councils. The execu-
tive council is the chief executive body; it con-
trols univ. funds and, subject to certain limitations,
it makes the ordinances. The executive council
consists of the vice-chancellor, the treasurer, the
deans of facs, 5 members elected by court, 2
principals of non-govt. colls., 4 members (elected
by academic council) who are not principals of
non-govt. colls., and 3 members nominated by
the state govt. The academic council, the chief
academic body, constitutes facs and depts. of
study, prepares syllabuses and recommends
ordinances relating to admission to exams and
degrees. The facs (*see below*) recommend sub-
ject syllabuses to the academic council on the
recommendation of the bds of studies, no ordi-
nances relating to courses of study, exam stand-
ards and other academic matters are made by
the executive council unless the opinion of the re-
levant fac has been obtained. The facs constitute
bds. of studies which prepare courses of study.
There is also a statutory finance cttee. with power
to examine receipts and expenditure, to allocate
funds and to sanction expenditure.

INCOME (1959-60) Rs. 2,712,137 (govt., 24
per cent; fees, 58 per cent; other, 18 per cent.)

GENERAL INFORMATION

In 1924, the Setalvad Cttee. on University Reforms, which recommended the establishment of regional univs in the province of Bombay, pointed out the suitability of Poona as such a univ centre. It was not until 1942, however, that the provincial govt appointed a cttee to report on the form, constitution, jurisdiction and financial implications of a univ for Maharashtra. Although the cttee submitted its report in the following year, difficulties created by the second world war prevented its implementation and it was not until 1948 that the Univ. of Poona was established, it occupied the old Government House, at Kirkee, which was provided by the Bombay govt. Though situated in Poona, the univ's activities are spread over the 12 districts inhabited by the Marathi-speaking people. It is intended, as the report of the cttee which framed its scheme observed, that the 'univ. will keep in view the special needs, interests and traditions of Maharashtra and its people without losing sight of its essential character as a university, i.e. a seat of universal learning which recognizes no frontiers except those of the human mind itself'.

The univ is neither a purely affiliating nor a purely unitary and teaching univ. It combines the features of both these types. It aims at creating for the Poona area a central teaching organization beyond the inter stage, and the whole of the postgrad teaching and res work in the entire univ. area is conducted under its direct control. But up to the inter stage in the Poona area and the grad stage in outside places, instruction continues to be given by the constituent and affiliated colleges subject only to the general supervision of the univ. It is not contemplated that all the staff, equipment and bldgs of such post-inter colls. in Poona will belong to the univ, which will, however, be able to draw freely on these resources. The univ's library, labs and full-time teaching staff are used mainly for postgrad. teaching and res. in selected subjects.

CONSTITUTION. Among the distinctive features of the constitution of the univ is its provision for the widest representation of the various elements in the life of the region in the composition of the court, the general legislative and deliberative univ body. Linking academic and non-academic sides is the executive council, which possesses complete control over the finances and routine

working of the univ. Apart from its general direction of policy, the court has no control over the day-to-day business of the univ.

INCOME (1959-60) Recurring. Rs 4,745,618 (incl govt grants, 24.8 per cent., exam fees, 29 per cent., tuition fees, 31 per cent.) Non-recurring grants. Rs 1,709,262

GENERAL INFORMATION

Although the idea of a univ at Jaipur can be traced to the 1920s, it was not till Jan 8, 1947, that the act for a federal univ for Rajputana was promulgated. The univ's jurisdiction extends over Rajasthan, the ring-shaped region comprising the whole of Rajputana incl Ajmer-Merwara. It is a teaching and affiliating univ.

The univ. now controls univ educn. only. With the estab. of the bd of secondary educn in the state of Rajasthan with effect from July 1957, the control of high sch and inter. educn has been transferred to that bd.

CONSTITUTION The main authorities are senate, syndicate, academic council, facs., bds of studies and bd of inspection, etc. Senate is the senior body. No statute of the univ can be operative unless sanctioned by senate, and ordinances are subject to its approval. The syndicate is the executive body which controls day-to-day admin. Bds of studies report to the facs., facs. to the academic council and academic council to the syndicate. All other bodies report direct to syndicate.

INCOME (1959-60) Rs 2,845,284 (exam and other fees, 28.6 per cent., state govt grant, 22.5 per cent., grant from Univ Grants Commission and govt of India, 35.6 per cent., tuition and other fees (univ depts), 8.6 per cent., misc., 4.7 per cent.)

FACULTIES AND DEANS Arts, Principal B Sen, comm, Principal B D Bhargava, educn, Principal P L Shrivastava, engin, Principal V Lakshminarayana, law, Principal G S Sharma, med, pharmac & vet sci, Principal S C. Mehta, sci., Prof L S Ramaswami.

UNIVERSITY PRECINCT The univ with its depts and library, hitherto housed in rented premises, has moved to newly constructed bldgs of its own in Gandhinagar, Jaipur. The depts of chem, econ, hist., law, maths, philos, and phys are located there, the dept of geol at Udaipur, c/o M.B. Coll., and the depts of bot and zool at Jodhpur.

Univ postgrad classes in Engl, Hindi, pol sci, Sanskrit, sociol, stats began in July 1961.

LIBRARY 53,303 vols

ADMISSION. Min requirement for entry to inter pharm and pre-univ is high sch. or exam declared equivalent. For requirements for entry to degree courses, see below.

FIRST DEGREES. BA, 2 yrs after inter. or 3 yrs. after pre-univ or equivalent, BSc, 2 yrs after ISC or 3 yrs after pre-univ or equivalent, BSc(Ag), 3 yrs after ISC(Ag) or equivalent, BCom, 2 yrs. after ICom or equivalent or 3 yrs. after pre-univ. or equivalent, BPharm, 3 yrs., with 90 days' practical trg., after IPharm or ISC (with phys., chem., maths) or equivalent; BE (civil, electr., mech, mining, telecommn.), 4 yrs., with 6 mos' practical trg., after ISC, or 5 yrs.

after pre-univ. or equivalent (with phys., chem., maths.); BVSc&AH, 4 yrs after ISC (biol.), MB BS, 5½ yrs., incl. 6 mos' internship, after ISC (with phys., chem., biol.) No hons. degrees are awarded.

Note—The univ introduced 3-yr. degree and pre-univ. courses in the facs. of arts, comm. & sci. in 1958 and 1959 respectively.

HIGHER DEGREES BED, 1 yr after 1st degree; LLB, 2 yrs after bachelor's degree. Courses of instrcn for MA, MOL, MSW, 2 yrs. after bachelor's degree; MSc, MCom, ME and MSc (Tech-Electronics), MD, MS, LLM, 2 yrs after corresp. bachelor's degree, MEd, 1 yr after BED, MSc(Med), 2 yrs. after MB BS. Faculties for res. in univ depts of econ., geol., hist., philos. PhD, 2 yrs' res. (and thesis) after postgrad degree, DLitt, DSc, 2 yrs after PhD, LLD, 2 yrs after LLM. The DLitt, DSc and LLD may also be conferred as honorary degrees. All degrees are open to grads. of other univs.

STUDY LEAVE, which is available to univ teachers who have been on the staff for 5 or more yrs., is granted (for 1 yr. or, exceptionally, 2 yrs.) to an individual once only. An undertaking to serve the univ for at least 5 yrs on return is required. If the teacher has a scholarship or other financial assistance he receives a monthly allowance of not more than half his salary, if he has no scholp. or other financial assistance he receives his full salary plus a monthly allowance of not more than a quarter of his salary.

GENERAL INFORMATION

The univ was founded in 1946 by Sir Hari Singh Gour, who gave Rs 20 lacs and appealed to both central and provincial govts to make suitable donations. The govt. of Madhya Pradesh donated Rs 10 lacs towards the univ endowment fund and made a further grant of Rs. 15 lacs towards bldgs and equipment. They are also making a grant of Rs 10 lacs a yr towards the maintenance of the univ

The founder of the univ intended that it should be particularly concerned with polytechnics. Accordingly, a scientific and technol fac has grown up laying sp emphasis on sci., phys., technol, engin and agric., along with a study of arts and soc scis

The univ is a teaching and residential as well as an affiliating univ. Most of the teaching staff live in the univ bldgs and thus participate in the wider life of the univ.

CONSTITUTION The univ authorities are the court, executive council, academic council, cttee of reference, and facs.

GENERAL INFORMATION

The S.N.D.T. Women's Univ was founded by Dr. D. K. Karve in 1916 on the model of the Women's Univ. of Tokyo Dr. Karve based his plan for the new univ on the recognition of two principles—the use of the mother tongue as the most natural and effective medium of instruction, and the differentiation in courses of study to suit the different roles played by men and women in the social life of the country In 1920 the univ. was placed on a firm financial foundation by a munificent gift of Rs 15 lacs from Sir Vithaldas Thackersey The distinctive features of this

univ are that it is mainly concerned with the educn of women (courses of study incl such subjects as home econ., drawing, painting and nursing) and that all teaching work is carried on in Gujarati and Marathi

The univ. was granted statutory recognition by the state govt in 1951. It has 8 colls, 3 constituent and 5 affiliated

CONSTITUTION The supreme governing body of the univ is the senate The exec body is the syndicate

INCOME The univ receives a recurrent grant of Rs 163,130 from the govt of Maharashtra Exam fees, Rs 274,040, annual endowment (from Thackersey trust), Rs 45,000

LOCATION AND BUILDINGS The univ was originally located in Poona, but since 1936 the main office has been in Bombay The univ office and the coll. in Bombay are housed in a spacious bldg, constructed at a cost of about Rs 10 lacs, which was inaugurated by Dr S Radhakrishnan, vice-pres. of the republic of India, in 1952 The other bldg of the univ is under constrcn, its estimated cost is about Rs 27 lacs.

GENERAL INFORMATION

Visva-Bharati grew out of Santiniketan Ashrama, a retreat founded in 1863 by Maharsu Devendranath Tagore. In 1901 an experimental sch was started at Santiniketan by Rabindranath Tagore, and since 1921 Santiniketan has been the seat of Visva-Bharati, which was incorporated as a univ by Act XXIX (1951) of the Indian parliament. Visva-Bharati is an all-India instn with students and teachers drawn from all over India, with a proportion of teachers, students and visitors from abroad. Univ area occupies over 11 sq mls.

The aims of the univ are to study the mind of man in its realization of different aspects of truth from diverse points of view, to bring into more intimate relation with one another, through patient study and research, the different cultures of the East on the basis of their underlying unity, to approach the West from the standpoint of such a unity of the life and thought of Asia, to seek to realize in a common fellowship of study the meeting of the East and the West, and thus ultimately to strengthen the fundamental conditions of world peace through the establishment of free communication of ideas between the two hemispheres, and with such ideals in view, to provide at Santiniketan a centre of culture where res into and study of the religion, lit., hist, sci. and art of

Hindu, Buddhist, Jain, Islamic, Sikh, Christian and other civilizations may be pursued along with the culture of the West, with that simplicity in externals which is necessary for true spiritual realization, in amity, good fellowship and co-operation between the thinkers and scholars of both eastern and western countries, free from all antagonisms of race, nationality, creed or caste.

A scheme of agro-economic res is being conducted at the univ under the auspices of the Ministry of Food and Agric, govt of India. The scheme has under its purview a considerable area consisting of West Bengal, Bihar, Orissa and Assam.

GENERAL INFORMATION

The univ was founded on Oct 8, 1949, by ordinances enacted in the Fed of Malaya and the Colony of Singapore. It was formed by the fusion of 2 existing colls of higher educn in Singapore, the King Edward VII Coll of Med (founded 1905) and Raffles Coll (founded 1929). Full univ teaching began in session 1949-50 on the Singapore sites. In 1954 a decision was taken to start univ teaching in the Federation. A site at the Pantai Valley nr Kuala Lumpur was acquired and 1st-yr teaching in all arts subs began in Sept 1957 in accomm temporarily made available in the Govt Tech Coll, Gurney Rd. This was, however, discontinued in the session 1958-59. In July 1958 the entire dept. of engin was transferred to the Pantai Valley site.

As a result of proposals emanating from the univ, the govts of the Fed of Malaya and of the Colony of Singapore set up in 1957 a commission 'to review the constitution, working and finances of the univ in the light of the experience and rapid expansion of the last 7 yrs and of the prospective expansion in the near future, including the plan for developing the univ in Kuala Lumpur, and to make recommendations'. The commission, headed by Dr R S Aitken, vice-chancellor of the Univ of Birmingham, arrived in Aug 1957 and its report was publ in Nov the same yr. As a result of this report the govts apptd jointly a cttee to draft a constitution for the univ which would take into account the

proposals aiming at creating 2 divisions of equal status, 1 in each territory, with the univ as the supreme governing body of the 2 divs. Ordinances to give effect to these proposals were enacted in Nov 1958 and came into force on Jan 15, 1959.

CONSTITUTION The amended constitution provides for the continuance of the Univ of Malaya as a single univ, with a chancellor, a vice-chancellor, a central council, a court and a guild of grads, and for the establ of 2 divs—the Univ of Malaya in Singapore and the Univ of Malaya in Kuala Lumpur—each with its own principal, its own divisional council and divisional senate. The 2 divs are equally represented on the central council. The central council and vice-chancellor are assisted by a central secretariat.

The univ has power, amongst other things, to award degrees, to ensure the maintenance of academic standards, to regulate conditions of service of staff in the univ and the divs and to negotiate with the govts on matters of finance.

The divisions make all appts of teachers and control matters relating to univ teaching and admission to courses of study.

FINANCE On the recommendations of a jt finance cttee apptd by the govts. of the Fed. of Malaya and Singapore, grants for annually recurrent costs of the univ and the 2 divs for the triennial period 1959-61 will be made jly by the

* Member of the Association of Universities of the British Commonwealth

Fed. and Singapore govts. in the ratio of 2 : 1. After the triennium it is anticipated that each govt. will, with certain exceptions, be responsible for contributing to the annually recurrent costs of the div. in its territory. Capital grants during the triennium will be made by the 2 govts. on an equal basis.

INCOME (July 1, 1958 to Dec. 31, 1958) £537,136 approx (govt. grants, 83.9 per cent., tuition & other fees, 11.1 per cent., rents, 2.5 per cent.; clin. fees, 1.7 per cent., investment income,

0.3 per cent., misc., 0.5 per cent.) With effect from Jan. 1, 1959, the financial yr. has been changed to Jan. 1 to Dec. 31.

GEOGRAPHICAL LOCATION. The offices of the univ. are located in the bldgs of the Kuala Lumpur div. in the Pantai Valley.

GENERAL INFORMATION

The Univ. of Malaya in Singapore was estab.
 on Jan 15, 1959, as a division of the Univ. of
 Malaya. See also under Univ. of Malaya, above.

The powers of the div include the provision of
 courses of instructn, the admission of students
 thereto and the appt. of teachers.

CONSTITUTION The divisional council is the
 executive body of the div and exercises all the
 powers of the div. except those which are allotted
 by the constitution or by statute to another author-
 ity. The membership of the divisional council is
 widely representative. The divisional senate is
 the academic body of the div and has control of
 the general direction of instructn and res. It is
 composed of the profs and hds of depts and
 some non-professional members.

The chief executive and academic officer of
 the div. is the principal, who is *ex officio* a member

of the divisional council and chairman of the
 divisional senate.

UNIVERSITY PRECINCT The bldgs of the 2
 former colls in Singapore are still being used, but
 there has been considerable devel on these sites.

New bldgs completed on the Raffles Coll site
 include a large new multi-storey sci. block with
 associated lecture theatres, the addn of new
 wings to the Oei Tiong Ham bldg for use of the
 library and admin (the Oei Tiong Ham bldg. is
 now under renovation and when work is com-
 pleted it will house the entire admin of the univ.);

a new student colla (Raffles Hall for men and Eusoff Coll for women). At the med coll site a pathol bldg, built in conjunction with the Singapore govt, has been completed. The new inst of health was opened in 1958 and is shared by the univ's dept of soc med & pub health, the Singapore govt sch health services and the maternity & child welfare section of the city council. King Edward VII Hall, a residential coll mainly for med students in their clin yrs, was formally opened in 1957. Remodelling of the main bldgs provided addnl space for the library and for lecture theatres.

GEOGRAPHICAL LOCATION. The facs of arts, sci and law and the admin offices are on the Raffles Coll site of about 80 acres at Cluny Rd 10, while the fac of med is on the former coll of med. site, 4 miles away at Sepoy Lines 3.

AFFILIATED INSTITUTION

INSTITUTE OF SOUTHEAST ASIA, c/o Nanyang Univ., Jurong Rd., Singapore (tel. 68779) (1957) Dir.—Assoc. Prof. Hsu Yun Tsiao. Function of inst. is to collect source materials on S.E. Asia for res. and reference, and to publish

academic res. papers and reference books. Scope incl. many aspects of S.E. Asia, with sp. reference to hist., geog. and econ. Inst. also intends to assist scholars outside the univ. in their academic res. and surveys.

GENERAL INFORMATION

Established in 1953 to meet the demand for higher educn. for students from both Chinese and English secondary schools in Malaya and neighbouring countries, the univ. owes its origin to Mr. Tan Lark Sye, a philanthropist of Singapore who announced that he would subscribe M\$5,000,000 to the univ. funds. The univ. was registered in 1953 in both Singapore and the Fed. of Malaya under the Companies Ordinance and acquired thereby the status of a legal corp. The Singapore Hokien Assn. donated 500 acres (which now has on it bldgs. & equipment costing about M\$12.3 millions) at 1½ milestone, Jurong Rd., Singapore, for use as the univ. campus.

The Nanyang Univ. Ordinance came into effect in May 1959 and was promulgated in the Singapore govt. gazette.

The univ. consists of 3 colls. (arts, comm., sci.).

CONSTITUTION. Supreme governing body is univ. council. Senate, responsible for academic matters, consists of the vice-chancellor (chairman), deans of colls., registrar and hds. of depts.

INCOME (1959). Total income: M\$2,763,413 (contributions, M\$362,058, donations, M\$444,148, fees, M\$1,547,676, interest, M\$20,071, misc., M\$3564, govt. subsidy for 1958 recurrent expenditure deficit, M\$385,896).

COLLEGES AND DEANS. See p. 666.

UNIVERSITY PRECINCT. Colls. of arts, comm., and sci., admin. office, library, clinic, 2 canteens, and staff and student residences are situated on 180 acres of developed land at 1½ milestone, Jurong Rd., in NW pt. of state of Singapore. Bldg. of auditorium, addnl. admin. block and sports field under consideration.

LIBRARIES. Univ. libr. 105,000 vols. (incl. 70,000 Chinese books), about 30,000 vols. of periodicals, reading rooms. Reference branch libr. in each coll., dept. reference rooms.

LABORATORIES. Biol., chem., phys. 2 sci. museums.

ADMISSION. Grads. of Chinese 3-yr. or middle schools, govt. 3-yr. or middle schools cert. holders, and holders of a Cambridge Overseas Sch. Cert. with at least 2 credits in certain subj., are eligible to sit entrance exam for 1st-yr. class of the univ. Students of recognized univs., who have studied for more than 1 yr. and whose scholastic records are considered satisfactory by Nanyang Univ., may sit a transfer exam on passing which they may be admitted to appropriate classes. Grads. of preparatory classes may also

enrol as 1st-yr. students of the univ. Med. exam. of fitness required of all students.

FIRST DEGREES. 4 yrs.—BA, BSc, BCom. The univ. operates an hour-credit system in all colls. Each student must have a minimum of 128 credits before he can sit the graduation exam. (conducted jntly. by internal and external examiners).

No HIGHER DEGREES are awarded.

RESEARCH is undertaken by individual members of teaching staff.

STUDY LEAVE may be granted, subject to approval of univ. authority, where it can be arranged without serious inconvenience to work of univ.

FEES (*=for 4-yr. course). Entrance exam., M\$10; caution money, M\$30, lab. deposit (sci. coll.), M\$20, tuition, M\$2880*; lab. fee (sci. coll.), M\$200*, lecture notes, M\$120*, student health, M\$40*, phys. educn., M\$40*.

ACADEMIC YEAR. Feb. to Nov. 2 semesters of 18-19 wks. each.

LANGUAGES OF INSTRUCTION. English and Chinese.

PRINCIPAL 'OPEN' AWARDS. Bursaries offered annually by govt. of Singapore to suitable candidates who are citizens of Singapore studying at Nanyang Univ. Scholps. also offered by foundations, firms, etc.

GRADUATES' ASSOCIATION. Nanyang Univ. grads. guild.

STUDENT RESIDENCES. 19 blocks (men), 6 blocks (women) with total of 968 rooms accommodating 1936 students. Fees (incl. full bd.) M\$70 per month.

STAFF RESIDENCES. All teaching and admin. staff provided with free furnished quarters. 25 bungalows and 176 flats are being brought into use.

STUDENT HEALTH SERVICE. Univ. provides free med. attention, when required, for all students and staff (fee per semester M\$5). Clinic with physician and nurse, dental surgeon.

STUDENTS' UNION. All students of the univ. are members of the Nanyang Univ. students' union, which is administered by a students' council.

GENERAL INFORMATION

The univ. began as a Jesuit coll. instituted in 1592 by Pope Clement VIII, who gave it the power of conferring degrees in philos. and in theol. It is still housed in a bldg erected by the Jesuit Fathers. Its med. fac originated in a sch. of anat founded in 1674 by grandmaster

Nicolas Cottoner in the great hospital of the order, which accommodated 745 patients. Fra Emmanuel Pinto de Fonseca, grandmaster of the order of St John of Jerusalem, with authority from Pope Clement XIV, raised the coll. to univ. status in 1769.

CONSTITUTION. By an ordinance promulgated in 1947, the univ is governed by a council consisting of the chancellor as pres, the vice-chancellor and rector magnificus as vice-pres, a representative of the Inter-Univ Council for Higher Educn Overseas, 6 members from the legislature of Malta, 6 members elected by the senate of the univ, 1 member from the guild of grads. and 3 members appointed by the chancellor in consultation with the vice-chancellor. A senate consisting of 14 members, 12 elected by the facs and 2 apptd. by the chancellor, to deal with questions regarding teaching and discipline, was also instituted by this ordinance. The council is the supreme authority of the univ.

UNIVERSITY INSTITUTIONS IN NEW ZEALAND

[Contributed by Dr. F. J. Llewellyn, Chairman, University Grants Committee]

HISTORY The University of New Zealand was established by act of parliament in 1870 and dissolved by act of parliament in 1961.

It comprised four constituent institutions and two associated colleges. The first of these was established by the Scottish pioneers in 1869 through an ordinance of the provincial council of Otago as the University of Otago at Dunedin. When the concept of one university for New Zealand developed almost immediately, the Scottish settlers, somewhat reluctantly, yielded their right to their own independent university which became in 1874 a constituent college of the University of New Zealand whilst retaining the name University of Otago. In 1873 Canterbury University College was established, largely through the efforts of the Canterbury Association, at Christchurch. In 1876 the Queen granted a charter to the University of New Zealand Auckland, the original capital of the colony, established its University College in 1882, and Wellington set up Victoria University College in 1897. Canterbury Agricultural College, Lincoln (a few miles from Christchurch), was established in 1873 and was controlled by the council of Canterbury University College until 1896 when it became more directly associated with the University of New Zealand. Massey Agricultural College, Palmerston North, was established in 1926, becoming the centre of agricultural education in the north island.

In October 1957 the titles of Auckland, Canterbury and Victoria university colleges became 'University of Auckland', 'University of Canterbury' and 'Victoria University of Wellington', respectively. These were changes of title only, and there was no change in the powers of these three institutions.

In August 1958 senate approved the establishment of a university college at Palmerston North as a branch of the Victoria University of Wellington and in April 1959 government approved these proposals and made financial provision for the establishment of the branch in 1960. First-year English, education, geography, history and mathematics are available for students of the Palmerston North Teachers' College and other students resident in the Palmerston North district as internal students of the Victoria University of Wellington and the college is also responsible for extra-mural tuition in these subjects to students from all university districts. In April 1959 government approved the establishment of a university college at Hamilton in 1960 as a branch of the University of Auckland. Tuition in first-year English and

history became available in 1960 to students as internal students of the University of Auckland.

CONSTITUTION The university had a federal structure and was similar in certain respects to the universities of London and Wales. According to the provisions of the University Act, 1908, the principal duty of the university was the conduct of the examinations for the students of the colleges and for many years the scripts were sent to Great Britain to be marked by examiners appointed by the university. The act of 1926 laid stress on the function of the university as an examining body and developed still further the university as a federation of colleges teaching for common degrees whose structures were determined by the university. During the past ten to fifteen years much of this authority devolved upon the colleges themselves and this process was accelerated until ultimately the four constituent institutions have become autonomous degree-granting universities.

The governing body of the university was the senate, which included representatives of the constituent institutions and associated colleges, of the government and of the graduate body. The senate exercised authority in general academic and administrative matters. It was advised on academic matters by the academic board, which was composed of the vice-chancellor of the university, the academic heads of the constituent institutions, the principals of the agricultural colleges, together with representatives elected by the professors, lecturers and professorial boards of the constituent institutions and agricultural colleges. By an act of 1954 the senate delegated to a curriculum committee, consisting of the vice-chancellor, the academic heads of the four constituent institutions, the director of education, four professors and two others appointed by the senate, authority to approve course regulations for the various degree courses taught in the constituent institutions and agricultural colleges. Course regulations approved by the curriculum committee superseded degree statutes of the university and were regulations of the sponsoring institution. Whilst the basic degree structure set out in the various degree statutes of the university was retained in these course regulations, there were variations between constituent institutions in prerequisites, prescriptions, compulsory subjects and some other matters of detail.

Until the end of 1961, then, the curriculum committee and the academic board worked side by side on academic matters with which the institutions and the university were concerned.

Whilst the academic board advised senate, the curriculum committee had executive powers under its own act.

Senate was advised on matters relating to university entrance and university scholarship examinations not only by the academic board but by the entrance board, which included representatives of the academic board, the post-primary schools' association, the registered private secondary schools and the department of education. Entrance to the constituent institutions and the agricultural colleges was therefore determined on a national basis by examinations controlled by senate on the advice of the entrance board and the academic board.

The constituent institutions and agricultural colleges were governed by councils and boards of governors respectively which included representatives of the professoriate, lecturers, school teachers, education boards, the graduates and appointees of the governor-general. Councils and boards of governors were advised on academic matters by professional boards which were in turn advised by faculties.

As devolution proceeded, more authority was vested in the councils of the constituent institutions so that ultimately, when independent universities were established, the powers of ordinary unitary university governing bodies would devolve upon them. Senate set up a committee to make recommendations concerning the completion of the devolutionary process and to determine what functions should remain central.

RELATIONSHIP TO GOVERNMENT The university and the constituent institutions and agricultural colleges were independent of government control in all academic matters except and in so far as any developments required the approval of parliament and consequent amendment to the university acts.

In financial matters, both with regard to annual grants (which were and are negotiated on a quinquennial basis) and grants for capital items including buildings, negotiations were conducted by the University Grants Committee with the minister of education. The grants committee was a body consisting of the vice-chancellor of the university *ex officio* and five persons not associated with any of the constituent institutions or agricultural colleges. The members were appointed by the senate after consultation with the ministers of finance and education. The financial needs of the institutions and colleges were put before the grants committee by the various councils and boards of governors and these were then sifted and collated by the committee before being presented to the government through the minister of education.

FINANCE The total recurrent income of the universities and the agricultural colleges for the year ended March 31, 1961, was approximately £2,892,783, of which £2,595,225 was from government sources, £251,405 from fees and £46,153 from endowments and other sources.

PRE-UNIVERSITY EDUCATION The normal minimum pre-university education required is six years at primary school, two years at intermediate school (or, alternatively, eight years at primary school) followed by four years at post-primary school, at which time the university entrance examination is normally taken. A further year at post-primary school leads to a higher school certificate or to the competitive university scholarship examination. Students are strongly encouraged to spend this extra post-university entrance year at school and the majority do so.

The university entrance examination varies in scope and content from time to time and at present consists of English and three or four other subjects from a fairly wide list. Adequate provision is made for the recognition of the entrance examinations of other universities.

ADMISSION Until recently all qualified applicants for admission to the university (*i.e.* those who have passed the university entrance examination or those who have been accredited by their schools with a pass in this examination or those who have secured an equivalent overseas qualification) have been accepted without any further selection. It is likely, however, that accommodation problems will require some selection to be made in the near future, particularly in science and engineering courses. Admissions to professional courses in medicine and dentistry are limited and from time to time competitive on the results of the first year (intermediate medical or dental) university examinations.

Candidates for university entrance may either sit the prescribed examination or be accredited by the headmaster of their school. Only certain schools, approved once by the senate, but now by the universities entrance board, have power to accredit. General liaison is maintained on the many questions relating to entrance, and on the accrediting process in particular schools, by liaison officers. One liaison officer is attached to the staff of each of the universities with the status of senior lecturer.

Ad eundem admission to postgraduate study and research is determined by the university councils following individual application. It is usual for applicants from Commonwealth and most other countries, who are adequately qualified to proceed to higher degrees in their own universities, to be permitted to register and pursue a course of study leading to a higher degree in the universities of New Zealand.

STRUCTURE OF DEGREE COURSES Each of the four universities provides degree courses in arts, commerce, law, music and science. Courses for various other professions are provided as follows: *Auckland*—architecture, engineering and fine arts; *Canterbury*—engineering and fine arts; *Otago*—dentistry, home science, medicine, mining and physical education; *Wellington*—political science, public administration and social science. See also p. 682.

Courses for the first degrees of BA, BSc and

BCom require a minimum of three years' study and are made up of units. Each unit represents one year's work in a subject, e.g. eight units are required for BSc degree and nine units for BA degree. Honours are awarded for the bachelor's degree in architecture, engineering and music. Except at the University of Auckland, honours are not awarded for the other bachelor's degrees, but a candidate having graduated with a bachelor's degree may in certain faculties, e.g. arts, commerce, law, science, proceed to a course (one or two years), which is partly a lecture course and partly research or other original work, for a master's degree with or without honours, according to the standard of attainment.

The minimum number of years of study for other first degrees is as follows: BAgr, three years; BHSc, BAgrSc, BArch, BE (civil, electrical, mechanical, metallurgical, or mining), MusB, four years; LLB, BE(Chem), BE (hons), BDS, BMedSc, five years; MB ChB, six years.

Professional courses in special schools are normally preceded by an intermediate course (one or two years) which may be taken at any of the universities. Courses in agriculture leading to BAgr and BAgrSc may be taken wholly at the agricultural colleges or alternatively the first-year intermediate course may be taken at any of the universities. Examinations for bachelor's and master's degrees are taken annually in October/November.

Postgraduate study (i.e. post master's degree or post bachelor's honours degree) usually involves original supervised work together with some tutorial and discussion type instruction. Normally there is no organized lecture course leading to a written examination, although the candidate may be required, if his thesis or dissertation is not wholly acceptable, to subject himself to some further examination.

TEACHING STAFF The grades of staff within the universities are (1) professors, (2) associate professors, who are lecturers of especial personal merit or distinction, (3) senior lecturers, (4) lecturers, (5) assistant or junior lecturers.

The usual teaching method is the formal lecture, but increasingly in the more advanced work seminars, tutorials and informal discussion methods are being introduced. In most departments there is reasonable time available for personal research and study, but the teaching load is generally somewhat greater than in universities in the United Kingdom.

Members of staff (1-4 above) may expect leave for up to one year for travel and study overseas every six or seven years. Conditions of leave vary somewhat from one university to another, but usually provide for full salary, a travel allowance and a maintenance grant dependent on the circumstances.

There is a national scale of salaries for university teachers which is determined by government on the recommendation of the University Grants Committee. Following the publication in January 1960 of the Parry report, government ap-

proved the following salary scales as from April 1, 1960. Academic heads of constituent institutions £3300, agricultural colleges £3100. Professors, £2800, associate professors, £2250, senior lecturers (heads of departments) (2 × £100, 1 × £50), £1900-£2150, senior lecturers (2 × £100, 1 × £50), £1750-£2000; lecturers (× £75), £1250-£1700, assistant lecturers (× £50), £900-£1100.

Superannuation is available under the NZ government superannuation scheme, at present there is no reciprocal arrangement with F.S.S.U. or other overseas schemes. The usual method of appointment is by advertisement; it is not usual for posts to be filled by invitation. Advertisements are normally placed in appropriate newspapers and journals in New Zealand and the United Kingdom and occasionally in other Commonwealth countries. Persons of foreign nationality are considered for appointment and there are no statutory restrictions as to nationality. An analysis of the 1959 full-time staff statistics for the four teaching universities shows that 68 per cent secured their first degree in New Zealand and of these 72 per cent did so in their employing university, 22 per cent secured their first degree in the United Kingdom, 7 per cent in Commonwealth countries other than the United Kingdom, 3 per cent in other countries. Most of those who secured their first degree in New Zealand have read for a second degree in some overseas country.

STUDENTS Whilst the universities recognize the importance of full-time academic study, this ideal has not been fully realized, particularly in arts, commerce, law and music courses. It is virtually impossible to take degree courses in architecture, dentistry, engineering, home science, medicine, mining or science except as a full-time student. Of some 15,000 internal students, rather less than half are part-time; a further 1400 are external students registered with a university, but permitted to pursue their courses through private study, provided they pass the examinations conducted each year.

Relatively few students live in halls of residence, the proportion being highest in Otago and lowest in Auckland and Wellington. Student corporate life is focused on the students' union controlled by an elected student executive which organizes a full programme of cultural and sporting activities through the various societies and clubs. Student health services exist in most of the universities and there are usually also counsellors or tutors and lodgings officers. There is no appointments board or overseas universities information bureau.

Most fees range from £5 5s. to £10 10s per subject per year. Thus, for example, total fees for a BSc course are approximately £70 plus small laboratory charges and student association fees (approximately £3 per annum). Students who have a university entrance qualification are entitled to bursaries which pay fees (but not for a repeat course necessitated by failure). Students with a higher school certificate are entitled to an additional monetary allowance, together with a board-

ing allowance if the student lives away from home, and students with scholarships obtained from high placing in the university entrance scholarship list receive a still higher monetary allowance in addition to free tuition and boarding allowance. Many students supplement their bursary incomes with vacation employment, some students who for one reason or another are ineligible for bursary awards are able, by working throughout the long vacation, to finance themselves for full-time study during the university session.

The approximate annual cost of study and residence for a full-time student from overseas is as follows: tuition, examination and miscellaneous fees, £30-£55, board (either private or hostel during term and private during vacation), £250; clothes, books, travel, etc., £150-£200.

A very considerable increase in the number of university students is expected in 1962 and subsequent years, this arises partly from the natural increase in the population, partly from the population increase due to immigration, but mainly from the high level of the birth-rate in the 1940s.

ACADEMIC YEAR AND VACATION COURSES The academic year consists of three terms of approximately nine, eleven and six teaching weeks with short vacations between first and second and second and third terms. It begins in early March and ends in late November. There are no vacation courses for degree purposes, but engineering and some other students undergo practical training in works or field camps during the vacations.

EXTRA-MURAL CLASSES AND UNIVERSITY EXTENSION The universities control, through the regional councils for adult education, various extension and other courses for non-university students within their respective districts. The universities also play some part in the activities of the Workers' Educational Association. For this work special grants are paid to the universities from the National Council of Adult Education, a body established under a separate act of parliament.

INTER-UNIVERSITY ORGANIZATIONS The universities, through their vice-chancellors, are seeking a closer liaison with the Australian vice-chancellors. The professors and lecturers are mostly members of the Association of University Teachers (secretary E. M. Fraser, History Department, University of Auckland, Box 2553 C.P.O., Auckland) which is organized on a regional and national basis. The students' associations in the various centres adhere to the National Union of Students (address of secretary P.O. Box 1884, Wellington, C.I.).

THE UNIVERSITIES TO-DAY A great increase in student numbers is expected in the next few years, and to cope with this an extensive major building programme is under way. In its first phase a dental school at Otago, an engineering school at Canterbury and a science block at Victoria were built and now in course of planning are the following: a chemistry and physics block and a school of fine arts building at Auckland, an arts and library building at Victoria, a series of buildings

for the whole of the science faculty at Canterbury, an arts and library building at Otago, a building for food technology at Massey College and a science teaching block at Lincoln College.

The government, in close consultation with the University of New Zealand, set up a Committee on University Education to enquire generally into the needs of universities in New Zealand. It began its sittings in September 1959 and reported in January 1960. The committee consisted of three members: Sir David Hughes Parry (chairman), then director of the Institute of Advanced Legal Studies, University of London; Dean G. Andrew, deputy to the president of the University of British Columbia; and Dr. R. W. Harman, chairman of the New Zealand Atomic Energy Committee.

The report deals with almost every aspect of university education in New Zealand, including the role of the university in the New Zealand community, the universities and New Zealand's economic development; the demand for and supply of university graduates, university entrance; part-time and extra-mural study, scholarships, bursaries and other financial assistance to students, salaries and conditions of recruitment and employment, university staffing, buildings and equipment; science and technology, new developments and new institutions, the separate universities, the University Grants Committee; university finance. (Copies of the report may be obtained from the government printer, Wellington, New Zealand.)

The recommendations of the Parry committee have been implemented in large measure by government. A new University Grants Committee was set up by act of parliament in 1960. In 1961 the Bill was re-enacted, dissolving the University of New Zealand and setting up a central organization to negotiate with government the grants necessary to meet the financial needs of university education and research in New Zealand. Under the University Grants Committee there were established a curriculum committee and a research committee as statutory sub-committees of the grants committee. The Universities Entrance Board and the Vice-Chancellors' Committee were also established as statutory bodies.

The function of the curriculum committee is to ensure reasonable equivalence of courses for degrees and diplomas throughout the universities and to protect the interests of the large number of students who transfer in New Zealand from one university to another. The research committee allocates to the universities the sums made available by the government for the purposes of research, which now amount to £100,000 annually.

Admission to the universities in New Zealand is controlled by a Universities Entrance Board. The entrance board not only conducts the university entrance examination, but also grants admission at entrance standard to those persons who have received their post-primary education outside New Zealand.

Each of the four universities in New Zealand

has been given full university status with the right to confer its own degrees. In the case of the two agricultural colleges, Lincoln College, previously known as the Canterbury Agricultural College, is now a constituent college of the University of Canterbury. Massey College, previously known as the Massey Agricultural College, is now a university college of agriculture in association with the Victoria University of Wellington. The colleges will teach for degrees in agriculture of the University of Canterbury and the Victoria University of Wellington respectively, but they have in addition the right which they have had for some years, to award diplomas and certificates in the fields of study for which they teach.

INSTITUTIONS OF HIGHER EDUCATION OTHER THAN UNIVERSITIES. The universities in New Zealand have a dominant role in higher and adult education. Some government departments, however, play a part in giving specialized technological training to employees, as also do some of the larger industrial enterprises. Nurses, dental nurses and teachers are trained by government departments or local authorities, although post-primary teachers, in particular, and many primary as well, also take university courses.

In addition to university courses for the professions, the technical school system, including the government's technical correspondence school, offers some professional courses, such as engineering and accountancy, the technical schools, however, are mainly concerned with vocational and apprentice training. There are no technical colleges at the higher education level.

There is a growing demand for some systematic training for technicians and other workers occupying a middle place between the university-trained technologist and the tradesman. In this field a significant start has been made with the recent introduction of a New Zealand certificate of engineering for which courses are given at the large technical colleges and in 1960 a two-year full-time course in pharmacy began.

The universities are not responsible for teacher training, which is carried out under the control of the minister of education in teacher training colleges established for that purpose in the university centres and in Hamilton and Palmerston North.

PUBLICATIONS. See Appendix VI and the 'Publications' section of the entries for the universities and associated institutions, below.

DIRECTORY TO SUBJECTS OF STUDY

(See also table on p 682)

The following subjects may be studied, as part of the course leading to a first degree and/or at postgraduate level, at all of the universities in New Zealand: accountancy, botany, chemistry, classics, economics, education, English, French, geography, geology, German, history, law, mathematics, music, philosophy, physics, political science, psychology, zoology.

For details of the agricultural subjects which may be studied at Lincoln College and Massey College, see the college entries on pp. 706-711.

The table on p 682 shows which of the universities provide facilities for study or research in a number of other subjects. The symbol ✓ means that the subject can be studied at the university indicated *only* as a main or subsidiary part of the course for a first degree, or for a diploma, certificate, etc.; the symbol ^ means that the subject can be studied at the university indicated at undergraduate and postgraduate levels; the symbol / means that the subject can be studied at the university indicated *only* at postgraduate level.

UNIVERSITY OF NEW ZEALAND*

Founded 1870, dissolved 1961

By legislation passed by the New Zealand parliament in 1961, with effect from Jan 1, 1962, the University of New Zealand is dissolved, each of the four universities (Auckland, Canterbury, Otago, Wellington) has full university status with power to award its own degrees, Lincoln College (formerly Canterbury Agricultural College) is a constituent college of the University of Canterbury and Massey College (formerly Massey Agricultural College) is associated with the Victoria University of Wellington. See also pp 680-681.

The former constituent institutions of the University of New Zealand were the University of Auckland, University of Canterbury, University of Otago and the Victoria University of Wellington, and the former associated colleges of the University of New Zealand were Canterbury Agricultural College and Massey Agricultural College.

GENERAL INFORMATION (see also pp. 677-682)

The univ. was founded, as a purely examining univ., by an act of the colonial govt. in 1870. It received its royal charter in 1876. Its constitution is defined in the N.Z. Univ. Act, 1908, and subsequent amendments. One of the most important of these later amendments was that of 1926 by which the univ. was re-established as a federal univ. consisting of the 4 constituent instns. together with the 2 agric. colls. By amending legislation of Oct. 1957 the titles of Auckland, Canterbury and Victoria university colleges became 'University of Auckland', 'University of Canterbury' and 'Victoria University of Wellington', respectively.

The federal univ. is now largely concerned with wider problems of the promotion and co-ordination of univ. educn. and res. and, within recent yrs., has established a univ. press, a res. fund (at present £100,000 p.a.) and a univ. grants cttee. It supervises higher teaching appts. in the constituent instns., and the governing bodies of the

instns. cannot make any appt. to a chair without the prior approval of the senate. A prof. so apptd. becomes a 'prof. of the univ.'

The univ. owns, in Wellington, Univ. House, which contains its admin. offices and the senate room.

CONSTITUTION The govt. of the univ. is vested in the senate, advised on academic matters by the academic bd., and on entrance matters by the entrance bd. The senate consists of the chancellor, pro-chancellor and vice-chancellor, 4 members nominated by the governor-general, 8 apptd. by the governing bodies of the constituent instns., 2 by councils of agric. colls., 1 by the senate, 5 by convocation, 3 by the academic bd., the vice-chancellors of the constituent instns. and the dir. of educn.

ADMISSION The principal exam. qualifying for matric. is the entrance exam. held in Dec., when the candidate is required to pass in Engl. and

* Member of the Association of Universities of the British Commonwealth.

in 3 or 4 other subjects selected from appropriate groups of subjects. The entrance exam. is no longer in any way related to the sch. cert exam in New Zealand, that exam. normally being taken at least a yr before the candidate takes the entrance exam.

Special provision is made for the admission to certain courses of students who have reached the age of 21 yrs. and who give evidence of some reasonable educnl background though they have not passed the entrance exam. This admission is later confirmed on results gained.

Students from overseas are admitted at the discretion of a cttee. of the senate if they have passed an approved entrance exam. in a univ. overseas, or if they have passed such an exam. at a standard which appears to the cttee to be the standard of univ. entrance in New Zealand.

'AD EUNDEM' RECOGNITION Courses completed, or partly completed, at any British or other approved univ may be accepted *ad eundem status*

EXTERNAL STUDENTS Provision is made for the admission of students exempted from attendance at lectures, to the exams for the degrees of BA, BSc, LLB, LL.M, BCom, MCom, MusB, and BD, except in those subs. where practical cert is required. Exemption in any subj. at stage III for BA and BSc is contingent on completion of 3 units (incl. one at stage II) as an internal student. Exemption is available only to students domiciled in N.Z. or in N.Z. island territories.

ACADEMIC YEAR. Three terms: autumn (March-May), winter (June-Aug.) and spring (Sept-Oct or Nov.)

FIRST DEGREES 3 yrs.—BA, BAg (4th yr for BAgSc provided candidate does not graduate BAg), BAg (Hort), BSc, BSc pass, hons, BPharm (except at Univ of Auckland); 4 yrs.—BHSc, BAgSc (incl. practical work on farm), BAgSc (DairyTech), BAgSc (Hort), MusB pass, hons., BArch (incl. 18 mos' practical work), BE (chem., civil, electr., mech., metall., mining, incl. from 9 to 18 mos in shops, mines or surveying), BCom; 4 or 5 yrs.—BMedSc, 5 yrs.—LLB, BE (hons.), BDS; 6 yrs.—MB ChB.

The degree of BSc hons (Canterbury, Otago and Wellington univs.) may be awarded in one of the following: biochem., bot., chem., geog., geol., maths., microbiol., phys., physiol., psychol., zool.

BA, LLB and BCom can be taken largely or solely by pt.-time or evg. attendance and it is possible, but difficult because of the practical

work requirements, to take a BSc by pt.-time study.

The governing body of each constituent instn and agric. coll. has power to make course regns. which must be complied with by students before degrees and dipls. of the Univ of N.Z. may be conferred on them. One result is that the length of a degree course at a constituent instn. may differ from that stated above.

HIGHER DEGREES For masters' degrees, 1st MA, MSc, MCom, LL.M, ME, MHSc, MAgSc, MAgSc (DairyTech), MAgSc (Hort), MMedSc, 1 or 2 yrs of study beyond the bachelor's degree is required, with exams and thesis, for doctors' degrees (except MD, ChM), 1st LittD, LLD, DSc, MusD, DDS, 5 yrs' standing as master, and an approved thesis, for MD, ChM, 3 yrs' standing, with approved thesis and exams, for PhD, 2 yrs' standing, with approved thesis and exam, for BD, 2 yrs' postgrad work. All higher degrees are open to grads of other univs provided they have been granted 'ad eundem' admission with the prerequisite quals and provided they are resident in N.Z. (except in the case of doctorates where publd work only is acceptable).

HONORARY DEGREES. LLD, DSc, LittD, MusD.

DIPLOMAS Banking, fine arts, music, each 3 yrs, educn, 1 yr. after BA, microbiol., 1 yr. after bachelor's degree, obstet., pub. health, 2 yrs after MB ChB; town planning, 2 yrs after BArch or BE. The constituent instns. and the two associated agric. colls. also award their own dipls.

PROFESSIONAL SCHOOLS. See p. 678.

'OPEN' POSTGRADUATE AWARDS. National Res. scholps, offered annually by DSIR to sci. grads of N.Z. Univ or other approved persons, about 6 res. fellowships (£450 p.a.) awarded annually from the res. fund, which, from time to time, may make awards of a higher value to sr. workers.

PUBLICATIONS. *Calendar* (Jan.), 4s (plus postage), *Minutes of Proceedings of Senate*, free, entrance or entrance scholp *Exam Papers*, 3s a set; *Research in the Univ*, 1946-49, 1950-52, J. C. Beaglehole. *The Univ of N.Z., an Historical Study* (N.Z. Council for Educnl Res., 1937), *Facts and Figures* (1959).

UNIVERSITY PRESS Establd 1947, by a grant from senate. Publishes text-books and works of scholarship.

THE YEAR 1960

(see also separate entries for the constituent instns and agric. colls.)

NEW DEPARTMENTS AND CHAIRS Chairs: accountancy, fine arts, psychol. (Auckland), accountancy, nuclear sci. (Wellington).

HONORARY DEGREES DSc—Sir W. Lawrence

Bragg, dir., Davy Faraday lab., Royal Institution. LittD—Emer. Prof. A. Wall, prof. of Engl., Canterbury, 1898-1931.

GENERAL INFORMATION (see also p 683)

Established by act of the NZ legislature in 1882. Affiliated as a coll. of the Univ of NZ in 1883. In 1885 an endowment of 30,000 acres was made available, one-third of this was sold in 1915.

Lectures were offered in classics, Engl, biol, geol, chem, mechanics, maths and law at the opening of the coll. Others have been developed since then as funds and other circumstances have permitted. A sp sch. of engin was established in 1906, and the sch. of archit in 1917. In 1950 the existing Elam Sch. of Fine Arts was taken over by the univ as a sp sch. The postgrad chair in obstet & gynaeol, the first such chair in the S hemisphere, was established in 1951, funds for its endowment having been raised by public subscription. The dept of town planning was formally approved in 1955, the salary of the 1st prof, who took up his duties in 1957, having been generously provided by Mr N B Spencer for an initial period of 4 yrs.

A branch in stn of the Univ. of Auckland was established at Hamilton, 80 miles from Auckland. Lectures in stage I Engl, stage I hist, stage I geog and stage I educn were offered during 1961 and further subs may be offered in 1962.

CONSTITUTION Under amending legislation of Oct 1957, Auckland Univ Coll became the Univ of Auckland, and was designated a constituent instn of the Univ of NZ. The titles of the principal officers were changed to chancellor, pro-chancellor and vice-chancellor. The council comprises 19 members, of whom 3 are apptd by the governor-general, 2 by the professional bd., 1 by the Auckland educn. bd., 1 by the Auckland city council, 1 by the executive of the students' assoc and 6 elected by the grads., 1 by the sub-professional staff, 2 by members of the House of Representatives and 1 by the principals of secondary schs., together with the vice-chancellor of the univ.

INCOME (1960) Total, £681,984 (govt grants, 87.6 per cent., fees, 10.6 per cent., endowment, 0.9 per cent.; other sources, 0.9 per cent.).

GENERAL INFORMATION (see also p 683)

Founded by ordinance of the Otago provincial council in 1869, with power to grant degrees in arts, med, law and music, the univ was opened in 1871. By an agreement effected in 1874 the univ agreed to hold in abeyance its power of granting degrees, and to become affiliated to the Univ. of New Zealand, in which it ranks as one of the four constituent instns. The law fac originated in 1873, the med sch in 1874, the sch of mines in 1878, the dent sch in 1907, accountancy lectures and the sch of home sci in 1911, the theol fac in 1945 and the sch of physical educn in 1948.

CONSTITUTION The govt of the univ is vested in the council, on which are represented the professional bd, teaching staff, students' assocn, grads (convocation) and a number of educational and other bodies, the governor-general-in-council nominates two members. The council is advised on academic matters by the professional bd.

INCOME (1960). Total £966,899. Gen univ funds, £737,253 (govt grants, 81 per cent, student fees, 9 per cent., endowment lands, gifts, bequests, 2 per cent.; other sources, 8 per cent.), res schols and sp funds, £200,454; allied instns (adult educn), £29,192.

FACULTIES AND DEANS Arts & music, Prof G R Manton (classics), comm, T K Cowan, dent, Prof Sir John Walsh (oral surg), home sci, ; law, Prof F W Guest, med, Prof E G Sayers (therapeutics); sci, Prof D B Sawyer (maths.), technol, Prof G J Williams, theol, Rev Dr J Henderson.

UNIVERSITY PRECINCT. The main bldgs are on the original univ site, but the med. sch has developed so as to be nr. the Dunedin hosp., about $\frac{1}{2}$ ml from the univ site. The devel of new bldgs is being planned so that a continuous univ precinct will link these 2 sections, using an existing public reserve on which the Otago museum stands. The whole area is in a residential district close to the shopping area of the town, and the regional planning authority of the city council has approved the univ plans and zoned the area accordingly. The univ district, incl the city of Dunedin (pop 105,053), comprises the land districts of Otago and Southland (pop 262,500), but students in considerable numbers come from all parts of N Z to attend the sp schs.

LIBRARIES Main library, incl depl. and class libraries, 182,000 vols; med. library, 40,000 vols, also the Hoeken collection of 23,300 books, pamphlets and a large collection of MSS relating to hist of N Z and the Pacific.

LABORATORIES, MUSEUMS, FIELD STATIONS Labs in all sci, med, dent, mining and home sci depts. (see Teaching Staff) Depl museums in anat, pathol and geol. Marine biological lab., Portobello (10 miles from Dunedin).

ENTRANCE REQUIREMENTS. Special conditions govern entrance to professional classes in the facs of med. and dent, in which annual admissions are limited to 120 and 60 respectively, and entrance to the sch. of physical educn, which admits up to 50 students annually. Non-members of the univ, if over 16 yrs of age, are admissible to most classes.

FIRST DEGREES BA, BSc—3 yrs, BSc hons (biochem., bot, chem, geol, maths, microbiol, phys, physiol, zool), BCom, MusB, BHSc, LLB, BE mining & metall, BPharm—4 yrs, BDS—5 yrs, BMedSc—4 or 5 yrs, MB ChB—6 yrs.

HIGHER DEGREES MA, MCom, MHSc, LL.M, ME, MDS, MMedSc—1 yr from corresp bachelor's degree, MSc—2 yrs from BSc; BD—2 yrs from 1st degree (all facs), PhD—2 yrs from hons degree (all facs except dent and div). Courses of instructn provided for these degrees except PhD for which facilities for supervised res. available. A 4 yrs' course of pt-time study and res. required for members of staff proceeding to PhD. The degrees of ChM, MD, DDS, LL.D, LittD, MusD and DSc may be earned without attendance or res within the univ. Grads of other univs. are accepted as candidates for higher degrees by the univ if their qualifs. are deemed to be of equivalent standard.

EXTERNAL DEGREES Extra-mural students are accepted only in certain courses (notably arts, comm and law) and must reside within the Univ of Otago district, comprising the land districts of Otago and Southland.

GENERAL INFORMATION (see also p. 683)

Victoria Univ. of Wellington was established in 1957 by an amendment act which reconstituted Victoria Univ. Coll. and declared the univ. to be a constituent instn. of the Univ. of N.Z. The former instn, Victoria Univ. Coll., was the last of the 4 main constituent colls. of the Univ. of N.Z. to be established. It thus completed, apart from special provision for agric. teaching, the general structure of the country's instns. for univ. work. In 1887 Sir Robert Stout, then premier, introduced a bill to found a coll. serving the Wellington, Hawke's Bay and Taranaki districts. It was Stout's hope that the Wellington coll., being at the seat of govt. and of the court of appeal, might specialize in the teaching of law, pol. sci. and hist., as well as in some depts. of sci. The bill passed the house of representatives, but was shelved by the legislative council. A new ministry coming into office in 1888, the matter lapsed for 7 more yrs., in spite of the constant urgings of the univ. senate and court of convocation. In 1894 Stout again came forward with a 'Middle District of New Zealand Univ. Coll. Bill'—the Middle District now comprising not merely Wellington, Hawke's Bay and Taranaki, but Nelson, Marlborough and Westland as well. No provision could be made in a private member's bill for the expenditure of money and though the bill was

finally passed and the govt. even apptd. certain members of a coll. council, no further action was taken. The final step was taken by Mr Seddon, the premier, on his return from the diamond jubilee celebrations. His Victoria College Act, passed on Dec. 22, 1897, founded the coll. 'in commemoration of the 60th yr. of the reign of H.M. Queen Victoria'. It was to be a liberal foundation, bringing univ. educn. within the reach of the working classes. The coll. was affiliated to the Univ. of N.Z. in 1899. Endowed by govt. with 4000 acres. Coll. bldgs., towards which govt. gave £31,000, were opened in 1906, addnl. wings for library, etc., and for phys. erected 1921-22, new admin. and biol. blocks erected 1937-39; 3rd storey to biol. block completed in 1954. Six-storey sci. block completed in 1958.

The govt. approved of a grant to the univ. for the establishment in 1960 of a branch coll. at Palmerston North, a city some 95 miles N. of Wellington, where Massey Coll. is situated. This branch coll. is known as Palmerston North University College (for staff, see 'Associated College', above) and in its 1st yr. it offered to internal students-instrucn. at stage I in the subsjs. educn., Engl., hist., geog. and maths. Addnl. subsjs. will be available in succeeding yrs. A dept.

of extra-mural studies will provide tuition to external students throughout New Zealand in a restricted number of subjects

CONSTITUTION The council, the governing body of the Univ, consists of the vice-chancellor (*ex officio*) and 17 other members apptd. or elected as follows: 2 by the governor-in-council, 4 by the court of convocation, 2 by the professorial bd., 1 by the teaching staff, 1 by the Wellington city council, 2 by members of educn. bds., 1 by governing bodies of secondary schs., 2 by teachers in primary schs., 1 by teachers in secondary and day technical schs., 1 by the executive of the students' assocn

GENERAL INFORMATION (see also p. 683)

In 1872 the provincial council of Canterbury set aside certain lands for the endowment of higher educn., incl provision for a sch. of agric. Land suitable for the activities of such a sch was bought at Lincoln in 1877 by the Canterbury Coll. bd., which was administering the endowments, and Lincoln Agric. Coll. was opened in 1880. By the Canterbury Agric. Coll. Act, 1896, control of Lincoln Agric. Coll. was removed from the Canterbury Coll. bd and vested in a separate bd. of governors, the coll thenceforth being known as Canterbury Agric. Coll. In 1913 a univ degree in agric. was instituted and the coll was recog as a sch of agric by the Univ of New Zealand. A series of amending acts was passed between 1922 and 1927, and by legislation passed in the latter yr. the coll. became a coll of the univ. The coll. is situated nr the township of Lincoln, about 13 mls south-west of Christchurch, South Island.

CONSTITUTION. The Canterbury Agric. Coll. Act, 1930, with subsequent amendments, constitutes the present authority of the coll. It is governed by a bd of governors consisting of the principal and 15 members elected as follows: 1 by governor-general of N.Z., 3 by Canterbury members of the House of Representatives, 2 by council of Univ of Canterbury, 1 by Council of Univ of Otago, 1 by South Island agric and pastoral assocns, 3 by South Island federated farmers of N.Z., 3 by grads, 1 by staff.

INCOME (1960). £304,429 (grant, 51 per cent; fees and donations, 3 per cent; endowments, 1 per cent; trading, 45 per cent).

LIBRARY 10,000 vols. Subscribes to 300 journals.

LABORATORIES, ETC. Normal range of bldgs. to provide teaching & res facilities in agric econ., agric engin, farm management & valn, hort., plant & animal scis., soil, vet sci. and wool res.

The COLLEGE FARMS comprise approx 2228 acres, 1350 acres being situated at the coll and 878 acres 8 mls distant at Ashley Dene farm. Special facilities are available for sheep and plant res on a field scale. Full facilities are available for teaching hort.

The CROP RESEARCH AND BOTANY DIVISIONS (D.S.I.R.), which are the main centres in N.Z. for plant breeding and bot study, are sited contiguous to the coll. Both these instns, together with other sub-stns of D.S.I.R. associated with them, co-operate with the coll in the provision of material for teaching and res.

The TUSsock GRASSLANDS AND MOUNTAIN LANDS INST., establd at the coll under a separate cttee of management, is responsible for the investigation of various aspects of management of the tussock grasslands of New Zealand and the development of techniques to bring about the more protective and stabilizing cover of vegetation and soil conservation. It also facilitates coordination of res. and the dissemination of information.

RESEARCH. Investigations are proceeding in soil sci, the various major fields of plant sci and animal sci, agric econ, farm management & valn, and agric engin. Facilities are available for postgrad study and res in these fields.

ADMISSION. See p. 683. Overseas students desiring to be admitted *ad eundem statum* to any of the degree courses at the coll should supply full details of the undergrad or grad course already taken. Subsequently, formal appcn must be made to the registrar of the Univ of N.Z. Non-members of the univ may be admitted to the dipl courses, details of pre-requisite qualifs being obtainable from the coll registrar.

UNIVERSITY INSTITUTIONS IN NIGERIA

[Specially contributed for this edition by Sir Alexander Carr-Saunders,
formerly Director of the London School of Economics]

The first institution of university rank to be established in Nigeria was University College, Ibadan, founded in 1948 when teaching began, and it is proposed that the college should become a university in 1962. When the college was founded the constitution of Nigeria was unitary, and the college was created by the central government. Under the present constitution there is the federation of Nigeria comprising three constituent regions, north, east and west, higher education is on the concurrent legislative list, and it is therefore open to the federal government and the regional governments alike to create universities. The position of the single pre-existing university institution had to be defined under the constitution and it was scheduled as a federal responsibility. The legislature of the eastern region, making use of its powers under the constitution, created the University of Nigeria in 1955, this university is situated at Nsukka, and teaching began in 1960. These are the only two institutions of university status now open in Nigeria, but a large expansion of universities is planned. The Commission on Post-School Certificate and Higher Education in Nigeria (called the Ashby commission after its chairman, Sir Eric Ashby) reported in 1960 and recommended the foundation of two more universities, one in federal territory at Lagos and one in the northern region at Zaria. Following these recommendations the federal government is taking active steps to found a university in Lagos while the legislature of the northern region has set up a provisional council for the University of the Northern Region. Furthermore it has been decided by the government of the western region to found a university at Ife. Thus, in addition to University College, Ibadan (soon to become the University of Ibadan), a federal responsibility though in the western region, and the University of Nigeria, a creation of the eastern region, there will presently be another federal university, that of Lagos in federal territory, and two more regional universities, one created by the northern region and one by the western region.

In 1961 the federal government issued a sessional paper which contemplated a total enrolment of 10,000 students in all Nigerian universities by 1970. The paper stated that 'universities should have autonomy in the management of their affairs' and that 'the overall national interest' would be preserved by the statutory establishment of (1) the National Universities Commission, (2) the Inter-Regional Man-Power Board and (3) the All-

Nigeria Academic Council. The first of these bodies will make plans for the balanced development of universities, will examine the financial needs of the universities, will receive block grants from the federal government and will allocate such grants to the universities in accordance with need. The second body will survey periodically the nation's man-power needs and will formulate programmes for man-power development through university expansion. The third body, whose membership will be drawn from the academic staff of the universities, is 'designed to ensure the maintenance of the highest academic standards'. These proposals thus foreshadow a system under which there will be federal universities, created or taken over by the federal government and wholly financed by it, and universities created by regional governments which will be eligible for financial assistance from the federal government through the National Universities Commission. The sessional paper states that 'the total capital expenditure for the period 1961-1970 is likely to be of the order of £75 million and the total recurrent cost in 1970 of the same order'.

CONSTITUTION The University of Nigeria is governed by a provisional council, its definitive constitution has not yet been announced. The supreme governing body of University College, Ibadan, is the council, consisting of 24 members of whom seven are members of the academic staff, of the remainder six are nominated by the regions, two by each region, three by the governor-general, two by the Inter-University Council for Higher Education Overseas, one by the visitor and three co-opted, together with the chancellor and the chairman. There is a senate consisting of all the professors and certain other members of the academic staff, it is laid down that the senate 'shall manage the educational affairs of the college and act for the college in all academic matters'. The constitution is modelled on the pattern of those found in the English civic universities, and as in these universities academic matters are under the effective control of the academic staff. When the college becomes a university the constitution will need revision, but the revision needed is slight since, except for the lack of power to grant degrees, the college has all the attributes of a university. In the session 1959-60 the income of the college amounted to a little more than £1 million, of this sum rather more than £175,000 was derived from fees, nearly all the remainder coming from the federal government in the form

of a block grant the amount of which is announced for a period of years. The University of Nigeria is supported by a fund derived from the Eastern Region Marketing Board and amounting to £2,500,000 at the end of 1959.

PRE-UNIVERSITY EDUCATION The school system is organized on the English pattern of primary and secondary schools. Taking the country as a whole a large proportion of the children enter primary schools, but in some areas the proportion of pupils who complete primary education is small, thus in the northern region only about one in eleven of children of school age is at school. Secondary schools are far less well developed. The Ashby commission found that there were about 650,000 pupils in the first year of primary school but only about 12,300 in the first year of secondary school, moreover there were only 553 pupils in the whole country doing sixth form work in schools. Thus the foundation provided by the secondary schools, on which higher education rests, is slender, but so great is the enthusiasm for education that thousands of Nigerians, after preparation gained outside schools, enter each year for the General Certificate of Education. Over 1000 Nigerians with normal entrance requirements applied for places in University College, Ibadan, in 1959, but there were places for only about 300 of them.

ADMISSION The minimum entrance qualifications normally demanded by University College, Ibadan, and by the University of Nigeria are equivalent to those demanded by the University of London, both institutions admit at a lower level a small number of students who, through no fault of their own, have been unable to prepare for the G.C.E. examination, but entry at this lower or concessional level will not be permitted by the college after the session 1960-61. Fully qualified applicants have no right of entry to either institution, selection is made from among qualified applicants. Registration for higher degrees at the college is open only to members of the academic staff and to those with first London degrees, this restriction will come to an end as soon as it becomes a university and awards its own degrees.

DEGREE COURSES At present all students of the University of Nigeria are working for a pass degree in arts, the full syllabus has not yet been announced. It is proposed shortly to offer degrees in science and in certain professional subjects. University College, Ibadan, is in special relationship with the University of London. Students work for degrees of that university, the university permits extensive modification of the London syllabuses to suit local needs and conditions, but the standard of London degrees is maintained. Members of the staff of the college co-operate with London examiners in setting the papers and marking the scripts, but the final adjudication rests with the London examiners. Courses for the BA are offered leading to a pass degree and to honours degrees in classics, English, geography,

Greek, history, Latin and mathematics, in the faculty of science there are courses for the BSc leading to an honours (general) degree in science, and to honours degrees in botany, chemistry, geography, mathematics, physics and zoology. Degree courses are also offered in agriculture (BSc(Agric)), divinity (BD), economics (BSc(Econ)) and medicine (MB BS). The course in medicine lasts for five years, all other degree courses take three years. The college offers in addition courses leading to a postgraduate certificate (1 year) and a diploma (1 year) in education, and to diplomas in child study (18 months) and librarianship (2 years).

STAFF The grading of the academic staff of the college follows British practice—professors, senior lecturers, lecturers and assistant lecturers. Vacancies are normally advertised. Salaries are kept generally in line with those obtaining in Great Britain. There is annual home leave and provision for study leave. Teaching methods resemble those in English civic universities, the time available for research is no less than that which falls to the staff of those universities. In 1960 there were 205 members of the teaching staff of the college of whom 57 were locally born, 118 came from the United Kingdom, 23 from the rest of the Commonwealth and 7 from elsewhere. The proportion which locally born members of the staff form of the whole staff has been increasing year by year.

STUDENTS In 1960 there were 255 students at the University of Nigeria, the number is expected to rise sharply in the session 1961-62. In the same year there were 1255 students at the college, with the opening of new halls of residence the number is expected to reach 1800 in the session 1961-62. At both institutions all students are full-time and all live in halls of residence. All undergraduate members of the college are required to join the students' union under whose auspices social, cultural and athletic activities are organized, a building for the union was opened in 1960. There is a comprehensive medical service, employing two full-time medical officers, nurses and other ancillary staff, under which students obtain treatment free of charge. There are college scholarships, state scholarships and donor scholarships; there are also awards made by the federal and regional governments. It is estimated that well over 90 per cent of the students are in receipt of some form of award. The academic year begins in October and is divided into three terms on the British pattern.

EXTRA-MURAL STUDIES At the college there is a department of extra-mural studies whose activities extend throughout the federation, but it is likely that the additional universities, now planned, will in due course take over the work in their areas. The department organizes weekly tutorial courses of which there are over 100 each year, residential courses and week-end schools. The schools are conducted all over the federation, the residential courses are held at the college in vacations.

OTHER INSTITUTIONS OF HIGHER EDUCATION
 Among other institutions of higher education the most important has been the Nigerian College of Arts, Science and Technology with branches at Zaria, Ibadan and Enugu. The work of the college extended from instruction in engineering at degree level to preparation for the G C E. Each branch has specialized in one or more subjects, for example that at Zaria in engineering, that at Ibadan in pharmacy and that at Enugu in estate management. It has now been decided that the Nigerian College should cease to exist as a federation of branches and that the site and buildings of the Zaria branch should be taken over by the University of the Northern Region, of the Ibadan branch by the University of Ife, and of the Enugu branch by the University of Nigeria,

it will be for the universities to decide how far they will continue to provide the courses now offered in these branches. There are four technical institutes in the federation, the sessional paper of the federal government proposes that facilities for technical education should be greatly increased. The only other type of institution for higher education is the teacher training college, there are more than 300 such colleges, mostly small in size, and of very different standards.

FURTHER INFORMATION The most useful source of information relating to higher education in Nigeria is the report of the commission on post-school certificate and higher education in Nigeria published in 1960 by the Federal Ministry of Education, Lagos, under the title *Investment in Education*.

GENERAL INFORMATION

The coll. was opened in 1948 with a provisional scheme of govt. In 1954 assent was given by the governor on behalf of H.M. the Queen to an ordinance enacted by the legislature of Nigeria, the purpose of which was to reconstitute the coll on a more permanent basis as a coll. in special relation with Univ. of Lond.* for whose degrees the coll. presents its students. New legislation is (March 1962) before the govt., the purpose of which is to establish the coll. as an autonomous univ. offering its own degrees.

CONSTITUTION The coll. council is the supreme governing body and is charged with control of finance. The senate is an academic body which, generally, manages, and where necessary advises the council upon, the educnl. affairs of the coll. In respect of each fac. there is a fac. bd. which deals with courses of study and exams and matters of detail concerning the work of the fac. Fac. bds. are required also to deal with matters referred to them by the senate. The coll. is open to all classes and communities 'without any distinction whatsoever'.

INCOME A grant was made under the colonial development and welfare act towards the cost of the permanent bldgs. The Nigerian govt. has endowed the coll. and makes an annual grant. In addition, endowments amounting to £1,175,000 have been received from the Nigerian Cocoa Marketing Bd. There is also an endowment fund. Income (1959-60) £1,124,705 (incl. Nigerian govt. annual subvention, £538,160; endowment interest, etc., £365,975; student fees, £175,248; rents and misc., £45,322).

FACULTIES AND DEANS (1961-62) *Agric.*, Prof. R. J. McIlroy, *arts*, Prof. Kathleen Geoghegan (maths), *econ. & soc. studies*, Prof. R. H. Barback (*econ.*), *engin.*, ; *med.*, Prof. G. M. Edington (*pathol.*), *sci.*, Prof. E. Njoku (*bot.*)

LIBRARY 135,000 vols., 2500 current serial publications. Sp. collections include W. African hist. and ethnol. (including 150 Arabic MSS.), trop. agric. and trop. med. The library is the legal depository for all Nigerian publications.

LABORATORIES, FIELD STATIONS, ETC. The fac. of agric. has its teaching, res. and admin. bldgs. and its own farm on the coll. site. On the farm, grassland res., crop and animal production are actively proceeding and small herds of Zebu and Ndama cattle, as well as poultry, swine, sheep and goats, are maintained. A considerable area is under mechanized cultivation. As part of res. into moisture conditions in Nigeria, measurements of evapo-transpiration at 20 installations, covering the Niger delta to the northern frontier, are being made.

BOTANICAL GARDENS planned to expand to 80 acres. Mainly indigenous species grown. *Indev seminum* publ. annually.

UNIVERSITY COLLEGE HOSPITAL Provisionally recognized for clin. teaching for MB BS of the Univ. of London under special relation with the univ.*

INSTITUTE OF EDUCATION (see also 'Teaching Staff', above) Founded 1956, exists to promote res. into W. African educn., to assist trg. colla. assoc. with the inst. in solving problems with which they may be confronted, and to train teachers. 3 courses are offered, leading to postgrad. cert. in educn. of Univ. of London, coll. dipl. in educn. and univ. dipl. in child study.

THE NIGERIAN INST. OF SOCIAL AND ECONOMIC RESEARCH (see also 'Teaching Staff', above) is sponsored by the Nigerian fed. govt. and by the univ. coll., with which it operates in close association. Its functions are to conduct econ. and social res. and to provide a centre for indep. res. workers in Nigeria.

INSTITUTE OF CHILD HEALTH Founded 1961 with funds from United Africa Co. received through fed. govt. Its aims are to conduct and co-ordinate res. into problems of child health.

LANGUAGE OF INSTRUCTION. English.

ADMISSION There are 2 methods of admission: (1) by passing the coll. entrance exam. Candidates are ordinarily eligible if they have passed the Cambridge school cert. exam with passes at credit standard or obtained a general cert. of educn. with passes at ord. level in Engl. and 4 other subjects. (2) By direct entry. This is exemption from the entrance exam and may be applied for by candidates who have satisfied the full minimum entry requirements of the Univ. of London together with the addnl. requirements for entry in specific degree subjects.

ACADEMIC YEAR Oct. to June. 3 terms.

FEES for bd. and tuition. *Agric.*, £132-£187 p.a., *arts*, £127-£152 p.a.; *educn.*, £180 p.a., *med.*, £162-£262 p.a., *sci.*, £132-£162 p.a. Postgrad. £180. All students are resident.

SCHOLARSHIPS, ETC. Fees plus £75 p.a. for remainder of course awarded by coll. on prelim. exam. and on sessional exam. for direct entry in any fac., Nigerian federal govt. awards annually 10 state scholps covering fees, vacation allowances and allowance of £70 p.a. for prelim. & degree course (£80 clin. med.); Nigerian Cocoa Marketing Bd. (open to sons and daughters of cocoa farmers), fees plus £65 p.a. (prelim. students), and £70 p.a. (degree students), and vacation allowances. Federal and regional govts. award bursaries similar to those of the N.C.M.B.,

* For a note on these 'special relationship' arrangements, see p. 961.

GENERAL INFORMATION

The Univ is an independent inst to be governed by a council established by the Univ of Nigeria Law 1955

CONSTITUTION The paramount governing body of the Univ is the council which is composed of the chancellor, chairman, principal, vice-principal and such other persons not exceeding 15 in number as may be provided for by the Univ statutes. The senate, which deals with academic matters, consists of the principal, deans of the several facs, dirs of the several insts., all profs of the Univ, the librarian, the dir of extra-mural studies and 2 members of the academic staff to be elected by congregation.

INCOME. The income of the Univ. is derived from a 'Univ. of Nigeria Fund' which consists of an annual grant of half a million pounds from the Eastern Regional Marketing Bd—a statutory corporation created by the govt. of Eastern Nigeria. The fund, which was set up as a result of an Eastern Regional directive of 1955, totalled £2,500,000 at Dec 31, 1959. An addnl. source of income is expected from the development of a large acreage of land which is being allocated to the Univ for this purpose on the lines of the land grant colls of the U S A.

FACULTIES Arts. The coll of educn. admitted students in Jan 1961

LOCATION The Univ town of Nsukka is 40 miles from Enugu, the admin. capital of Eastern Nigeria. A total area of 1000 acres of land has been acquired for use by the Univ. and a further 15,000 acres is contemplated for use by the Univ. as an agric. and commercial site.

MICHIGAN STATE UNIV is contributing considerably to the organization of the new Univ. A jt Univ advisory cttee, which it is hoped will include representatives of Michigan State Univ. and of the Univ of London as well as members of the Univ of Nigeria, is to report to the Univ on a wide range of its activities

FIRST DEGREES The Univ intends to award its own degrees. It is proposed that most degree

courses will take 4 yrs, or 3 yrs for students of advanced standing

HIGHER DEGREES The groundwork is being prepared for master's and doctorate degrees of the university. There are at present no postgrad students

THE UNIVERSITIES OF PAKISTAN

[Originally contributed by Dr. A. H. Zuberi, then Vice-Chancellor of Rajshahi University, subsequently revised by the Secretary of the Inter-University Board of Pakistan]

HISTORY. The universities of India and Pakistan have not developed from such famous ancient centres of learning and scholarship as Takshasila and Nalanda. Takshasila flourished as a centre of education only till the fifth century A.D., while Nalanda ceased to exist towards the end of the twelfth century.

In the mediæval period, while seats of Hindu learning remained in the east and south, the Muslim rulers evolved an elaborate system of higher education and encouraged the establishment of colleges at places like Delhi, Allahabad, Lucknow, Lahore, Rampur, Aymer and Bidar. The curriculum in these colleges was somewhat similar to those in the mediæval European universities, that is, the *trivium*—grammar, logic and rhetoric—and the *quadrivium*—arithmetic, geometry, music and astronomy—and to these were added a study of philosophy, theology and Muslim law. Certain colleges specialized in particular subjects. For instance, the college at Lucknow specialized in theology and those at Rampur in logic and medicine, at Lahore, astronomy and mathematics were emphasized. The medium of instruction in these colleges (*madrasahs*) was mainly Arabic. Although most *madrasahs* disappeared or were absorbed in later institutions, some still exist and carry on the traditions of the older form of learning.

When the British succeeded the Muslims as rulers in India, they were slow to develop a distinctive system of higher education, and it was not until the beginning of the nineteenth century that English schools and colleges began to be established in presidency towns like Calcutta, Bombay and Madras.

In accordance with the recommendations of the famous despatch of Sir Charles Wood (1854), the court of directors of the East India Company established the universities of Calcutta, Bombay and Madras in 1857. The model for these universities was the newly established University of London, which was then a purely examining body. This has had an unfortunate effect on the development of higher education in the sub-continent, since the universities were slow to establish teaching departments of their own or to encourage intercollegiate instruction. It is significant that no other university was established till 1882, when the University of the Punjab was founded. The University of Allahabad was established in 1887 and thus there were only five universities till 1914. In 1914–20 a rapid development of higher education took place. Eleven

universities were established then largely because education became a provincial subject when provincial autonomy was granted in 1919, and there was democratic pressure in provincial parliaments for the rapid extension of facilities for higher education.

When Pakistan came into being on the partition of India, in 1947, there were only two well-established universities in the country, namely, the University of the Punjab (1882) and the University of Dacca (1920), the University of Sind had been created only a few months before partition and began to function at Karachi on April 3, 1947. Independence brought in its wake a significant movement for the development of higher education at an accelerated pace and three more universities were subsequently established, namely, the universities of Peshawar (1950), Karachi (1950) and Rajshahi (1953).

STRUCTURE OF UNIVERSITIES There is no single pattern to which all the universities conform though all are now both teaching and affiliating institutions. The trend of present policy in the sub-continent is against the establishment of purely affiliating and examining universities.

Although Dacca began as a unitary teaching university whose jurisdiction was restricted to the city of Dacca, from 1947 it also assumed the functions of an affiliating university. Karachi is an affiliating university, whose jurisdiction is limited to the city of Karachi. It has, however, also organized teaching on a federative basis and all postgraduate and research teaching is under the direct control of the university. The structure of the Punjab is more complex. The university began as a purely affiliating institution but gradually developed its own teaching departments. It has three kinds of college under its jurisdiction: (i) university colleges which are maintained by the university itself; (ii) teaching colleges in Lahore which are maintained by the government of West Pakistan and private managing bodies (there is also a government technical college affiliated to the university but situated outside Lahore); (iii) affiliated colleges located in various districts. Peshawar is an affiliating as well as a teaching university, all the technical and professional colleges, in addition to the postgraduate teaching departments, are under its direct administrative and academic control. Sind has a limited number of postgraduate teaching departments of its own, most of the undergraduate teaching work being carried on in the affiliated

colleges. University teaching at *Rajshahi* is confined to the postgraduate level, all undergraduate teaching up to BA and BSc standard is carried on in the affiliated colleges

RELATIONSHIP TO GOVERNMENT. All the universities were established by acts of provincial legislatures except Karachi, for which an act was passed by the central legislature since it is situated in the federal capital. All are corporate, autonomous bodies. All statutes and ordinances framed by the universities are subject to sanction by the provincial or federal government or the chancellor, as the case may be

FINANCE The annual grants made by provincial governments through their education departments constitute the main source of income of all the universities. University accounts are strictly audited by the accountant-generals of the provincial governments. During the last few years, the government of Pakistan have accepted the principle of making direct grants for various schemes submitted to them by the universities from time to time. These grants are not routed through the provincial governments and are at present awarded by an *ad hoc* committee appointed by the government of Pakistan on which the Vice-Chancellors' Committee of the Universities of Pakistan is represented

The budgets of universities in Pakistan are formulated on an annual basis. They are first submitted to the syndicate or executive council, as the case may be, and then placed before a larger body called the senate or court. The ratio of government grant to total budget varies from one university to another, but the general pattern seems to be that government grants amount to more than one-half of the total annual income, the remaining income coming from such other sources as tuition fees, examination fees and fees for the registration of graduates

ADMISSION, STRUCTURE OF DEGREE COURSES, ETC. After matriculation (which follows ten years of school attendance) students are admitted to intermediate or degree colleges where two-year courses lead to the intermediate examination in arts or science. BA and BSc pass degrees each take a further two years (three years for honours). The course for a master's degree in arts or science lasts for two years after the pass BA or pass BSc, or one year after an honours degree. The Inter-University Board of Pakistan has recommended the universities to adopt a three-year course for a bachelor's degree in arts or science, whether pass or honours, to be followed by a two-year course for the master's degree. In all universities the PhD course lasts for two or three years after the MA or MSc. Some universities do not hold their own entrance examinations but accept the intermediate certificate as a qualification for admission to a course leading to a pass or honours degree; others hold their own matriculation and intermediate examinations. Diplomas in education and foreign languages are awarded by some universities. English is the medium of

instruction in all universities and colleges (including intermediate colleges)

TEACHING STAFF. Professors, readers and lecturers are selected by committees which are usually composed of members of the faculties, academic board or council, and experts nominated by the chancellor. The appointments are made by the executive council or the syndicate of the university. There is no restriction with regard to the appointment of teachers of foreign nationality. Most of the teachers employed have gained their first degrees from universities in Pakistan or India and many have higher degrees from Europe, the UK or USA

The retiring age in most universities is sixty years. There is no pension scheme but the benefit of provident funds is available. There is no fixed provision for sabbatical leave but each university may grant study leave to its teachers for a period of two to three years

Teaching at the undergraduate level is conducted by lectures and group discussions. The tutorial system has been introduced in all universities and at the honours and postgraduate level special attention is paid to tutorial and seminar work

STUDENTS In 1959-60, 56,883 students were enrolled at undergraduate (excluding intermediate) and postgraduate levels in universities and arts and science and professional colleges. 8935 in university teaching departments, 28,681 in arts and science colleges, and 19,267 in professional colleges

In Pakistan students enter college or university a little earlier than in the United Kingdom. The age of most students lies in the 16-19 range. On the basis of the 1951 census it has been estimated that the 16-20 age group forms about 10 per cent of the entire population and that of this age group approximately 4 per cent are students in intermediate or university classes.

The general level of fees is almost uniform and amounts to approximately £15 a year. Dacca, Panjab and Peshawar have hostels or halls of residence, while Karachi, Rajshahi and Sind are endeavouring to move to new campuses where similar facilities will be available. The cost of residence is about £57 a year

ACADEMIC YEAR. At Dacca, Karachi and Rajshahi, the academic year normally begins in July and is divided into three terms: July-September, November-December and January-April. At Panjab and Peshawar the three terms are September/October-December, January-March, April-June. At Sind there are two terms: July-November, November-March

ADULT EDUCATION No adult education classes are conducted by the universities.

INTER-UNIVERSITY ORGANIZATIONS. The Inter-University Board of Pakistan was constituted in 1948 by the Ministry of Education, Government of Pakistan. The board consists of three members from each university, one being the

vice-chancellor and the other two nominees of the syndicate or the executive council (one of these nominees must be the principal of an affiliated college or the head of a teaching department). The chairman and the secretary of the board for 1961 are respectively Dr M Husain, Vice-Chancellor, University of Dacca, and Professor K. M. Hosain, MA *Alig*, BA *Oxon* (42W, P E C H S Block 6, Karachi 29, West Pakistan).

There is also a Standing Committee of Vice-Chancellors with well-defined powers. All the vice-chancellors are members *ex officio* of the Inter-University Board, the two other nominees of each university retire annually and are replaced by new nominees. The educational adviser to the government of Pakistan has the right to attend meetings of the board but has no power to vote.

The Inter-University Board created in 1953 an Inter-University Sports and Athletic Board which is responsible for organizing sports and athletics on a national basis.

A National Union of Students was formed in 1957.

THE UNIVERSITIES TO-DAY. The government of Pakistan have set up a planning board which has prepared an elaborate plan for the expansion and co-ordination of education over a five-year period. An attempt is being made to integrate all forms of higher education into one system in which educational standards will be comprehensively defined and maintained. It is being generally recognized in Pakistan that this can be achieved only by affirming the leadership of the universities in the cultural life of the nation and by making them the focal points of real and effective national policies for higher education. The planning board also recommended the setting up of a University Grants Committee on the model of the U G C in Britain so that it may help the government as well as the universities in formulating long-range plans and in directing the expansion of the universities on a planned basis. The total expenditure on education by the central and provincial governments was raised from Rs 226,728,000 in 1959-60 to Rs 264,906,000 in 1960-61, this is an increase of 16.8 per cent and also represents an increase in expenditure on education from 6.99 per cent of the total revenue expenditure to 7.58 per cent.

Higher education in Pakistan is still based on the western concept of liberal education. Education is entirely secular, teachers and students being at liberty to pursue their studies or research free and unfettered from any political or theological bias. But with the phenomenal increase in student numbers the universities in Pakistan have become conscious of the role which they are destined to play in the national life of the country, and there is a general tendency to maintain and assert the continuity of Islamic traditions and idealism.

INSTITUTIONS OF HIGHER EDUCATION OTHER THAN UNIVERSITIES. Higher education in Pakistan is almost entirely confined to universities,

there being hardly any independent professional or technical institutions providing postgraduate instruction. Medical, law and engineering colleges are constituent colleges of a university, are subject to the control of the university in academic matters but administratively are under the relevant government departments. The faculties and boards of studies relating to these colleges are formed according to university statutes and their conduct is regulated by the university's legislative and administrative organizations: the senate, the syndicate and the academic council. At present there are no teacher training faculties in universities but plans are being made for initiating courses in education as a part of the universities' teaching activity. Teacher training colleges, like the Central Training College, Lahore, are administered by the Government Directorate of Public Instruction and are intended to supply trained teachers for government secondary schools.

NATIONAL EDUCATION COMMISSION. The government of Pakistan has set up a National Education Commission, with wide terms of reference, which has been enquiring into the entire range of existing educational facilities in the country and has made recommendations for the reorientation and reorganization of the educational system, in the light of national needs. So far as university education is concerned, the commission was specifically asked to consider, *inter alia*, the constitution, administration, control and jurisdiction of universities, the finances of universities and colleges, admission requirements (including the place of the present intermediate courses), the length of degree courses (including post-graduate courses), advanced study and research, scientific and technological education, the need for the highest standards of teaching and research in the universities and colleges, the need for the co-ordination of specialist fields, the advancement of Islamic studies and oriental learning; the qualifications and conditions of service of university and college teachers, student discipline, the development of a tutorial system; and the system of examinations. The report of the commission has been published (*see below*). The chairman of the commission was Dr. S. M. Sharif, educational adviser and *ex-officio* secretary to the government of Pakistan, Ministry of Education, Karachi.

In accordance with the recommendations of the Commission on National Education, intermediate classes have been transferred from degree colleges to separate institutions under the control of boards of secondary and intermediate education, the duration of the pass and honours courses has been extended to three years, with a university examination at the end of each year, and four new universities have been established: West Pakistan University of Engineering and Technology at Lahore; West Pakistan Agricultural University at Lyallpur; East Pakistan University of Engineering and Technology at Dacca; and East Pakistan Agricultural University at Mymensingh.

GENERAL INFORMATION

The univ. was establd. in 1921 under the Govt. of India Act XVIII of 1920, which was based on the recommendations of the Calcutta Univ. Commission presided over by Sir Michael Sadler, as a unitary, teaching and residential univ. with a constitution similar in many respects to those of mod. English univs. Following the creation in 1947 of the province of E. Bengal as part of Pakistan, the E. Bengal educnl. ordinance, 1947, was promulgated, by which the univ., without prejudice to its original character as a teaching and residential univ., was entrusted with sole authority to recognize and affiliate all educnl. instns. in E. GENERAL INFORMATION

Established in 1882, the univ. is the oldest in Pakistan and was the fourth to be established in the Indo-Pakistan sub-continent. Until 1919 the univ. confined its activities mainly to exams, the control of affiliated instns and the provision of instruct in its oriental and law colls. It has, since 1919, undertaken the maintenance of univ teaching depts. for postgrad instruct. and res and co-ordination of advanced teaching. Besides the univ. profs, readers and lectrs, sr teachers of the local colls are associated with univ teaching. The univ also maintains colls of comm, law and oriental studies, and holds classes in stats, journalism, Turkish, German, French, Russian and Spanish.

By the Panjab Univ. Act of 1954 the matric., inter., Pakistani and oriental langs. exams were transferred from the univ. to the bd. of secondary educn., Lahore.

CONSTITUTION. Until 1959, a cttee. apptd by the chancellor exercised the powers and performed the duties of the various univ. authorities provided for under the Panjab University Act of 1954. Elections to senate, the supreme body of the univ., were held in 1959 and senate and 2 other bodies, syndicate and academic council, functioned till Sept 1961 when a new ordinance was issued by the governor repealing the act of 1954, abolishing senate and providing for the constitution of syndicate, academic council, bds of studies, selection bd., cttee. for advanced studies and res, finance cttee. and planning & development cttee.

INCOME (1960-61) Total, Rs. 5,288,633 (govt. grants, 45.7 per cent., fees and other sources, 54.3 per cent.)

UNIVERSITY PRECINCT. The univ. is located in a congested area in the city and it has been decided to move to a new site outside Lahore. As a result of the efforts of the chancellor and the continued co-operation of the govt. of W. Pakistan and the central govt., it has been possible to acquire about 2300 acres of land at the new site. A master plan has been prepared for the new univ. campus. As a first phase, the univ. plans to implement a 5-yr. constructn. programme (ending May 1965) over an 800 acreage for the time being which will cost not less than 250 million rupees. The work of constructn. has begun. The project (dir. Lt-Col Shahbaz Khan, MA) will reflect the most progressive trends in higher educn. and in its archit. blend the latest scientific building techniques with Pakistan's centuries-old traditions.

LIBRARY. Univ. library, 172,235 vols plus 17,765 MSS in Persian, Arabic and Sansk., 437 periodicals. In addn., each teaching dept. has its own library.

GENERAL INFORMATION

Before the partition of Bengal in 1947 the Univ. of Dacca was purely residential and the jurisdiction of the Univ of Calcutta extended throughout Bengal. In August 1947 the Univ of Dacca assumed the responsibility of affiliating all those colls. in East Bengal which had formerly been under the jurisdiction of the Univ. of Calcutta; thus, resulted in the centralization of all higher educn. at Dacca, an immediate effect being overcrowding in degree and postgrad classes. The need for another univ was realized and the Govt chose as its location Rajshahi where the Govt Coll. founded in 1828, had a high reputation. As long ago as 1917 the Sadler commission had indicated the suitability of Rajshahi as the site for a univ in North Bengal. The univ was founded on July 1, 1953.

Rajshahi Univ. confines its activities to postgrad teaching and res., pass and hons courses in the facs of arts and sci being available in the affiliated colls. Postgrad teaching has been organized in law, Engl., econ., comm., philos., psychol., hist, Islamic hist, maths, phys, chem, geog and stats. In addition, the univ has started a sch of scis (econ, pol sci., sociol, anthropol.,

psychol.) and a sch of oriental studies (Arabic, Persian, Urdu, Sansk, Pali), there is a separate dept of Bengali lang & lit.

CONSTITUTION. On the senate are represented deans of facs, hds of depts., principals and governing bodies of all affiliated colls, and reps of the provincial legislature and all registered grads.; the government nominates 20 members. The syndicate, a smaller body responsible for day-to-day admin., is composed of the deans, 2 representatives of the principals of affiliated colls, and reps of senate incl those of registered grads, members of the syndicate *ex officio* are the dir of public instructn, East Bengal, the pres of East Bengal secondary educn. bd. and the insprectress of schs, the chancellor nominates 3 members. The academic bd is responsible for organizing courses of studies, prescribing syllabuses and conducting exams. The vice-chancellor is chairman of all these bodies.

INCOME (1959-60). Rs 1,555,103 (govt grant, 57 per cent, fees and other sources, 43 per cent.).

GENERAL INFORMATION

Although the idea of a separate univ for Sind was first broached in 1886, it was not until 1940 that the autonomous govt of Sind apptd. a cttee to go into the entire problem. The report of the Sind Univ. cttee, issued in 1941, covered the entire field of organizational and academic issues involved, but action was delayed until a regular bill for the creation of a separate univ for Sind was introduced in the Sind legislature in 1945, and became an act in 1947.

Since a separate Karachi Univ for the Karachi federal area was establd as from session 1951-52, the headquarters of the Univ. of Sind were moved from Karachi to Hyderabad in May 1951.

The univ. is affiliating, examining and teaching Undergrad. teaching is provided by the affiliated colls. and facilities for postgrad. study (incl. BA (hons) and BSc (hons) courses) and res. by the univ. itself.

GENERAL INFORMATION

The coll, originally incorporated under the Southern Rhodesia 'University Charter and Inaugural Board (Private) Act, 1952', and known as the Rhodesia Univ Coll, was established by royal charter in Feb 1955. The charter establishes a council, and an academic bd. which is in control of academic policy. The coll. is a multi-racial institution, open to all students without distinction on racial grounds. It is intended primarily to serve the higher educn. needs of the Federation of Rhodesia and Nyasaland but admits students from other territories.

Towards the capital costs of bldg and equip- ment H.M. govt has given grants totalling

£2,875,000. Private benefactions include a gift from the British S Africa Co, Rhodesian Anglo-American Ltd, and Rhodesian Selection Trust Ltd, of £200,000 for the bldg of the library and a gift of £36,000 from the Beit trustees for the constrcn of the Alfred Beit hall. The federal govt. makes a quinquennial grant towards recurrent expenditure.

The coll. has been admitted to special relation with the Univ of London. * Teaching began in 1957.

THE UNIVERSITIES OF THE UNITED KINGDOM

[Contributed by Sir James Mountford, Vice-Chancellor of the University of Liverpool]

HISTORICAL OUTLINE Diversity, rather than conformity to a pattern, is the key to an understanding of the universities of the United Kingdom. All are dedicated to the preservation and advancement of knowledge, to teaching and research, and to education for the learned professions, but in pursuit of these common purposes they exhibit great variety in their general organization, internal government, range and balance of studies, methods of instruction, and student life. The reason for this is not far to seek. The universities were founded at widely different dates, and have been influenced by and have responded in different ways to changing intellectual and social environments. Above all, they have always been autonomous bodies, evolving in their own ways, finding solutions wherever possible for their own problems, and remaining free from any attempt on the part of the state to impose uniformity on them or to subject them to a central control.

It is nevertheless possible and convenient to treat the universities as belonging to one or other of four main groups, the members of each of which have a more or less close family resemblance. These groups are: the two older English universities of Oxford and Cambridge, the four Scottish universities, the universities of London, Durham and Wales, all of which have federal constitutions, and the modern or 'civic' universities. It is possible that the institutions which are at the present time in the process of being founded will come to be regarded as belonging to a separate category (see below, p. 799).

The universities of Oxford and Cambridge originated in guilds of teachers who settled in those towns in the second half of the 12th century. The early development of Oxford is closely connected with the expulsion in 1167 of foreign-born scholars from the University of Paris, while that of Cambridge is associated with a migration of scholars from Oxford in 1209. Quite early in the history of both universities, pious benefactors founded residential colleges for teachers and students, University, Balliol and Merton colleges in Oxford date from 1249-64, and Peterhouse in Cambridge from 1284. In succeeding centuries, colleges have continued to be established right up to the present time (e.g. St. Antony's at Oxford in 1959 and Churchill College at Cambridge in 1960). There are now at Oxford 26 colleges and 5 other recognized 'halls' for men and 5 colleges

for women, at Cambridge there are 18 colleges and one other recognized 'house' for men, and for women there are 2 colleges and 2 recognized 'halls' (including New Hall founded in 1954). Most of the colleges have 300 undergraduates or less, but a few, such as Christ Church at Oxford and Trinity at Cambridge, are very considerably larger. This collegiate system has long been the outstanding characteristic of Oxford and Cambridge. Each college is a completely autonomous body so far as its property, finances and internal affairs are concerned. The university has its own separate identity and its own constitution, and it would be quite misleading to think of it as a federation of colleges or as a body which, except within strict limits, has any control over the colleges. Although at Oxford and Cambridge it is the universities themselves which alone have the right to confer degrees and determine the conditions on which they grant them and which provide the central libraries and laboratories as well as much formal instruction, the vital focus of academic life is in the colleges. It is by being a member of a college that a student becomes a member of the university, for some part of his student career he resides in his own room in his college, he dines regularly in the college hall where the head of the college presides at the high table, though regular attendance is no longer compulsory, the college chapel fosters his religious observances; the college library provides a quiet haven where he can read seriously or browse at leisure, and his studies are to a great extent guided by the senior members (generally called 'fellows') of his own college who have rooms and (if unmarried) live within the college building. A student's loyalty to his college and affection for it continue throughout later life.

The history of these two universities and of the colleges is closely interwoven with the broad pattern of national development. At the Reformation, for example, they suffered confiscations of land and revenues, and in the 17th century Oxford so staunchly supported the king in the civil war that he made the town his headquarters. Through the centuries many of the leading figures in statesmanship, the law, the church and literature as well as in scholarship, were trained in one or other of these two universities, and the portraits of notable men which adorn the dining-halls and common-rooms of the colleges of which they were once members are an epitome of the annals of the nation.

The mediæval curriculum, based on the seven liberal arts (the *trivium*—grammar, logic and rhetoric—and the *quadrivium*—arithmetic, geometry, music and astronomy) with the addition of the higher 'faculties' of theology, law and medicine, persisted up to the time of the Reformation and beyond; indeed even as late as the second half of the 18th century much of the subject matter of instruction was still aridly traditional, and formal and written examinations for degrees were not introduced (first in Cambridge) until 1772. In the 19th century, however, and particularly after 1850, widespread reforms were inaugurated as the vigour of the two universities asserted itself, religious tests for membership of the university were abolished (the last in 1871), modern subjects of study were encouraged and developed, and to the prestige deriving from antiquity of foundation there was added the intellectual and educational primacy which in many fields is accorded to Oxford and Cambridge. In the session 1959-60 there were 8893 full-time students at Oxford and 8997 at Cambridge.*

Three of the Scottish universities trace their origins to the 15th century, St Andrews being founded in 1411, Glasgow in 1451 and Aberdeen in 1494. The fourth, Edinburgh, was established by the town council in 1583. As now constituted, St Andrews incorporates three and Aberdeen two other foundations (all dating from the 15th or 16th centuries) which were at one time independent, and Queen's College, Dundee, founded in 1881, is also part of the University of St Andrews. To Glasgow there is now affiliated the Royal College of Science and Technology.

Though it was John Balliol, father of a king of Scotland, who founded one of the oldest colleges in Oxford, the idea of colleges where senior and junior members live together communally did not take firm root north of the border, and apart from St Andrews, where the newer type of halls of residence has been specially fostered within the last half-century, a long tradition within the Scottish universities has favoured the independence of the student in the matter of living accommodation. As in England the sons of Oxford and Cambridge have played a prominent part in the national life, so in Scotland the names of many who have moulded the fortunes of the northern kingdom or brought lustre to the name of Scotland in public life and in the learned professions are associated with the universities.

At this point of time it is hazardous to institute comparisons over the centuries, but it is clear that the Scottish universities in their teaching and curriculum freed themselves from the formalities of the mediæval scheme of studies rather sooner than did Oxford and Cambridge, and though the level of attainment for degrees fluctuated considerably from time to time, at no period in Scotland does the social side of university life appear to have predominated over the intellectual as it

did in the two English universities in the 17th and 18th centuries. In the session 1959-60 there were 2502 full-time students at St Andrews (including 1102 at Dundee), 5739 at Glasgow (together with 1738 at the Royal College of Science and Technology), 1937 at Aberdeen and 5636 at Edinburgh.

The University of London, now the largest in the country with 21,697 full-time students in 1959-60, was not established until the 19th century. It was in 1826 that, in part as a protest against the denominational tests still imposed at that time for entry to Oxford and Cambridge, what is now known as University College, London, was founded, and as a counter-protest King's College, London, came into being in 1829. The University of London itself was constituted by royal charter in 1836 as a body empowered to examine and confer degrees on students of approved institutions, and until 1900 its work was restricted to these functions in the exercise of which, however, it influenced and co-ordinated the work of the various other colleges of university rank which were founded from time to time in London (e.g. Bedford College for Women in 1849). From 1858 its degrees, except in medicine, were made available for students other than those in certain recognized institutions and the external degrees of the university which were then instituted still continue to provide both at home and overseas an academic award of high standing for part-time students and others who are not enrolled in a university. London, too, in 1878 was the first university in the United Kingdom to admit women to its degrees. From 1945 it has had special relationships with the new university colleges founded in colonial territories under the auspices of the Inter-University Council (see pp. 801 and 961).

In 1900 and again in 1926 the university's constitution and powers were revised and it is now not only a teaching as well as an examining body, but has become a federation in which are incorporated 13 medical schools associated with hospitals, 14 non-medical colleges (called schools of the university, and including e.g. University College and King's College), together with a number of postgraduate and other institutions. Some other centres of higher education in London are also affiliated to the university, and in still others certain members of staff are recognized as teachers of the university. The six largest schools of the university are University College (with 2997 full-time students in 1959-60), Imperial College of Science and Technology (2656), King's College (2125), London School of Economics (2103), Queen Mary College (1273) and Guy's Hospital Medical School (1038).

The University of Durham was founded in 1832 largely on the initiative of the cathedral authorities. The College of Medicine in New-

castle upon Tyne, established in 1834, was linked with the university in 1852 and in 1871 the College of Physical Science (later Armstrong College) in Newcastle was founded as part of the university. The university is now organized on a federal basis in two divisions, one consisting of the Durham branch and the other of the College of Medicine and Armstrong College in Newcastle amalgamated under the name of King's College. There are, however, proposals afoot that the Newcastle division should become an independent university. From its inception the university in the city of Durham was influenced by the collegiate pattern of Oxford and Cambridge, and eight of its halls of residence, in which 65 per cent of its students live, have the status of colleges of the university, the oldest dating from 1833. In 1959-60 there were 1453 full-time students in Durham itself, and 3642 in King's College, Newcastle. With the university there are affiliated Coddington College, Barbados, West Indies, and Fourah Bay College, Freetown, Sierra Leone, West Africa.

Luke London and Durham, the University of Wales is federal. It was in 1872 that a university college was founded in Aberystwyth as the result of a movement for higher education supported, often from the most meagre resources, by all sections of the population of the principality. In 1883 a second college was established in Cardiff and a third in Bangor in 1884. The University of Wales was founded in 1893 with Aberystwyth, Cardiff and Bangor as its constituent colleges, a fourth college was established at Swansea in 1920, and in 1931 the Welsh National School of Medicine, originally an offshoot of the Cardiff college, was given the status of a school of the university. In 1959-60 there were 6159 full-time students in the university as a whole, Cardiff having 1938, Aberystwyth 1488, Swansea 1361, Bangor 1201 and the School of Medicine 171.

Even older than any of the colleges of the university of Wales is St David's College at Lampeter in Wales which was established in 1822. Its royal charter empowers it to confer bachelor's degrees in arts (BA) and theology (BD and LTh). It is entirely residential and in 1959-60 had 185 students. Its recognition by the University Grants Committee for the purpose of grant dates only from 1961 when an agreement was reached whereby the University College of Cardiff assumed (for a period envisaged as ten years) sponsorship for the academic standard of the St. David's degree of BA.

The modern or 'civic' universities of England, which collectively had 35,600 full-time students in 1959-60, gained their full status only in the present century. Their rise and development has profoundly modified the whole pattern of university education in England.

They mostly had their origin in the university colleges which, under various designations, were established in large centres of population in the second half of the 19th century. These colleges

themselves were in many instances the inheritors and successors of more loosely organized literary, scientific and cultural societies, many of which had been influenced by the extension courses and lectures provided by Oxford and Cambridge. The primary purpose underlying the establishment of these colleges was to provide centres of higher learning at a university level for the young people of the area in which they were founded. By their very nature they were not conceived as being residential on the Oxford and Cambridge pattern, the idea of halls of residence took 100 years slowly, and though the universities which have emerged from them now draw their students from all parts of the country, few provide accommodation for more than 25 per cent of their undergraduates. In some places the driving force which led to their foundation was an individual benefactor, in others the local community as a whole was inspired to provide itself with a college. The earliest of these newer institutions was Owen's College in Manchester (1851), followed by the Yorkshire College of Science in Leeds (1874), University College, Bristol (1876), Firth College, Sheffield (1879), Mason Science College in Birmingham (1880), University College, Liverpool (1881), University College, Nottingham (1881), Reading University College (1892) and Exeter University Extension College (1894). Within the 20th century Hartley University College was founded in Southampton (1902), a University College in Leicester (1918) and a University College in Hull (1927). Where there was also a local school of medicine, it generally became closely linked with the university college and so formed the nucleus of a future faculty of medicine.

Until they attained the status of full universities, these colleges prepared their students for the external degrees of the University of London. The first move was in the direction of federation. By a charter of 1880 the Victoria University was founded with a federal constitution and Owen's College, Manchester, was made the first constituent college, to be joined subsequently by University College, Liverpool (1884), and the Yorkshire College, Leeds (1887). In 1900, however, Mason College in Birmingham obtained its own charter as a university, and any trend towards federation was abruptly halted. Liverpool obtained its own charter in 1903, and Leeds in 1904, leaving the title of Victoria University in the sole possession of Manchester. Sheffield was granted a charter in 1905 and Bristol in 1909. The other university colleges had longer to wait, and apart from Reading, which obtained full status in 1926, no other university colleges were elevated to full university status until after the end of the second world war. There then followed in quick succession Nottingham (1948), Southampton (1952), Hull (1954), Exeter (1955) and Leicester (1957). In 1959-60 Manchester had 4781 full-time students, together with 1733 in the affiliated Manchester College of Science and Technology; Leeds had 4716, Birmingham 4160, Liverpool 3846 and Bristol 3236, Sheffield had 2852 and

Nottingham 2449, Hull, Southampton and Reading had 1586, 1568 and 1480 respectively, Exeter reached 1282 and Leicester 1195

With the civic universities we can include the Queen's University of Belfast. It was founded by royal charter as Queen's College in 1845, and, together with colleges in Cork and Galway, became part of a federal Queen's University in 1850. In 1880 the title of the university was changed to the Royal University of Ireland, and in 1908 a fundamental reorganization led to the establishment in what is now Eire of a National University of Ireland consisting of University College, Dublin, and the colleges in Cork and Galway, and to the conferring of full and separate university status on the college in Belfast under its present title. The income of the Queen's University is now largely derived from the government of Northern Ireland, which since 1945 has relied on the advice given by the University Grants Committee. The number of full-time students in the university is in excess of 3000 (For the University of Dublin (Trinity College) see Appendix I)

The University College of North Staffordshire was founded in 1949 at Keele Hall near Newcastle-under-Lyme, largely on the initiative of the late Lord Lindsay of Birker, master of Balliol College. It is exceptional in several respects: the broad aim of its curriculum is to provide an integrated course of study in the humanities, the social sciences and the natural sciences, though not yet of full university status it is nevertheless empowered to confer the degree of BA, and major academic matters are at present (and pending the grant of a charter) controlled by a board, the majority of whose members are representatives of the universities of Oxford, Manchester and Birmingham. It is a self-contained and entirely residential academic community and in 1959-60 had 732 students.

The youngest member for the time being of the university family is the University of Sussex at Brighton which was formally constituted as a university college in 1959 and was accorded full university status by royal charter in 1961. It owes its origin to a scheme formulated locally, in support of which the University Grants Committee agreed to make grants for capital expenditure and maintenance. Sufficient progress has been made with the recruitment of staff for a small number of students in arts to be admitted in October 1961 and a full entry of 300-400 in arts and science in October 1962. To begin with, students will be accommodated in lodgings in Brighton itself. The new university will grant its own degrees of BA and BSc and standards will be guaranteed by an academic advisory committee of five or six outside persons of recognized standing. A distinctive feature of the curriculum in arts will be the grouping of subjects under the headings English studies, European studies and social studies.

Approval has also been given for the foundation of six other universities; but it is convenient to

make fuller mention of these in connexion with the problems of expansion (see p. 799)

It was only belatedly that women achieved full status within the universities. Although Bedford College for Women was established in London in 1849, it was not until 1878 that the University of London led the way for other universities by admitting women to degrees. At Oxford, Lady Margaret Hall was founded in 1878, Somerville in 1879, St. Hugh's in 1886, St. Hilda's in 1893 and St. Anne's (formerly the Society of Oxford Home-Students, established in 1879) in 1952. Of the Cambridge colleges, Girton originated at Hitchin in 1869 and was removed to the near neighbourhood of Cambridge in 1873. Newnham was founded in 1871. Oxford admitted women to examinations in 1884, to degrees and full membership in 1920 and to university teaching posts in 1927. Cambridge admitted women informally to tripos examinations in 1872 and to 'titles of degrees' in 1923, in 1926 women were declared eligible for university teaching posts and therefore for membership of boards of faculties, but not until 1948 were they admitted to actual degrees and full membership of the university. Women have been admitted to the universities of Scotland since 1892, to Durham since 1896 and to all the modern civic universities from their foundation.

UNIVERSITY CONSTITUTIONS All the universities of the United Kingdom exercise their rights and functions in virtue of royal charters, which in the case of the older English and Scottish universities superseded the earlier papal bulls which authorized their foundation. Supplementary to the charter of each university, and in conformity with it, are statutes (in Scotland, ordinances) which are approved by the sovereign in council. A charter defines the powers, privileges and constitution of the university in broad general outline, the statutes, which within the framework of the charter can be amended on the initiative of the university subject to the approval of the privy council, provide for the more important and permanent constitutional details which need to be clearly set forth. Subsidiary to the charter and statutes, there are ordinances, decrees, graces and regulations which the university itself finds it convenient to promulgate from time to time for the orderly conduct of its affairs, and it is under these headings that, for example, the particular requirements for entrance and for the award of degrees are laid down.

Each university has as its official head a chancellor, a person distinguished in rank, in public service or in scholarship, who is elected for life by one of the statutory bodies of the university. Though the office is in the main honorific, the chancellor normally presides at the largely formal meetings of the supreme governing body of the university and at congregations where he confers degrees. Many universities provide for the election of one or more pro-chancellors for a limited period of years who act for the chancellor in

his absence, except in the matter of conferring degrees, which then becomes a function of the vice-chancellor. In the four Scottish universities, in addition to the chancellor, there is also a rector elected for a period of three years by the matriculated students for the time being; he may be a person of great distinction, a popular figure, or a transient notoriety, he is *ex-officio* president of the university court, though in most instances he does not exercise this right, he also appoints to the court an assessor who may in fact act for a succession of rectors. In most universities the chief academic and administrative officer is the vice-chancellor, who holds a permanent appointment (except in Oxford, Cambridge, London, Durham and Wales, where the tenure is for two or three years), in Scotland the official title is principal, though the holder of the office is usually nominated as vice-chancellor by the chancellor, in London there is also a permanent officer with the title of principal who shares administrative and academic duties with the vice-chancellor. The chief executive functions are in the hands of the registrar or secretary, who prepares the official business for the university bodies, keeps the university records and ensures the carrying out of official enactments. At both Oxford and Cambridge there are two proctors appointed annually from amongst the fellows of colleges whose primary functions are the care of undergraduate discipline but who are also *ex-officio* members of certain university bodies.

The academic side of university government is based on faculties each of which is concerned with the affairs of a group of related studies, and for the minor details a faculty is often advised by boards of studies. The number of faculties varies from one university to another, as to some extent does the grouping of subjects within faculties of the same name in different universities. The work of the faculties is co-ordinated and approval given to their recommendations by some higher academic body, which in the majority of universities is called the 'senate'. The conduct of financial affairs is very generally entrusted by charter or statute to a university body for which the commonest name is the 'council'. Ultimate authority within the university is, in most instances, vested in a supreme governing body for which 'court' is the most usual name.

When we turn to the individual universities or groups of universities we find not only that there are many confusing divergences of nomenclature but that within the broad pattern outlined above the precise distribution of function as between the various bodies is far from being identical. Furthermore, very important distinctions can be drawn according to the size and composition of the university bodies and the powers and influence within the university constitution which is exercised by the academic staff, by the graduates of the university or by lay members nominated and appointed from outside the university.

At Oxford and Cambridge the government of the university is entirely in the hands of members

of the university and there is no representation of any outside authority on any of the statutory bodies. At Oxford the chief legislative functions are in the control of the 'congregation', a very large body comprising the resident teachers and administrators in the university, every measure submitted to it, however, has to be initiated by the 'hebdomadical council', a smaller body of between twenty and thirty members elected from within the university, which digests the great volume of business coming from the general board of the faculties. Financial administration, though not financial policy, is entrusted to the 'curators of the chest', an elected body of twelve academic persons, who must be consulted by the hebdomadical council when finance is involved in its proposals. When a statute is passed by congregation by less than a two-thirds majority it must be submitted to 'convocation', a body to which belong masters of arts and holders of higher degrees who have kept their names on their college books and paid their dues. Convocation, however, has only a suspensory veto and that for a limited time. Its other functions are to elect the chancellor and to approve honorary and official degrees. In view of the fact that most of its members reside far from Oxford, it is only rarely and only on the most controversial of issues that more than a fraction of its members assemble.

At Cambridge the pattern is very similar to that at Oxford. The chief legislative body is called 'regent house', to which belong the teachers and administrators resident in the university. The much smaller initiating and executive body which sifts the proposals of the general board of the faculties is called the 'council of the senate', it consists of the chancellor and vice-chancellor together with sixteen resident graduates elected by regent house. Corresponding to convocation at Oxford there is the senate, consisting of bachelors of divinity, masters of arts and doctors; apart from some formal duties, it elects the chancellor and is a court of appeal in certain cases from decisions of regent house. Financial affairs are in the hands of a financial board comprised of a small number of academic persons elected or appointed by the other university bodies.

In quite sharp contrast to the self-contained form of university government at Oxford and Cambridge are the constitutions of the modern 'civic' universities. At Oxford and Cambridge the government of the university has in essence evolved from the closed corporations or guilds of teachers and students. In the modern universities the pattern was determined by other considerations, not the least of which was the large spread of interested bodies which were concerned in their foundation and development. Here the three major bodies are the court, the council and the senate. The court is the supreme governing authority; it is a large body, often between 300 and 400 in number, containing not only the professors and representatives of the graduates of the university and heads of schools, but persons nominated by other universities, by local authorities

and educational organizations within the university area, by religious denominations, and by learned societies. It meets annually to receive the financial accounts and other reports on the work of the university and to appoint certain university officers, it may also meet specially for other purposes, and in most cases it is the body which elects the chancellor, and in a few cases appoints the vice-chancellor. The council, generally containing between 30 and 40 persons, is the body which administers the finances of the university, it confirms the recommendations of senate for academic appointments, usually but not invariably its formal approval is necessary for academic regulations proposed by senate, and in most universities, generally in consultation with the senate, it appoints the vice-chancellor. The largest single element in its composition consists of members appointed by the court, a restricted number is nominated by senate or faculties from amongst the professoriate and other teaching staff, and some are nominated by local authorities, the chancellor and vice-chancellor are *ex-officio* members. The council is thus not a predominantly academic body, though some or many of its lay members may in fact be graduates of a university. Though it has wide powers which could be used to thwart the considered advice and recommendations of the senate, it refrains in practice from interfering in matters of purely academic policy, and in academic appointments, and it is generally agreed that the worldly wisdom and experience of affairs collectively possessed by the council has in many ways brought very considerable advantages to the newer universities. The senate, of which the vice-chancellor is *ex-officio* chairman, is, subject to the powers of council, the chief academic body, it approves and co-ordinates the work of the faculties, makes recommendations for the filling of professorships and other academic posts, and is responsible for the teaching and discipline of the undergraduates. Its membership consists of the professors of the university with the addition in most cases of a limited number of representatives of the other teaching staff, who apart from their wide representation on faculties and boards of studies do not have a share in the university government comparable to that afforded by the congregation at Oxford or regent house at Cambridge. The graduates of a modern university are members of a statutory body generally called convocation which meets annually and may discuss and express an opinion on any matter concerning the university but has no powers corresponding to those of the convocation at Oxford or the senate at Cambridge.

The government of the Scottish universities is defined by the Universities (Scotland) Acts of 1858 and 1880, modified in the case of St. Andrews by an act of 1953. The supreme governing body is the court, which, unlike the body of the same name in England, is a small but powerful one consisting of the rector, the principal, the lord provost of the city, three members nominated by the chancellor, the rector and the lord provost,

four members elected by the academic senate and four by the general council, it administers the property and finances of the university, makes academic appointments, and can review any decision of senate against which there is an appeal. In St. Andrews the court is of the same general pattern but consists of 21 persons. The 'senatus academicus', which has responsibility for instruction and discipline, and has the sole power of granting degrees, consists of the professors of the university together with a limited number of other members of the teaching staff, its *ex-officio* chairman is the principal, who is appointed by the crown except at Edinburgh, where his appointment (like that of a small number of professors) is in the hands of a special body of curators of patronage. The general council, which consists of the chancellor, the members of the court, the professors, the graduates, and readers and lecturers of one year's standing, meets twice annually and may make representations to the court on any matter affecting the university, it elects the chancellor and appoints its own four representatives to the court.

The underlying principle of the constitution of the federal universities of London, Durham and Wales is that in academic and financial matters which concern the whole university the central authority has control, leaving the constituent colleges and institutions to manage all other matters for themselves. In London the court, which has 17 members including representatives of the senate, persons appointed by the crown and persons nominated by the London County Council, controls the finances, it is the body which applies to the University Grants Committee, local authorities and other public bodies for grants and distributes them to the constituent schools and institutes of the university. The senate is the supreme governing and executive body in academic matters, and appoints, in consultation with the school concerned, the professors, readers and all but the more junior members of the teaching staff. Its fifty or so members include representatives of the constituent schools, of the faculties and of the graduates, amongst its important standing committees are the academic council and the collegiate council. Convocation, which consists of the graduates who have paid a prescribed fee, elects 17 members to the senate, and may discuss and express its opinion on any university matters, it is a point of significance that its elected chairman is *ex officio* a member of the court and of the senate. Each of the constituent schools of the university has its own internal form of government, consisting in general of a governing body with lay representation, an academic board composed from members of the teaching staff and a finance committee.

The governing bodies of the University of Durham are a court of about 30 members, the senate, boards of faculties and convocation, all of which have functions closely similar to the corresponding bodies in London. In the composition of these bodies the two divisions of the university

at Durham and Newcastle have appropriate representation and the court contains a number of lay members. The warden of the Durham Colleges and the rector of King's College, Newcastle, alternately act for periods of two years each as vice-chancellor. For its internal affairs each division is governed by a council and an academic board.

The University of Wales is governed centrally by a large court of over 250 members, including representatives of local authorities and public bodies in Wales and of the graduates of the university. Its finances are controlled by a council of about 20 members, on which in addition to the vice-chancellor and heads of the constituent colleges there are members appointed by the court and by local authorities. Academic matters are in the hands of an academic board consisting of representatives of the faculties in the constituent colleges. The guild of graduates is constituted similarly to the convocation of the modern universities, and has the same right of expressing its opinion on university matters. Each of the constituent colleges has its own board of governors, council and senate for the conduct of its internal affairs. The principals of the four constituent university colleges act in rotation as vice-chancellor, each for a period of two years.

RELATIONSHIP TO GOVERNMENT The universities of the United Kingdom are independent self-governing bodies which do not come within the jurisdiction or control of any ministry. It is from royal charters that they derive their rights and privileges; and any amendment of their charters or statutes is made by the crown acting through the privy council on the application of the universities themselves. It is true that, from time to time, royal commissions have been appointed and acts of parliament passed to deal with situations which the universities themselves for one reason or another were unable to resolve such, for example, are the Oxford and Cambridge University Acts of 1854, 1856 and 1877, the Durham University Acts of 1861 and 1935, the London University Acts of 1898 and 1926 and the St Andrews University Act of 1953; but the initiative in setting these exceptional procedures in motion has generally come from within the universities themselves and they have always been adopted with the co-operation or at least the concurrence of the universities concerned. Furthermore, whatever changes may thereby have been effected in the constitution or structure of a single university, the essential autonomy of universities both individually and collectively has invariably been preserved. They alone decide what degrees they shall award and the conditions on which they shall grant them; they alone decide what students they shall admit and what professors and other academic staff they shall appoint; they can hold property and they have unfettered discretion in the use of their own funds.

This freedom of the universities from any form of governmental direction is all the more noteworthy when viewed against the background of

financial assistance which is now given to universities by the Treasury. Until the end of the first world war, such grants as were made to universities from governmental sources were sporadic and inconsiderable in amount. Universities relied for most of their income on endowments and private donations, on the fees paid by their students, and in many cases on grants from local authorities. In July 1919, however, when the financial stability of universities was causing great anxiety, the Treasury established a standing committee with the title of 'The University Grants Committee' which had the following terms of reference: 'To enquire into the financial needs of university education in the United Kingdom, and to advise the government as to the application of any grants that may be made by parliament towards meeting them'. For the session 1919-20 the total of the grants made available to the new committee for distribution to the universities and the independent university colleges was £916,000, by 1929-30 the sum had risen to £1,800,000, and it increased slowly to £2,224,000 in 1939-40, by which time it represented just over one-third of the entire income of the universities. During the second world war, when the contribution of the universities to the national effort, especially on the scientific side, was of paramount importance, the maintenance of the annual Treasury grant at much the same level saved the universities from undue worry about their finances.

By 1945 it had become clear that there would be in the future a greater demand and a greater need than ever before for university education, and that consequently not only must the subvention provided by the state be increased but also the nature of the partnership which, for a quarter of a century, had been developing between the universities and the University Grants Committee should be made more explicit. In 1946, therefore, the terms of reference of the University Grants Committee were significantly revised, and with the further amendments approved in 1952 they now read as follows: 'To enquire into the financial needs of university education in Great Britain; to advise the government as to the application of any grants made by parliament towards meeting them; to collect, examine, and make available information relating to university education throughout the United Kingdom, and to assist, in consultation with the universities and other bodies concerned, the preparation and execution of such plans for the development of the universities as may from time to time be required in order to ensure that they are fully adequate to national needs'. The declared function of the University Grants Committee is no longer formally restricted to the distribution of grants, and the co-ordinated development of the universities in the post-war years has been firmly founded on the information and advice which the committee has placed at the disposal of the universities and on the continuous consultations which have taken place on matters of broad policy no less than on

details of planning. The extent to which parliamentary grants made available to the committee and so to the universities have increased in the post-war period is indicated by the following figures. Apart from grants for buildings and equipment, the amount given towards recurrent expenditure for the five-year period 1947-52 was £64,630,000; for 1952-57 it was £120,000,000, and in March 1957 the chancellor of the exchequer announced that the grants for 1957-62 would be £173,500,000, rising from £30,600,000 in 1957-58 to £39,500,000 in 1961-62. The recurrent Treasury grant in the session 1947-48 represented 55.8 per cent of the total income of universities; in 1959-60 it accounted for almost 70.5 per cent.

There are three reasons why this vast increase in the actual sums given to universities and the striking change in the proportion such sums bear to total income have not brought with them any diminution in the autonomy of the universities. In the first place, informed public opinion is convinced that universities could not do their work effectively if there were any encroachment on their freedom; secondly, there is a firmly established feeling of confidence between the universities and the government; and thirdly, the wisdom and impartiality of the University Grants Committee itself and the effectiveness of the committee's procedures in relation both to the Treasury and the universities have provided a practical solution for a situation which could have raised problems of great magnitude.

The University Grants Committee (abbreviated as U.G.C.) as now constituted has two full-time officers, a chairman (Sir Keith Murray, BSc PhD MA BLitt) and a secretary (Sir Cecil Syers, KCMG, CVO, MA), who are assisted by a small number of permanent officials. In addition to the chairman there are sixteen members of the committee who are appointed by the chancellor of the exchequer after consultation with the minister of education and the secretary of state for Scotland, are part-time and unpaid, and individually serve for a term of years only. Rather more than half of these members are university professors or other persons of high academic distinction and sound judgment who have an intimate knowledge of universities; and though they are appointed as individuals and not as representatives of particular universities or of particular fields of study, they are so selected that collectively they can assess academic needs of all kinds. The other members of the committee include a headmaster or headmistress, a local authority director of education and prominent leaders of commerce and industry. Generally at least one member of the committee is a woman. Since 1956 two eminent non-academic persons have been appointed to sit as members of the committee when academic salaries are being considered. The main committee appoints sub-committees consisting of a nucleus of its own members who sit with the appropriate experts to advise it on particular topics. There are standing sub-committees on medicine, den-

tristry, technology, agriculture and veterinary science. From time to time special sub-committees on particular topics are set up, e.g. halls of residence, university teaching methods. The offices of the committee are at 38 Belgrave Square, S.W. 1 (tel. Belgravia 4801). The committee publishes annually a statistical abstract entitled *Returns from Universities and University Colleges*, which contains a report on the activities of the committee during the previous year and deals with the various categories of students, the degrees and diplomas awarded and the staffing and finances of the individual universities. After the end of each quinquennium the committee also publishes a lengthy report entitled *University Development* which is much less statistical than the annual returns but provides an invaluable survey of the whole field of university affairs; it is here that one gets the clearest picture of the broad lines of progress, of the needs that are emerging and of the problems that still await solution.

The recurrent grants made through the University Grants Committee are based on a five-year period. A year or so before the beginning of each quinquennium members of the committee and of some of the sub-committees visit each university institution to gain by personal contact with the governing body, the professors, the non-professional staff and the students an insight into the working of the university, its achievements, its needs and its programme for development. So far from being inquisitorial, these visits are a fruitful source of mutual understanding. By a fixed date each university subsequently submits to the committee a detailed estimate of its income and expenditure for the ensuing quinquennium, and on the basis of these estimates the committee makes its own consolidated recommendation to the Treasury. When on the advice of the chancellor of the exchequer, parliament has voted the money which is judged to be needed, the committee makes an allocation to each university in England, Scotland and Wales. In the case of Oxford and Cambridge the colleges do not participate in the allocation, which is made for university purposes only; in London, Durham and Wales the central university authorities distribute the allocation made to the university amongst the constituent colleges and institutions.

It is at this point that the freedom of the universities is made particularly manifest. The assistance provided is given as a block grant for each of the five years and is not divided under sub-headings; and apart from an understanding that academic salaries shall be paid within agreed ranges, each university expends its grant alongside its other income in the way it thinks best. For their part, the universities are very conscious and jealous of the trust thus reposed in them, and no one of them would contemplate embarking on a major change of policy involving heavy future commitments without previous consultation with the committee. This quinquennial system of grants also affords a valuable element of flexibility in the conduct of university affairs, within

reasonable limits a university can plan with some confidence for five years ahead and husband its resources accordingly.

Non-recurrent grants made by the Treasury towards the cost of new buildings and their equipment, the adaptation of older structures and the acquisition of sites, are assessed on an annual basis, though the total amounts to be made available for each year are announced well in advance so that planning can proceed in an orderly fashion. The proposals made by the universities for such capital expenditure are given an order of priority by the University Grants Committee and approved within the limits of available finance. Before final approval is given, the plans for each separate building are scrutinized and commented upon by the committee's own staff of experts and panel of advisers, from time to time also, on the basis of its accumulated experience, the committee indicates what standards of accommodation for various purposes it considers reasonable in normal circumstances. In the earlier post-war years, when the resources of the universities were at a low ebb, most of the non-recurrent grants covered the whole cost of a project. More recently, as universities have in varying degrees been able to secure funds for themselves by public appeals, they have found it possible to contribute something towards the cost of new buildings from their own resources, but for the major part of such expenditure they have still to rely on Treasury aid.

Between 1947 and 1957 approximately £42,000,000 was expended by way of non-recurrent grants, for each of the calendar years 1958 and 1959 the sum of £12,000,000 was made available, and for 1960 and 1961 £15,000,000. Early in 1961 it was announced that £25,000,000 would be provided for each of the years 1962 and 1963, and that planning for 1964 and 1965 could proceed on the basis of £30,000,000 per annum.

FINANCE In the session 1959-60, which is the latest year for which complete returns are available, the total income of the universities of Great Britain amounted to £59,800,092. The chief items within this sum were interest on endowments, £1,731,106 (2.9 per cent), of which £1,039,400 was for particular purposes and £691,706 for general purposes, donations and subscriptions, £451,328 (0.7 per cent), grants from local authorities, £1,533,673 (2.6 per cent), Treasury recurrent grants, £42,140,134 (70.5 per cent), grants from other government departments, £1,029,973 (1.7 per cent), tuition, examination and other fees, £5,990,466 (10 per cent) including £231,751 from the Ministry of Education for the fees of teachers in training, payments for research, £4,730,590 (7.9 per cent), of which £2,408,613 came from government departments and £2,321,977 from other bodies, and various miscellaneous items, £2,192,822 (3.7 per cent).

For the same session, 1959-60, the total expenditure of the universities, apart from £669,066 allocated to reserves, amounted to

£58,505,072. The major items within this sum were administration, £3,996,364 (6.8 per cent), salaries and payments for superannuation of teaching staff, £25,733,361 (44 per cent), departmental and laboratory maintenance, including wages of technical staff, £12,138,268 (20.8 per cent), libraries and museums, £2,554,613 (4.3 per cent), repairs and maintenance of buildings, £2,116,022 (3.6 per cent), other maintenance costs including light and heating, £5,619,447 (9.6 per cent), capital expenditure met from income, £506,444 (0.9 per cent), general educational expenditure including examinations, publications and student amenities, £3,195,574 (5.5 per cent), and miscellaneous items, £2,644,979 (4.5 per cent).

PRE-UNIVERSITY EDUCATION All but a relatively small minority of the English and Welsh students who enter the universities have been educated up to the age of 18 or over in one or other of three types of grammar school. First there are the grammar schools maintained or assisted and controlled by local education authorities with the aid of grants from the Ministry of Education, pupils in these schools pay no fees and with rare exceptions will have had their primary education up to the age of 11 or 12 in a school maintained by a local education authority, they account for about 78 per cent of the whole grammar school population, and pupils from such schools account for about 60 per cent of the university population. Secondly, there are direct grant schools which receive aid directly from the Ministry of Education and not through a local education authority, it is a condition for receiving a grant that at least one-quarter of the pupils shall have free education and that the fees payable by the remainder shall be related to parental income, these schools are controlled by a board of governors on which local education authorities must be represented, many, but not all, of the pupils will have previously attended a local education authority primary school up to the age of 11 or 12, which is the normal age for entry to direct grant schools; the pupils in these schools account for about 12.5 per cent of the whole grammar school population, and pupils from such schools account for about 13.5 per cent of the university population. Thirdly, there are the independent schools which receive no grant from the Ministry of Education or from local education authorities but depend on their endowments and fee income, the control of these schools is vested in a self-perpetuating governing body which in some instances may include a person nominated by the Ministry of Education, apart from the holders of scholarships awarded by the school, all pupils pay whatever fees may be fixed by the governing body, the age of entry to these schools is normally 13 and most of the pupils will previously have attended a fee-paying and privately owned preparatory school, the pupils in independent schools account for about 10 per cent of the whole grammar school population, and pupils from such schools account for 18.5 per

cent. of the university population.

Separate schools for boys and for girls is the predominant pattern of grammar school education, just over 30 per cent of the local education authority schools, but less than 4 per cent of direct grant and independent schools, are attended by both sexes. The local education authority grammar schools are almost exclusively for day pupils and the number of boarding places provided in such schools throughout the country is only about 1 per cent. The direct grant schools are also mainly for day pupils, but many of them have some boarding provision for pupils whose homes are outside the school area, all told, about 9 per cent of the pupils at such schools are boarders. In the independent schools, on the other hand, 70 per cent of the pupils are boarders. Transfer from one type of grammar school to another is always possible subject to a place being available, but in practice it is quite exceptional.

The frequently used term 'public school' is not current in the official documents of the Ministry of Education. It came into use in the early 18th century to describe those grammar schools of good standing, often originating in charitable foundations for poor scholars, to which well-to-do parents were beginning to secure entrance for their sons as boarders in preference to having them educated by a tutor or in a small private school. The term is now popularly used, with social as well as educational connotations, mainly in reference to the independent boarding schools for boys, but a more precise and generally agreed description, which includes most direct grant schools, defines a public school as one which is represented on the Governing Bodies' Association or the Headmasters' Conference. There are in fact about 190 such schools and their eligibility for representation on the organizations just mentioned depends upon how free their governing bodies are from outside control, on the proportion of senior pupils in the school, and on the number of their former pupils who have gone on to universities. By analogy the term 'public school' is used, though much less frequently, in reference to girls' grammar schools of comparable standing.

The statutory age below which a pupil is not permitted to leave school is 15, but the full grammar school course extends to the age of 18 or a little over. The most important stage in the education of grammar school pupils is the VIth form, which is entered at about the age of 16 and extends over two or three years. It is here that pupils can begin to develop their own special interests, learn to some extent how to work by themselves, and prepare for entry to the universities or the professions. Generally the VIth form is organized in sections with distinctive titles, e.g. classics VIth, science VIth, modern VIth, according to the main emphasis on a particular field of study. Some form of daily religious observance is a feature of all grammar schools and some schools of all three categories are particularly associated with the Anglican, Methodist or Roman Catholic denominations. In day schools the

activities of the day begin with a brief service of morning prayers conducted by the headmaster or headmistress in the school assembly hall, schools which provide for an appreciable number of boarders have their own chapel, sometimes a building of great beauty, where services are conducted by a chaplain who is generally a full member of the staff of the school.

Public education in Scotland, exclusive of the universities, is administered centrally by a government department, the Scottish Education Department, and locally by 35 education authorities. Many of the grammar schools in Scotland, though now often assisted from public funds, are old foundations endowed by benefactors by whose names they are still known (e.g. George Watson's College in Edinburgh), the newer ones, officially designated as senior secondary schools, have been established by the local authorities. Few of the older Scottish schools have developed a boarding side to any considerable extent. Some dozen or so schools (including several wholly for boarders and outside the official system) are represented on the Headmasters' Conference and are included in the list of public schools. Apart from the older grammar schools in the large cities, most schools are co-educational.

In Northern Ireland school education is administered by the Ministry of Education for Northern Ireland and by local education authorities. An important feature of the educational system is the number of schools which are managed by religious denominations though generously assisted from public funds.

ADMISSION. In Appendix III a comprehensive and detailed account of university requirements for entry to first degree courses will be found, but something may here be said about the broad outlines. To qualify for admission to a university in order to read for a degree, a prospective student must have passed an examination or examinations which satisfy the minimum academic requirements for matriculation. At Cambridge a specific matriculation examination known as the 'previous examination' can be taken, at Oxford the corresponding examination, known as 'responsions', was held for the last time in 1960. Except for the Queen's University of Belfast, the other universities do not hold a separate matriculation examination of their own, but rely entirely upon the results of examinations conducted in England and Wales by nine examining bodies approved by the Ministry of Education for the General Certificate of Education (G.C.E.). In Scotland the Scottish Education Department awards a Scottish Certificate of Education and in Northern Ireland the Ministry of Education awards a Senior Certificate, both of these are recognized by all universities as providing evidence which can be used for purposes of matriculation. It has to be noted, however, that the General Certificate of Education, the Scottish Certificate of Education and the Senior Certificate of Northern Ireland are intended to serve a variety of purposes, of which

qualification for university entrance is only one; and it is only under specified conditions that these certificates are accepted by universities. Thus, the subjects for the General Certificate of Education are examined at three levels of attainment: the ordinary level, which is taken at about the age of 15 or 16, and the advanced and scholarship levels, which are taken two or three years later, and in general the minimum entrance requirements for universities when based on the General Certificate of Education involve the passing of five or six subjects selected from a prescribed list, two at least of which must be passed at the advanced or scholarship level. Similarly there are special conditions under which the Scottish Certificate of Education and the Senior Certificate of Northern Ireland are accepted for university entrance.

Although the minimum entrance requirements of all universities are very much the same in principle, there are many differences in detail as between universities. The Scottish Universities Entrance Board, however, defines requirements which are common to the four universities in Scotland and the Northern Universities Joint Matriculation Board (which is also an approved examining body) defines those which are common to Manchester, Liverpool, Leeds, Sheffield and Birmingham. A partially successful attempt was made in 1948 to ensure complete interavailability of minimum entrance requirements, but it cannot now be assumed that the requirements laid down by one university will automatically be accepted at other universities. While it is still true to say that in very many cases it will be found that the passing of examinations which satisfy the minimum of one university will also satisfy most other universities, it is quite essential to enquire directly from the particular university concerned whether its own minimum entrance requirements have in fact been satisfied.

The satisfying of minimum entrance requirements does not for any university carry with it the right of entry; it is a general academic prerequisite and no more. Whether a person who has satisfied these minimum requirements will be admitted depends upon a number of factors. In the first place some faculties and departments require that particular subjects shall have been included in the qualifying examinations and often that they shall have been passed at the advanced level, e.g. mathematics at the advanced level is required generally for degrees in science and engineering and Latin at the ordinary level is widely, though not universally, required for an arts degree, and these particular faculty or departmental requirements can only be ascertained with certainty by consulting the calendars and prospectuses of the individual universities. Secondly, a bare pass even at the advanced level may not be thought to justify admission if the subject concerned is intended to be one of the candidate's main fields of study; the achievement in the qualifying examination must show clear promise of success in the university course. Thirdly, even though a student may have satisfied the general

university and the particular faculty and departmental requirements, and have reached a respectable standard in the crucial subjects, the limited number of places available may introduce an element of competition between candidates, indeed, special entrance examinations of a high standard are held by the majority of Oxford and Cambridge colleges and a few London ones to enable selection to be made from amongst the applicants. Furthermore, consideration is always given to confidential reports from heads of schools, and personal interviews are very frequently arranged before a final decision is taken about admission.

For certain courses of study for a first diploma or certificate in some universities it is not necessary to have satisfied the same kind of academic requirement as is demanded for courses leading to a first degree, this is particularly so in the case of those courses in subjects such as social science which are intended to be taken by rather older persons whose formal education has not followed the normal pattern or whose personal experience gives them special claims for admission.

To be accepted for postgraduate study and research leading to a higher degree, a candidate must in general possess a first degree which is relevant to his proposed field of study, though that degree need not in most cases have been taken in the same university. Whether an applicant is admitted to postgraduate study and research is a matter which in the first instance is within the control of the head of department concerned, but registration as a candidate for a higher degree has to be approved by the faculty or a special board of the university. The number of qualified applicants who can be accepted depends in departments of pure and applied science upon the accommodation available in research laboratories and in all departments on the number of members of staff who are free to supervise research.

Overseas students who wish to read for a first degree or a first diploma must submit evidence of academic attainments comparable to those demanded of British students and satisfy the university that their knowledge of English is adequate for the purposes of the course they wish to pursue, any documents they submit should be properly attested by a responsible educational authority in their own country. In the case of some countries, it is also advisable that applications should be submitted through the official representative in the United Kingdom of the country concerned. Each application is judged on its individual merits, but the number of vacancies is limited and, in general, overseas students are recommended whenever possible to take their first degree in their own country. Those who wish to pursue a course leading to a higher degree or diploma must submit evidence of their attainments to the satisfaction of the head of the department concerned and of the university.

STRUCTURE OF DEGREE AND DIPLOMA COURSES
In the interests of clarity it is essential to refer to the degrees awarded by United Kingdom univer-

sities as being either first degrees or higher degrees. In the actual nomenclature of degrees there is a very confusing diversity: for example, BA and BSc are the titles of first degrees in arts and science respectively in most universities, but at Oxford and Cambridge the BA is awarded to students of both arts and science; in Scotland the first arts degree is called MA, at Oxford the BSc is a higher degree, but at Cambridge the title BSc is not used at all, and at Oxford and Cambridge the MA is granted without any further course of study or examination to any BA of the university after a specified number of years and on payment of a fee. The courses of study for a first degree demand full-time attendance at the university except in the case of evening students at Birkbeck College of the University of London and candidates for the external degrees of London. The period of study for a first degree in arts and science is a minimum of three years and may be four, in other faculties and for some professional courses, such as architecture in the faculty of arts, the period is generally longer and in the case of medicine and dentistry may be as much as six years. Exemption from first-year lectures and examinations is sometimes available on the basis of passes at the advanced level of the General Certificate of Education; but no first degree is awarded until the completion of three years of university study. It is only very exceptionally that a student transfers from one university to another during his course of study for a first degree, the credit allowed to him for courses previously taken depends upon the regulations of the university to which he transfers and upon the individual case, and in no circumstances, not even if he already has a first degree of another university, can he graduate without at least two years' full-time attendance at the university to which he goes.

In the faculties of arts and science the curricula and the first degrees awarded are of two main kinds: those which involve the study of a number of subjects not all of which need be pursued for the whole three years and in none of which is very highly specialized work required; and those which concentrate on a single field of study and its immediate ancillaries. The first of these types of degree is designated as *pass* or *ordinary*, and success depends upon the passing of the various subjects separately at the appropriate standards, failure in a subject can be retrieved by re-examination or by the substitution of another approved subject. The second type is called *honours* and is further particularized by mention of the field of specialization, e.g. honours in classics, history, natural science, physics, etc.; success depends upon the candidate's performance in a comprehensive final examination (known at Oxford as 'schools' and at Cambridge as the 'trips') which can be attempted on only one occasion, successful candidates are normally awarded their degree as class I, II or III, the second class often being divided into two sections, the unsuccessful are either awarded a pass degree or allowed some

credit towards the requirements for such a degree. In some universities the two types of degree are known as *general* and *special* respectively, and it is there possible for distinction or honours to be awarded for exceptional merit in the examination for the general degree. Since the curricula for the two kinds of degree in arts or science diverge considerably, it is usual for a student to be admitted to an honours or special course immediately on entry to the university or possibly at the end of his first year. In other faculties the courses of study for the ordinary and honours degrees are not so distinctive in the earlier years at least, and in some instances, e.g. medicine, there is indeed a final examination common to all students on the results of which a candidate of unusual merit may be awarded his degree with honours.

The courses for first diplomas and certificates are relatively simple in structure. Usually there is a closely defined curriculum covering one or two years which is followed by all candidates for a given award, though exemptions may be granted from particular parts of the course on the basis of previous attainments or experience. Most courses demand full-time attendance but some, e.g. in public administration, are part-time and extend over a longer period.

Higher degrees can be divided into three categories: *masterships*, the doctorate in philosophy (PhD or DPhil), and the senior doctorates. Candidates for a master's degree (e.g. MA, MSc, etc., with which should be classed the BPhil and BLitt of some universities) are normally required to possess a first degree, though it need not have been gained in the same university. Work for the degree most generally involves full-time attendance at the university for two years, it may involve the taking of special courses of study and seminars, it almost always involves the writing under supervision of a thesis or dissertation on some particular topic within the student's special field of interest, a written examination is sometimes required in lieu of or in addition to a dissertation, and an oral examination is rarely dispensed with. It is possible, however, in many universities for a mastership to be awarded on the basis of a thesis to a person who has taken a first degree at that university (but not elsewhere) without further full-time attendance. The degree of PhD, which is common to all faculties and for which a first degree (or an approved equivalent, e.g. a diploma in technology awarded by the National Council for Technological Awards) is a prerequisite, is awarded after two or, more frequently, three years' full-time work within the university; though attendance at seminars may be required, the main test is the writing of a thesis which makes an original contribution to knowledge, an oral examination is very commonly required. In many universities members of the teaching staff are eligible for the degree of PhD under special conditions. The senior doctorates, which are designated on a faculty basis (e.g. DLitt, DSc, MD, etc.) and for which the possession of at least a master's degree is a normal prerequisite, are awarded to more

mature and established workers solely on the basis of published contributions to knowledge.

Higher diplomas, *e.g.* in various branches of technology, in public health, etc., may be awarded, according to the subject and the university, either on a full-time or less frequently on a part-time basis. The possession of a first degree or first diploma is the normal prerequisite, attendance at formal courses of instruction with the passing of a written examination is the basis of the award, and a dissertation is not required. A certificate or diploma in education is awarded after one year of full-time study to graduates who are training to become teachers.

Except at Oxford and Cambridge where the examining is mainly done by panels of teachers drawn from the various colleges, one or more external examiners for each subject are appointed from the staffs of other universities to take part in the assessment of the work of candidates for a first degree or first diploma. This system helps to ensure a uniformity of standards throughout the universities. For all higher degrees a small panel of two or three persons, one at least of whom is from another university, is appointed to adjudicate on the dissertation or published work and, when necessary, to conduct an oral examination.

STAFF The normal grades of the teaching staff are professor, reader, senior lecturer, lecturer, assistant lecturer and demonstrator. In most university departments there is only one professor who is responsible for the organization of the instruction given in his subject and, where laboratories are involved, for the requisitioning and proper use of materials and equipment. In some of the pure and applied sciences the various branches are organized as separate departments, *e.g.* physical chemistry alongside of organic chemistry. When there are two or more professors in a single department, one of them is either permanently or for a period in administrative charge. The titles 'associate professor' and 'assistant professor' have never had any wide currency in the United Kingdom and are now very exceptional. Until the end of the second world war, the title of reader was mostly conferred on persons in independent charge of a subject or branch of a subject for which a professorship and separate department were not yet provided or alternatively on persons who had quite unusual distinction in a particular field of work, and in status the reader had precedence of a senior lecturer. Since 1945, however, in some universities the title of reader is awarded more readily than formerly in recognition of merit in research and the distinction between the two grades in status and salary is becoming less significant. At present the number of readerships and senior lectureships combined is restricted, in accordance with an understanding reached with the University Grants Committee, to about 22 per cent of the total full-time non-professional teaching staff. Lectureships represent the career grade in university teaching and

the maximum salary (now £1850) is reached at about age 40-45; but a lecturer has a reasonable prospect of securing promotion to a higher post in his own or another university. The post of assistant lecturer is usually held on an annual basis for three years and is regarded as being either temporary, and so not renewable after three years, or probationary, in which case promotion to a lectureship follows. Demonstratorships in most universities are temporary posts normally held for only one or two years. Most of the teaching work of the universities is done by full-time members of staff, of whom in 1959-60 there were in England, Scotland and Wales 1555 professors, 850 readers and independent lecturers, 1372 senior lecturers, 5578 lecturers, 1338 assistant lecturers and demonstrators and 1105 persons in other subsidiary categories, these figures, however, exclude 712 lecturers, assistant lecturers and demonstrators at Cambridge, and 419 at Oxford, who combine university with college work, they also exclude those college tutors who hold no university appointment. In some special departments and faculties, notably in medicine, an appreciable amount of instruction is given by part-time members of staff. It is impossible, therefore, to give precise figures for staff-student ratios, but, taking full-time staff alone, the proportion varies from 1:7.5 to 1:10.5 according to the special circumstances of an individual university or faculty.

At Oxford and Cambridge the traditional method of undergraduate instruction is the tutorial, a device which demands a high ratio of staff to students and imposes a heavy burden on the teacher. Every junior member of a college is placed by the college in the care of a senior member of the university who guides his studies, suggests to him what books he should read, what lectures if any he should attend, sets him essays and other written work, and week by week discusses with him, either individually or in small groups, what he has read and the work he has written. At the end of a term or vacation a more rigorous but still informal probing by the college may take place into a student's progress. Both the university and the colleges provide an abundance of formal lectures open to all members of the university, but attendance at them is not made compulsory by any regulation. In the case of science subjects involving experimental work in laboratories the instruction is inevitably more formalized than in the humanities.

In the other universities in general the basis of undergraduate instruction is the formal lecture, reasonable attendance at which is compulsory, in some of the more popular subjects in the larger universities a class of a hundred or more is not abnormal. The amount of written work which can be demanded from the students and dealt with by the staff differs greatly from subject to subject. The virtues of a more intimate form of instruction have, however, long been recognized, and wherever the ratio of staff to students permits, small tutorial groups to supplement or replace

formal lectures have become a normal part of the programme of instruction. Written 'terminal' examinations are usually conducted by the departments at least once within the session and there is normally a statutory university examination in some part of the student's curriculum at the end of each session.

Candidates for postgraduate degrees involving research are in all universities assigned to the care of a supervisor who helps in the selection of a topic within the candidate's chosen field and places his experience as an original investigator at the disposal of the student. The departmental seminar for the reading and discussion of papers written by the students and for surveys of current progress in the subject is often an important part of the postgraduate training.

It is frequently stated that about a third of a university teacher's time is or should be available for his own researches. During term the pressure of teaching duties and, in the case of the more senior members of the staff, of administrative and committee work, often make it difficult to achieve anything like this standard, and investigations which demand continuous application have often to be reserved for vacations. Conditions differ, however, very greatly not only from university to university but from one department to another. In this connexion it may be noted that there is no established practice of granting sabbatical leave, but members of staff are fairly frequently released for a term or their teaching load is reduced in order to enable them to finish a particular piece of original work or widen their experience.

The salaries of the academic staffs of universities are based on scales or ranges approved for purposes of grant by the Treasury after consideration of recommendations of the University Grants Committee to whom representations are made from time to time by the universities and the Association of University Teachers. At present in faculties other than medicine a professorial salary is within the range of £2600 to £3600, that of readers and senior lecturers may have a maximum of £2425 or in special circumstances £2525, that of a lecturer rises from £1050 by annual increments of £50 and later of £75 to £1850 (extended to £2000 for a limited number of posts), and that of an assistant lecturer rises from £800 by £50 annually to £950. For posts in London an additional allowance of between £60 and £100 is paid, according to grade. The salaries of clinical professors rise to £3900. The salaries of medically qualified non-professional teachers in the faculties of medicine are higher than those in other faculties and there is a uniform annual increment of £100.

Superannuation for members of the academic and senior administrative staffs of all United Kingdom universities has, since 1919, been dealt with under the Federated Superannuation System for Universities (F.S.S.U.). The institution contributes a sum equivalent to 10 per cent. of the member's salary, the member himself contributing 5 per cent. The combined sums are paid as premiums on insurance policies of various types

(endowment assurances, deferred annuities, etc.). To meet his individual requirements, the member has the choice between a number of policies issued by an approved list of insurance companies. If he moves to another institution within the scheme he takes his accrued rights with him. The policies mature in the member's 60th year and the capital and further contributions then accumulate interest until the actual date of retirement (normally at 65 in most universities in England and Wales, but at 67 in Oxford, Cambridge, Liverpool, London and Manchester and, for professors, at 70 in the Scottish universities). The capital available on retirement is normally used for the purchase of an annuity of a kind appropriate to the circumstances of the member, though it is within the discretion of the institution to agree to other arrangements. It is inherent in the scheme that the amount of the annuity is directly related to the totality of a member's emoluments during his whole career as a university teacher, and bears no necessary relationship to his salary at retirement. To alleviate the hardships which arise under F.S.S.U. in a period when costs of living have been rising, the Treasury approved some years ago a scheme for a modest supplementation of F.S.S.U. annuities. In 1960 a new scheme was introduced whereby the supplementation is directly related to years of service and to the average salary received during the three years immediately preceding retirement.

When a person joins a university staff from some other service, any cash he is able to withdraw from another pension scheme may be accepted as a single premium under the F.S.S.U. towards an eventual annuity.

No generally applicable statement can be made about the method of filling vacant academic posts in universities. In the case of professorships at Oxford and Cambridge there is usually a formal announcement that a chair is vacant, and persons interested are invited to forward their names to the vice-chancellor for consideration by a duly constituted board of electors who need not confine their attention to the names submitted and whose decision is final. Elsewhere a variety of circumstances may determine whether a chair shall be advertised or filled on the basis of private enquiries; and a mainly or wholly academic *ad hoc* committee, variously constituted in different universities, makes a recommendation to be confirmed by the appropriate higher bodies. A small number of chairs (mostly in the older subjects) at Oxford and Cambridge and in the Scottish universities, known as regius professorships, are within the patronage of the crown, but it is believed that academic advice is normally sought before appointments are made to them. In all universities many chairs are specially associated with the names of benefactors, etc. (e.g. the Wykeham professorship of logic at Oxford). Many posts as reader, senior lecturer and lecturer are filled by promotion from within the university, but a considerable number are publicly advertised and appointments are made on the recommendation of a committee of the faculty concerned.

The majority of posts as assistant lecturer are advertised. When an important post is advertised many universities take steps to ensure that the announcement is made not only at home but overseas. In no U.K. university is there any restriction as regards nationality, religious belief or political opinion to debar candidates from appointment. The overwhelming majority of university teachers have in fact taken their first or a higher degree in a U.K. university, but apart from Oxford and Cambridge, each university has on its staff a substantial number, and generally an appreciable majority, of teachers who have graduated at some other university in the U.K.

STUDENTS In 1959-60* there were 104,009 full-time students in the universities of the United Kingdom (apart from Belfast), of these 83,083 were reading for a first degree and 3605 for a first diploma, 16,649 were engaged in research or other advanced work (including 3585 who were taking the postgraduate course for a teacher's diploma), and 672 were attending courses not leading to a degree or diploma. Of these full-time students, 6443 came from overseas Commonwealth countries and 4208 from foreign countries. The number of men students was 79,037 and of women 24,972. The over-all percentage of those in arts faculties was 43, in science and technology 39, in medicine and dentistry 14.8, but for the students engaged in research and advanced work (apart from teachers in training) the percentages were 35.1, 53.2 and 8.5 respectively.

The number of part-time students in 1959-60 was 15,932 of whom 2545 (mostly evening students) were reading for a first degree or first diploma, 5637 were engaged in research or advanced work and 7750 were 'occasional' students taking intra-mural courses (including 'refresher' courses) not leading to a degree. Of the part-time students 2400 came from overseas Commonwealth countries and 2068 from foreign countries. Of the 5637 part-time advanced students 38.5 per cent were in arts, 14.3 per cent in science and technology and 46.3 per cent in medicine and dentistry.

The number of full-time students residing in colleges or halls of residence in 1959-60 was 27 per cent of the total, in lodgings 50.3 per cent and at home 22.7 per cent, of the men 22.9 per cent were in colleges or halls, 54.1 per cent in lodgings and 23 per cent at home, the percentages for women were 40.1 in colleges and halls, 38.3 in lodgings and 21.6 at home. These figures, however, need further interpretation. At Oxford and Cambridge (where the number of home students is quite insignificant) all lodgings used by students who cannot be accommodated within their college are approved by the authorities, and students who live in them dine regularly in their college, participate fully in the life of the

college and are under the academic supervision of the college. At Oxford 49.4 per cent live in college and 50.6 outside, at Cambridge the percentages are 54.8 and 45.2. Apart from Oxford and Cambridge (and Durham) the provision which universities themselves make for the accommodation of their students is by way of halls of residence which are in the charge of a resident warden appointed by the university, the warden is in most cases a full-time or part-time member of the academic staff of the university and is assisted in hall by a small number of resident tutors drawn from the staff. The students who live in hall take their main meals there, use the common-room and library facilities provided and enjoy the full benefits of a corporate life in a homogeneous community with an ethos of its own. There are two major respects, however, in which halls differ from the colleges of the older universities: though the warden and tutors take a keen interest in the personal welfare of the students in residence, it is no part of their function to supervise their studies, and when a student ceases to reside in hall he has few, if any, continuing rights or obligations, and, except in the most favourable circumstances, his connexion with it ceases, even though he may still be a student within the university. The provision of halls varies very greatly. e.g. in the Duiham Colleges 63.5 per cent of all the students are in halls, at Reading 55.2, at Bristol 26.5, in Wales 26 (Aberystwyth 40, Cardiff 15.3), at Newcastle 21.6, in London 18.3, at Leeds, Liverpool, Manchester and Sheffield 14.5 to 17, in Scotland 11.4 (colleges in St Andrews 52.5, Aberdeen 0.9), and at Birmingham 11.8. In a number of these universities, however, the percentage is likely to rise in the near future as new halls are completed. Outside of Oxford and Cambridge the lodgings used by women not living in hall or at home must be approved by the university; men are generally free to make their own arrangements, though lists of approved lodgings are usually available.

Social life at Oxford and Cambridge centres in the college, and within each college there are athletic, debating and other societies confined to members of the college. Almost all colleges have their own athletic grounds. There is also a great proliferation of university societies open to all members of the university who wish to join; some of them are of long standing, others exist for a brief space and are heard of no more. Apart from the athletic and boating clubs and the dramatic societies, the best known are the Union at Oxford and the Union Society at Cambridge, both of which provide for their members a good library and the usual amenities of a club, but which are even more famous for their debates at which many who later achieved eminence in public life have first made their quality known. In most other universities there is a guild of undergraduates or students' representative council, the establishment

* The latest detailed figures published by the University Grants Committee in their official *Returns* relate to 1959-60; see also 'The Year' section of each university entry below.

of which is prescribed by charter. The students themselves elect their own officers to conduct the affairs of the guild. The social activities of the guild are centred in a union building, owned by the university but managed mainly by the students themselves, in which are provided dining-rooms, cafeterias, a library for leisure reading, a hall for debates and dancing, a gymnasium, lounges and quiet rooms. Normally there is a single union for men and women; in some places student meals are provided in a refectory run by the university. Membership of the guild and the payment of the subscription to the union (at present about £6 per annum) are compulsory for full-time undergraduates. The major societies, debates and the athletic clubs are organized as part of the guild activities, and the other student societies, religious, political, literary, or departmental, hold their meetings in the union. Athletic grounds are provided by the university, but in large cities they are often some considerable distance from the union. In all universities there is an officers' training corps which is the responsibility of the army authorities and in some there is also an air squadron, membership of either of these is entirely voluntary.

Particularly since 1945 universities have developed student health services in order to ensure that a student's academic progress shall not be unnecessarily impeded through lack of medical attention, in some cases there are one or more full-time medical officers in charge of this work. The extent to which students are under an obligation to avail themselves of these services varies, but at least a general overhaul on admission and a chest X-ray are usually expected. Associated with the health services in almost all universities there is a voluntary or compulsory scheme of physical education for students. Care for other aspects of the personal welfare of students in non-residential universities is provided by some form of advisory service which ensures that a student who finds himself in some difficulty knows clearly to which member of the staff he may freely and confidently go for help and counsel. There is often a special adviser for overseas students. Most universities have at least one accommodation officer who has full charge of the lists of approved lodgings. There is also an appointments board with appropriate staff to help students to secure posts on graduation, and the good relations established between these boards and prospective employers of all kinds are of very great benefit to all concerned.

At Oxford and Cambridge the fees payable by a student include university and college dues, tuition fees and (if he lives in college) charges for rooms and meals; some colleges are more expensive than others, and living in lodgings is not necessarily cheaper than living in college. It is scarcely possible to reside at either university for the three terms each of eight weeks for much less than £350 even on the most economical basis. In the other universities the tuition fees are around £50 per session for an arts first degree course and

£60 for other faculties. Tuition fees for higher degrees average £30 per session, but £40 is charged when laboratory work is involved. In Scotland these fees are somewhat lower. The fees for first diploma courses are in general less than those for degree courses. The cost of residence in a hall for a session of thirty weeks is within the range of £140 to £160, but this sum often does not include the cost of lunches on weekdays. Reasonably good lodgings with partial board are not obtainable at much under £3 10s per week, and in some places the minimum is above this figure. Apart from clothing, travel and personal expenditures, an overseas student would be well advised to plan on the basis that the minimum cost of a university session together with vacation expenses would be between £500 and £550 according to the university he attended and the course he was taking.

A considerable measure of financial assistance is now available for university students. Until the end of the first world war a poor student in England or Wales could not hope to get to a university unless he won a competitive scholarship offered by one or other of the universities, was awarded one of the few grants which his local education authority might provide, or gained a leaving scholarship from his school, if it had any to offer. The open entrance scholarships and exhibitions founded by benefactors at Oxford and Cambridge colleges were (and still are) the hallmark of brilliant promise and correspondingly difficult to win. The other universities also had a limited number of open scholarships. In Scotland the situation was somewhat easier because of the resources of the Carnegie Foundation, which has, as one of its objects, the helping of needy students. Between the wars, however, the Ministry of Education instituted a system of state scholarships tenable at any university, and local education authorities expanded their schemes for scholarships and grants. Since 1945 the number of state scholarships and corresponding awards in Scotland have been very greatly increased, as have the local education authority awards. The Ministry of Education now supplements the value of all university open scholarships and exhibitions to that of state scholarships, and many local education authority awards are within the same range. In 1960 the Ministry awarded about 2500 state scholarships and supplemented about 1440 open university scholarships, while local authorities awarded about 17,700 scholarships or grants for university students. There is now an hierarchy of academic merit open award at Oxford or Cambridge, open award at other universities, state scholarship, local authority scholarship, local authority grant; but the actual financial reward which results is assessed in all cases according to the income of the family from which the student comes to the poorer, more, to the richer, less. For a student who holds a state scholarship at Oxford or Cambridge the maximum maintenance allowance in addition to tuition fees is now £338, at London £305 and at other universities £280,

but the rates are somewhat lower for students in lodgings and still less for those living at home; in addition, a special vacation allowance of £20 (or £30 for Oxford and Cambridge students) per annum is payable in some circumstances and provision is made for certain courses of vacation study and for study abroad.

Following upon the report in 1960 of a committee appointed by the Minister of Education and the Secretary of State for Scotland, the government has decided that state scholarships (but not mature state scholarships) should be abolished after the selections to be made in the summer of 1962, and that awards should be made available automatically to all students admitted for the first time to university first degree courses who have two G C E passes at advanced level or the equivalent. A Standing Advisory Committee on Grants to Students has been appointed by the Minister of Education and the Secretary of State for Scotland with these terms of reference: 'To consider and advise on questions arising from the system of grants to students from public funds which Ministers may refer to it'; one of its first tasks is to review the standard grants to students for maintenance, and to advise whether any changes in rates of grant should be made with effect from October 1962.

Financial support is also available for postgraduate students. In 1959-60 the universities themselves made 1100 research awards (called postgraduate studentships or fellowships) from their general funds or special endowments, the Department of Scientific and Industrial Research 1000, and the Ministry of Education 260 (in addition to extending the tenure of a number of state scholarships). Most of these awards are of the value of £300 per annum or over, and parental income is generally not taken into account. Funds donated by various research associations and by industry in support of the academic research of individual departments in universities can often be used by agreement to finance postgraduate students.

There are two important consequences of these arrangements for assisting students: first, straitened circumstances at home are no longer any serious barrier to a university education, and secondly, since the tenure of state and local education authority awards is not restricted to particular universities, students are free to go to the university of their choice if it is willing to accept them. Oxford and Cambridge can no longer be characterized as in the main the universities for the prosperous, and the civic universities no longer draw as large a proportion of their students as formerly from their immediate area. In 1959-60 the percentage of full-time students in Great Britain who were being assisted (mostly from public funds) was 82.4, at Oxford the percentage was 81.9, at Cambridge, 81.6, at London, 74.3, at the other English universities 89, in Wales 93.6 and in Scotland 73.4. It should be emphasized, however, that the maximum maintenance allowance is not awarded to

every assisted student. Exact statistics are not available, but it is estimated that under regulations in force from October 1961 about 40 per cent of university students will be receiving the maximum.

In recent years more and more students have taken paid employment for some part of the long vacation: some, *e.g.* engineers, do work which has direct relevance to their studies, but some others undertake jobs which are of little or no benefit either mentally or physically, some do the work to ease out their finances, some to secure the means for continental travel, some for the wider interest and experience they hope to gain thereby and some because of the sense of independence which the earning of money brings. The universities are alive to the dangers inherent in this trend, and, whenever possible, tutors seek to dissuade their students from unsuitable kinds of work and above all to restrict the number of weeks they devote to it at the expense of the reading they ought to do in connexion with their studies.

Since the length of first degree courses varies from three to six years it is not feasible to relate the proportion of students to national age groups in a really significant manner; it can be noted, however, that full-time students represent rather less than 1 in 500 of the whole population. By and large the universities at their present size are just about able to provide places for all applicants who can satisfy their standards for admission, though the competition for places is severe in a number of subjects.

ACADEMIC YEAR The academic year is divided into three terms of which the first (called the Michaelmas, Martinmas or autumn term) begins, so far as students are concerned, in the first week of October, the second (the Hilary, Candlemas or Lent term) in the second week of January and the third (the Easter, Trinity, Whitsun or summer term) in the second or third week of April. At Oxford and Cambridge the required period of residence is eight weeks each term, elsewhere each term extends over nine or ten weeks. The programme of undergraduate instruction at Oxford and Cambridge continues for the full length of each term, since only a part of the student body will be sitting university examinations at any one time, elsewhere most undergraduates have examinations in the second half of the third term and formal instruction comes to an end by the beginning of June. Most honours students at Oxford who have taken their final written examination in late May or early June have to present themselves for a *visa voce* examination in July, and it is only towards the end of that month that class lists are published, the Cambridge lists are made known about the middle of June, elsewhere examination results appear at the end of June. In all universities graduation ceremonies are held several times during each session, but except at the older universities of England the majority of degrees are conferred at large public ceremonies at the beginning of July.

SUMMER SCHOOLS, such as are a well-established feature of the academic year in the U.S.A., form no part of the British pattern. In a few instances and only rather sporadically special courses, e.g. in English studies for overseas students, are arranged, but whatever their content they do not count towards a United Kingdom degree or affect the number of normal terms to be kept before proceeding to such a degree. Students, however, who wish to continue their reading within the university during part of the long vacation can generally do so; and in the case of postgraduate students who need laboratory facilities arrangements are made for them to work throughout most of the summer.

EXTRA-MURAL CLASSES AND UNIVERSITY EXTENSION The concept that universities had some obligation to spread the gospel of learning widely throughout the community took really practical shape in 1873 when James Stuart, fellow of Trinity College, persuaded the University of Cambridge to organize university extension courses to be delivered up and down the country by members of the university. The educational movement thus started was also fostered by Oxford and the newer university colleges, and additional momentum was gained when in 1903 Albert Mansbridge founded the Workers' Educational Association (W.E.A.). The *Final Report* of the adult education committee of the Ministry of Reconstruction published in 1919 (and reissued in 1956 in an abridged form as *A Design for Democracy*) focused attention on the achievements up to that time and suggested many of the lines along which subsequent development has taken place.

Nearly all universities now have a department of extra-mural studies headed by a director who in a number of instances has the status of professor of adult education. The work of these departments is carried on partly by staffs of full-time tutors of whom there are about 250 in all, partly by part-time tutors (e.g. school teachers) and not least by members of other university departments. The courses, almost all of them conducted in the evenings, are arranged not only in university towns and the immediate vicinity but often in places at a considerable distance away, indeed wherever a need in adult education has to be met. Many universities have tutors resident in outlying areas, part of whose duty it is to assess and stimulate the demand for adult classes. In many of their activities the extra-mural departments work in close collaboration with the W.E.A.

Broadly speaking, three types of course have been developed: extension courses consisting of something between 3 and 18 lectures on a particular topic given by a single lecturer or by a team of lecturers; sessional classes which, generally under the guidance of a single lecturer, have weekly meetings from the end of September to the end of March; and tutorial classes each of which is planned as a three-year course and involves not only lectures but discussions and

written work. In the 1959-60 session almost 2400 extension courses and 1650 sessional classes were organized and 840 tutorial classes were in being, in all, nearly 100,000 students were enrolled. The fees charged to students are merely nominal. The courses most frequently given are in history, international affairs, government, social studies, philosophy, psychology, religion, musical history and appreciation, literature, the fine arts, and the physical and biological sciences. In recent years the departments have also organized 'refresher' courses for qualified scientists to help them to keep abreast of the newer advances.

It has hitherto been the policy of extra-mural departments and of the W.E.A. not to cater for vocational and professional qualifications or to duplicate the work of the evening classes provided by local education authorities; consequently, although written work is encouraged in the longer courses, only in a small minority of instances is any examination offered at the end of a course or any certificate awarded. There is no restriction on the membership of a course or any academic prerequisite: the sole requirement is a genuine interest in serious study, it is therefore not unusual to find the policeman, the housewife, the shop-assistant, the manual worker and the bank manager sitting side by side at an extra-mural class. A small number of scholarships are available, some of them provided by the Ministry of Education, to enable students who wish to carry their studies further to go on to universities. Mention should also be made here of the dozen or so residential adult education colleges up and down the country which provide full-time courses of a week or fortnight up to a few months' duration; with some of these colleges the extra-mural departments have a close though generally informal link.

The finances of the extra-mural work of the universities are somewhat complicated by the fact that some of the courses given qualify for a direct grant from the Ministry of Education or are assisted by local education authorities, but the proportion of the cost covered by the grants varies from case to case. When allowance is made, however, for such contributions it is estimated that the net cost met from general university funds is of the order of £250,000 per annum.

The *Universities Council for Adult Education* (hon. secretary and treasurer, W. E. Salt, OBE, MA BCom, department of adult education, University of Bristol, Bristol, 8) on which all universities are represented, publishes a brief *Annual Report* containing figures relating to the activities of extra-mural departments. The *National Institute of Adult Education (England and Wales)* has headquarters at 35 Queen Anne Street, London, W.1 (secretary, E. M. Hutchinson, MA, tel. Langham 3155). It is an independent consultative body which has a council representing universities, local education authorities and voluntary agencies. It convenes an annual conference and publishes quarterly *Adult Education* (annual subscription, 10s. 6d.).

INSTITUTES OF EDUCATION Since 1947 and arising out of the report of the McNair committee on *Teachers and Youth Leaders* (1944) most universities in England and Wales have established an institute of education to promote co-operation between the university, teacher training colleges, local education authorities and other educational agencies within the university area. The institute acts as an area training organization for the training of teachers on behalf of the Ministry of Education, conducts examinations recognized by the ministry for the teachers' professional qualification, arranges refresher and other courses, and fosters educational research. The director of the institute is a full-time university officer and often has the title and status of a professor. The committee of management of the institute includes representatives of the university, the training colleges, local authorities and practising teachers. The institute, however, has no responsibility for the control, financial or otherwise, of the individual colleges, which are maintained in the majority of cases by the local education authorities, though many are the responsibility of religious denominations. Throughout the country there are 118 colleges, with a total of 29,419 students, which provide a general course of education and pedagogical training. From 1960 the course of study in these colleges was increased from two to three years, and a programme of building has been approved for a considerable increase in the number of places. A further 40 or so colleges, with a total of 4155 students, give more specialized three-year courses in, e.g., physical education, domestic science. The students who attend these various types of college are admitted at the age of about 18 in accordance with standards of achievement in the General Certificate of Education approved by the ministry and the institute; and they are financially assisted, on the basis of parental income, by grants from public funds. The university's department of education, which is itself a constituent member of the institute, provides a one-year course of professional training for graduates who frequently migrate to another university for this year of training, in 1959-60 there were 3217 graduates attending these one-year university courses in England and Wales.

In Scotland the work of the colleges and centres for the training of teachers has since 1959 been co-ordinated by a Council for the Training of Teachers under the aegis of the Scottish Education Department. In 1960-61 there were just over 5233 students enrolled.

In Northern Ireland about 1521 students were enrolled in 1959-60 in colleges for the training of teachers.

INTER-UNIVERSITY ORGANIZATIONS The Committee of Vice-Chancellors and Principals of the Universities of the United Kingdom is a consultative body with no executive powers. It originated in occasional meetings of the academic heads of universities convened for special purposes

and did not begin to take on its present shape and functions until after the first world war, when the need for more frequent inter-university consultation became apparent. It was formally established as a standing committee of what was then the Universities Bureau of the British Empire by the governing bodies of the universities in 1931, and its present constitution was approved and adopted in 1950. Its membership is confined to the vice-chancellors of the universities in England, Wales and Northern Ireland, the principals of the Scottish universities, the principal of the University of London and the principal of the University College of North Staffordshire. The pro-vice-chancellor of Durham, the principal of a second Welsh university college and the registrars of Oxford and Cambridge also attend. For a particular meeting a member may appoint a deputy to attend in his place, but rarely does so. The committee meets in London every month except in August. The chairman of the committee is elected annually and usually serves for three years in succession, the chairman for 1961-62 being Professor W. Mansfield Cooper, LL.M., vice-chancellor of the University of Manchester. The Association of Universities of the British Commonwealth (secretary, J. F. Foster, MA LL.D.) provides the secretariat for the committee towards the cost of which the home universities make a special contribution, and the official address for the committee is 36 Gordon Square, London, W.C.1 (tel. Euston 8572).

The function of the committee is simply to consider matters of common interest to universities, but it is not restricted to topics specifically referred to it. It is not empowered to commit the universities in any way and it studiously refrains even from appearing to do so; when matters arise which call for positive action or the formulation of a policy, all the committee can do or desires to do is to seek special authorization or make a recommendation which the universities individually may accept or reject. By its consultative activities, however, the committee holds an influential and central position in university affairs, for, apart from the initiative it frequently takes in making recommendations regarding a common policy on matters of purely internal concern to the universities, it is the channel through which not only the University Grants Committee but many ministries (e.g. education, health) which have contacts with the universities can ascertain the reaction of informed and responsible university opinion to proposals they have in mind or to problems they would like to discuss, and it is inevitable that the views which, within its terms of reference, the committee is willing to express should carry great weight with the outside agencies which consult the committee and with the authorities of the individual universities. The committee also, at its discretion, nominates representatives, not always from within its own membership, to outside bodies with educational interests, and from time to time it enters into informal discussions with such bodies as the Association of University

Teachers and the Headmasters' Conference Since 1946 it has organized an annual Home Universities Conference, held in London in December, at which a widely representative gathering of university teachers, administrators and members of governing bodies discusses broad topics of current interest. The committee issues no report or annual statement, occasionally it sponsors special inquiries which are published, e.g. *The Planning of University Halls of Residence* (Clarendon Press, Oxford, 1948), *Report on an Inquiry into Applications for Admission to Universities* (1957). A *Report of an ad hoc Committee on Procedure for Admission of Students* was published in 1958 and further Reports in 1960 and 1961. These reports (except the first) are published for the committee by the A.U.B.C. as are also the verbatim reports of the proceedings of the Home Universities Conferences and a *Code of Practice for the Protection of Persons exposed to Ionizing Radiations in University Laboratories* (1961).

The Association of University Teachers (A.U.T.), a professional association established at the end of the first world war, has as its objects 'the advancement of university education and research, the promotion of common action among university teachers, and the safeguarding of the interests of its members'. Membership is open to all full-time teachers (including professors) and research workers in institutions of university rank in the United Kingdom, the proportion of eligible members of staff who belong to the association varies from university to university, but the total membership is such that the association has been accorded the right of making direct representations to the University Grants Committee on salary matters. The work of the association is conducted through local branches and a central council. The hon. general secretary is Lord Chorley and the executive secretary is K. Urwin, MA DU, Laurie House, 21 Dawson Place, London, W.2 (tel. Bayswater 9011). The interests of the association range over a wide variety of topics including university entrance requirements, selection of students, organization of curricula, student health, inter-library services, sabbatical leave, international co-operation at university level, salaries, income-tax and superannuation. From time to time it issues reports to its members on these subjects, and it publishes twice-yearly a *Universities Review* (editor, Professor C. M. MacInnes) which contains articles on university matters and information about appointments to and resignations and retirements from university posts.

The National Union of Students (N.U.S.), founded in 1922, is a body to which are affiliated the guilds of undergraduates and student representative councils in most of the universities of England, Wales and Northern Ireland, to it also belong similar student associations in certain other institutions of higher education (teachers' training colleges, technical colleges). Its purpose is to provide a focus for the expression of the corporate opinion of students on matters which

they feel to be particularly their concern, its main interests are in entrance requirements, curricula, maintenance grants and fees, student health, halls of residence and other student accommodation, and international co-operation at the student level, it also arranges for student travel and for vacation work. It has a small permanent secretariat (3 Endsleigh St., London, W.C.1, tel. Euston 2184), its affairs are managed by a council on which the affiliated guilds are represented, and it organizes an annual congress, held in a university centre, at which several hundred delegates and others discuss current student problems. In Scotland there is a separate National Union of Students.

THE UNIVERSITIES TO-DAY. In the 1938-39 session there were 50,250 full-time students in the universities of Great Britain, of these 44.7 per cent were in arts faculties, 25.9 per cent in faculties of science and technology and 29.4 per cent in the other faculties. Immediately after the war preference in admission was given to ex-service men and women and there was a great influx of such students, some of whom were returning to resume their interrupted studies while others were enabled by generous grants to embark upon a university course which they had not previously contemplated. By 1949-50 the total number of students had consequently risen to 85,400. It had at first been thought that the great increase in numbers would be temporary and that, allowing for some 'normal' expansion, universities would eventually settle down to a total of about 70,000. In May 1946, however, a government inter-departmental committee under the chairmanship of Sir Alan Barlow published a *Report on Scientific Manpower* which called for a drastic increase in science and technology graduates together with a corresponding increase in the humanities. From that time onwards the universities have accepted the need for a considerable permanent expansion; their numbers have never fallen below 80,600 (in 1953-54), and with the assistance of Treasury non-recurrent grants they have made some appreciable progress towards the provision of new academic buildings and halls of residence, though they are not yet satisfied that the rate of building has been sufficient to keep up with the demands that face them. The balance of the faculties has changed during these post-war years: in arts there are now 43 per cent, in science and technology 39 per cent, and in the other faculties 18 per cent.

In October 1956 the government published a report on *Scientific and Engineering Manpower* which emphasized once again the need from the point of view of the national welfare for a further increase in the number of university persons trained in the pure and applied sciences. The target for expansion was then fixed as 124,000 to 125,000 full-time students by the middle 1960s, and it was proposed that two-thirds of the expansion should be in science and technology. Early in 1960, after a reassessment of the probable

need for university places, the University Grants Committee was authorized to discuss with the universities the practicability of providing 170,000 to 175,000 places by the early 1970s as a minimum first instalment, and plans for expansion on this scale are currently under consideration. This could mean that by 1970 in arts there would be about 35 per cent, in pure and applied science 52 per cent and in the other faculties 13 per cent. In other words, science and technology would then occupy the predominant position which arts had in 1938-39, but the humanities themselves would nevertheless be stronger in absolute numbers than the pure and applied sciences are at the present time. The prospect of this further change in the balance of faculties causes some anxiety, and much thought is being given to the problem of ensuring that, whatever faculty a student enters, his education at the university shall be as broadly based as possible. In this connexion considerable attention is being paid to the relation between studies in the VIth form at schools and the university curriculum.

The future supply of students who can meet the standards set by the universities for admission will be affected by two important factors. In the early 1960s the effects of the war-time increase in the birth-rate will be felt at the university age, for every 100 people aged 18 in 1957 there will be 144 in 1964. And since 1956 the annual number of births has again shown a marked upward trend. The other factor is that in recent years there has been an annual increase of 5 per cent. in the number of grammar school pupils who stay on to complete the VIth form course and so qualify for university entrance. The cumulative effect of these two factors is likely to be such that the problem of the universities will not be the supply of applicants but the selection of those best fitted to enter. This complex problem of achieving the most satisfactory selection procedures is one which has engaged the attention of the universities continuously since 1945. What emerges from all discussions of selection problems is that the development programmes of the universities as regards both academic buildings and halls of residence are urgent, and even the increased provision for capital expenditure announced for 1960-1963 will do no more than meet the cost of top-level priorities. It is anticipated also that there will be real difficulty in recruiting a sufficient number of properly qualified staff, especially in the sciences, in the face of competition from industry and government departments, yet the universities must have the teachers to enable them to cope with the increased numbers from whom eventually an enhanced supply of university teachers may be expected.

Finally a word may be said about the distribution amongst the universities of the forthcoming expansion. A simple uniform percentage increase is scarcely feasible. Oxford already has 3870 and Cambridge 3066 more students than they had in 1938-39, and it is realized that any further large increase would either wreck the collegiate system

or involve the foundation of new colleges. In 1958 proposals were approved at Oxford for the establishment of a new college as a development of the existing St Catherine's Society and at Cambridge for a new foundation to be called Churchill College. Each of these will provide for about 400 students and each will cost between £2,000,000 and £3,000,000 to build and endow. An effective solution of the general problem of university expansion, however, cannot be found on as high a cost basis as £5000 per student place. On the other hand, there are 10 institutions including constituent colleges of federal universities (apart from London) whose present student population lies between 1000 and 1600, but even if these were willing to double their capacity within the next few years and given the resources to do so, there would still be a prospective deficiency of the order of 50,000 places. The immediate burden of meeting the growing demand is therefore likely to fall on those institutions which now have between 2000 and 4500 students. Developments along these lines have been agreed by the universities and the University Grants Committee, and their implementation now depends on the provision by the Treasury of funds for the building of laboratories, classrooms, libraries, halls of residence and student amenities.

A more fundamental alleviation of the problem will have to be found in the foundation of new universities analogous to the new University of Sussex at Brighton. The granting of a charter to a new institution of university rank is a matter for the royal prerogative. The financing of such an institution, however, would in modern conditions fall mainly on the Treasury, which would wish to satisfy itself about the proposed location, the availability of a suitable site and the measure of local enthusiasm and support on which the institution could rely. The University Grants Committee therefore set up in 1959 its own sub-committee on new university institutions. In general the policy adopted by the U.G.C. is that new institutions should be multi-faculty and should from the start have the power, under proper safeguards for academic standards, to grant both first and advanced degrees. In March 1960 the U.G.C. recommended to the Treasury that steps should be taken to establish new universities in Norwich and York, from both of which cities formal applications had been received. In both cases academic planning boards, consisting of eight or so persons most of whom are eminent in education, have already been appointed to be responsible for the preliminaries necessary for the effective inauguration of the institutions. The vice-chancellors have also been appointed, discussions are taking place as regards curriculum and it is anticipated that the first groups of students may be arriving in 1963 or 1964.

During 1961 the University Grants Committee considered the formal applications made by ten other localities, together with tentative approaches from eight more. In consequence decisions have been taken to set up new universities in Canter-

bury, Colchester, Coventry and Lancaster. An authoritative account of the principles and procedures involved in the foundation of these new universities will be found in the UGC *Returns* for 1958-59 and 1959-60.

OTHER PROVISION FOR HIGHER EDUCATION An entirely false impression would be formed if it were thought that higher education in the United Kingdom is confined to the provision made in universities, indeed an appreciable amount of work which is elsewhere done within universities is here done in other institutions. In England and Wales alone, in addition to students in universities and in teacher training colleges associated with university institutes of education (*see above*), there were in 1960, of the age of 18 or over, 53,500 full-time, 242,000 part-time day students and 607,000 evening students taking courses in colleges of technology, technical colleges and other recognized vocational institutions (*e.g.* colleges of art, of agriculture, of commerce). When these figures are compared with the 15,000 or so full-time students of technology in universities, the importance of this other provision in the educational system of the country will be realized. Apart from the Manchester College of Science and Technology, which is partly financed through the University Grants Committee, there are 6 specialized 'national colleges' (*e.g.* for biology, rubber technology), 10 institutions designated as 'colleges of advanced technology' (CATs) and 22 regional colleges of technology; in addition there are over 500 other recognized establishments of higher education which vary considerably in size and importance. All, however, are maintained or aided from the public funds administered by the Ministry of Education and local education authorities; but the colleges of advanced technology are about to be placed in charge of independent governing bodies which will receive grants direct from the ministry. In order to improve and expand the provision for technical education, especially where advanced work is or could be done, the government embarked in 1956 on a five-year building plan (including some provision for hostel accommodation) which will cost £79,000,000. In Scotland and in Northern Ireland also, comparable provision is made for higher education in institutions other than universities.

Though there are in general no formal academic prerequisites for entry to technical colleges corresponding to the minimum university entrance requirements, many full-time students with suitable attainments are assisted financially, the Ministry of Education having increased in 1958 the number of their technical state scholarships to 254 and the local education authorities the number of their awards to 12,000. Of the part-time day students over the age of 18 about 80 per cent are released by their employers to attend vocational and other courses for one or more days each week. Most of the senior and advanced courses prepare students in a wide range of subjects for the exam-

inations of the City and Guilds of London Institute or the regional Examining Unions, or for an Ordinary or Higher National Certificate. In a minority of instances students present themselves for an external degree of the University of London. In 1956 there was also established on a national basis a diploma in technology (DipTech) which is intended to represent a level of achievement comparable to an honours degree in a university, and universities in general have agreed to regard the holder of the diploma as being *prima facie* qualified to enter on a course leading to a higher degree in pure or applied science.

Mention should here be made of the appointment early in 1961 by the prime minister of an influential committee under the chairmanship of Lord Robbins to enquire into the present state and future scope and organization of the whole field of higher education in Great Britain, including universities, teacher training colleges and colleges of technology. The findings of this committee when promulgated are likely to be of crucial importance.

In Scotland, corresponding broadly to the colleges of technology and similar institutions south of the border, there are 16 institutions (including the Glasgow Royal College of Science and Technology, which is on the University Grants Committee's list) which arrange advanced or specialized courses and about 75 other further education centres. In all, some 12,500 full-time students over the age of 18 are enrolled, together with about 35,300 part-time day students and 218,000 evening students.

In Northern Ireland nearly 4000 full-time, more than 7000 part-time day students and more than 32,000 evening students are enrolled at 165 centres of technical instruction.

INTER-UNIVERSITY COUNCIL FOR HIGHER EDUCATION OVERSEAS, 29 Woburn Square, London, W.C.1 (tel. Museum 8916). *Chairman*—Sir Charles Morris, MA LLD DLitt. *Secretary*—I. C. M. Maxwell, MA. The Inter-University Council was constituted in 1946, at the invitation of the secretary of state for the colonies, by the universities of the United Kingdom and colonial institutions of full university status. Its terms of reference are those recommended by the Asquith commission on higher education in the colonies. The general purpose of the council is threefold:

- (a) to strengthen co-operation between the universities of the United Kingdom and the universities already existing in colonial territories,
- (b) to assist in the development of university colleges in the colonies with a view to the attainment of full university status,
- (c) to assist generally by giving advice and by taking other action to promote university education and research in the colonies.

In 1954 the responsibilities of the council were extended at the request of the secretary of state for Commonwealth relations to include university education in the Federation of Rhodesia and

Nyasaland. More recently countries such as Nigeria and Sierra Leone have achieved independence within the Commonwealth but the relationship between the university institutions in those territories and the Inter-University Council remains close.

The council consists of one representative of each of the universities, together with co-opted members and the educational adviser to the secretary of state for the colonies, Sir Christopher Cox.

COLONIAL UNIVERSITY GRANTS ADVISORY COMMITTEE, 29 Woburn Square, London, W.C.1 (tel. Museum 8916). *Chairman*—Sir Hector Hetherington, KBE, MA LLD DLitt DsL. *Secretary*—I. C. M. Maxwell, MA. The committee was constituted in 1946 by the secretary of state in accordance with a recommendation of the commission on higher education in the colonies. It is charged with the duty of advising the secretary of state on expenditure of United Kingdom funds on the development of higher education in the colonies. The committee works in close co-operation with the Inter-University Council, upon which it relies for advice on the academic aspects of proposals under consideration.

DIRECTORY TO SUBJECTS OF STUDY*

FIRST DEGREES All universities (except North Staffordshire and Sussex) award first degrees with honours, or special degrees, in the following subjects: botany, chemistry, classics (Greek and Latin), economics, English, French, geography, geology, German, history, mathematics, philosophy, physics, zoology.

The Table on pages 802-805 shows which universities provide first degree courses in certain other subjects. In some cases, courses of instruction leading to degrees which, though having the title of bachelor, are in fact open only to

graduates, are also indicated in the Table, e.g. references have been included to degrees of bachelor of education and bachelor of divinity.

The symbol ✓ means that the subject mentioned may be studied as part of the course leading to a first degree.

The symbol ✧ means that the subject forms a main part of the course leading to a first degree, and that a degree (usually—but not always—a degree with honours or a special degree) can be obtained in that subject either alone or in combination with one or two other principal subjects.

* Note—A fuller directory is to be found in *Higher Education in the United Kingdom: a Handbook for Students from Overseas* (Longmans, Green & Co., 1962).

first degrees with honours, or special degrees, in the following subjects: botany, geography, geology, German, history, mathematics, philosophy, physics, zoology

FIRST DEGREES [contd from p. 802].

The symbol ✓ has not been used for subjects taken only in a course for a general degree or a general degree with honours.

Each subject indicated in the column for the University of London may be studied at one or more schools of the university, see the special London Table on pp 956-958. A pamphlet entitled 'General Information for Internal Students', which gives details of the schools of the university and the particular subjects which can be studied at them, may be obtained from the Academic Registrar, University of London, Senate House, Malet St., London, W C 1.

The University College of North Staffordshire has organized its degree courses differently from those of other universities in the United Kingdom and does not award honours degrees, or special degrees, in single subjects, students normally being required (following the 'foundation year' common to all students) to study two principal subjects for 3 years.

The University of Sussex also organizes its courses differently and does not award honours degrees, or special degrees, in single subjects in the arts faculty. The course provided at Sussex is an integrated multi-subject course and in 1961-62 the following subjects are being offered: economics, English, French, German, history, philosophy. Additional subjects, including sciences, will be offered from 1962-63. For fuller details, the university 'Prospectus' should be consulted.

The Table on pp 802-805 does not purport to be anything more than a signpost to direct the reader to the 'General Information' sections of the appropriate university entries, where further particulars as to title of degree, length of course, etc., will be found.

DIPLOMAS, CERTIFICATES, ETC. The following lists show which universities offer diplomas, certificates, testamurs, licences, etc., in the subjects named. In some cases the qualification is awarded by a constituent college of the university mentioned and not by the university itself.

The title of the qualification is given in each case. It should be noted that some of these qualifications are open to graduates only. Information as to whether particular qualifications are postgraduate or not and as to length of courses will be found in the 'General Information' section of the entry for each university or college.

For the convenience of the reader the qualifications have been grouped under general headings, which are not, however, necessarily identical with the names of the faculties under which the subjects fall in any particular university.

GENERAL INFORMATION

Mason Science Coll, founded in 1880 by Sir Josiah Mason, was renamed Mason Coll in 1892 when it merged with the med fac of Queen's Coll. In 1894 the Birmingham Training Coll for teachers in elementary schs was transferred to Mason Coll, which was incorporated by act of parliament 3 yrs. later as 'The Mason Univ. Coll'. This instn was absorbed in the Univ. of Birmingham, incorporated by royal charter in 1900. The Univ had then a staff of 70 and 678 students of whom only 189 were registered undergrads.

Considerable additions to bldgs and facilities were made from 1900 to 1913 and between 1926 and 1939, and the no. of undergrads increased steadily. In June 1939 the academic staff numbered 159 and there were 1460 full-time students. During the war of 1939-45 devel continued and a considerable contribution was made to the war effort by res conducted at the Univ. From 1946 to 1960 expansion in both bldgs and numbers proceeded at such a rate that in Oct 1960 there was an academic staff of 605 and 4417 full-time students registered for courses during the 1960-61 session.

CONSTITUTION The governing body of the Univ is the court of governors (presided over by the chancellor), whose executive cttee is the council, which submits an annual report to the court, the senate, which consists of the vice-chancellor and principal, vice-principal, deans of all facs and all profs, regulates academic matters and its activities are subject to review by council. The pro-chancellor presides over the council and the vice-chancellor over the senate. There are 5 facs, presided over by the deans, which have their own advisory bds and cttees. The delegacy of the inst of educn reports direct to senate.

INCOME (1959-60) Total income, £2,688,293 (endowment, donations and subscriptions, £147,391; grants from local authorities, £65,116; parliamentary grants, £1,932,628; students' fees, £233,507; contributions for services of staff, etc.,

£6437; research grants, etc., £298,766; other income, £4448)

FACULTIES AND DEANS (1961-62) *Arts*, Prof A C Lewis (music), *comm & soc sci.*, . . . ; *law*, Prof O Hood Phillips, *med*, Prof A L d'Abreu (cardiac surg), *sci*, Prof S G. Ward (mining & minerals engin)

UNIVERSITY PRECINCT. The bldgs. of the Univ. are at Edgbaston, about 3 mls. from the centre of Birmingham, on a site which now covers nearly 240 acres. The first bldgs at Edgbaston were completed in 1909.

Bldgs for arts, maths/phys, chem, civil engin, highway engin and law, together with an extension to the students' union and a new wing at the clin res block were opened in 1960. A new refectory and staff house were started in 1959 and will be completed early in 1962. A new bldg for biol scis. is due for completion in 1963 and it is hoped the first pair of new halls of residence will be ready for occupation in Oct 1963. Other new bldgs to be started in 1961 include phys educn. centre, bldg. for fac. of comm & soc sci and new dent hosp. Accommod for phys, metall, mining and minerals engin, and for the inst and dept of educn is to be extended during 1962 and 1963, together with further halls of residence. A further extension of clin res annexe was started in 1960.

LIBRARY About 500,000 vols, incl Barnes libr (med sch.), 70,000 vols; Harding law libr, 10,000 vols, music libr. (Barber Inst), 35,000 items; other sections in depts. of bot., biochem, chem engin, engin piodn, geol., Russian econ, mining and phys. The fine arts libr is part of the Barber Inst. *Special features:* papers of Joseph Chamberlain and Sir Austen Chamberlain, Wedgwood philol libr, Wigan libr of 17th- and 18th-cent theol works, libr of St Mary's Church, Warwick, and Baskerville collection.

MUSEUMS Anat, dent., geol., mining, pathol. physiol, zool., herbarium (bot)

LABORATORIES Chem (special org, phys, electro-chem, analyst and pub. health depts), phys (incl electron phys.), biol, genetics, engin. (incl. electr, mech, prodn, civil and chem), metall (phys and indust), mining & minerals engin (exceptionally well equipped, exper. coal-mine), malting & brewing; biochem, anat, physiol; pathol; cancer res, pharmacol; bacteriol, power-station supplying whole univ with lighting, heat and power. A small **OBSERVATORY** is attached to the dept of phys. **HOSPITALS** recog for clin instructn.—United Birmingham Hosps (General, Q. Elizabeth, Birmingham and Midland Hosps for Women, Children's, Nerve and Dental), and 14 other hosps for sp teaching under the control of the Birmingham Regional Hosp Bd.

BARBER INSTITUTE OF FINE ARTS, Edgbaston, Birmingham, 13 (tel. Selly Oak 0962), music dept Selly Oak 0622. The inst was founded by the late Dame Maitha C. H. Barber, who created a trust to promote the study of the fine arts and of music in the univ. Courses in fine arts are given for the cultural benefit of all students, and in some cases form pt of work required for degrees in other depts. Concerts of chamber music are arranged by the prof of music, and the univ musical soc holds midday concerts during term. The inst contains several galleries and rooms for the exhibition of paintings, drawings, prints, furniture, art-objects and tapestries, a small concert hall; and libraries and admin offices. (For dir, see p 810.)

INSTITUTE OF CHILD HEALTH. The Nuffield Provincial Hospitals Trust has agreed to provide an inst which will be completed in 1961. The inst co-ordinates the activities of the univ dept of paediatrics & child health, the Birmingham Children's Hosp, the Birmingham maternity & child welfare and sch. health services, and the coll of General Practitioners. Principal functions are undergrad. and postgrad teaching, paediatric res and liaison with local authority med. officers and general practitioners.

SHAKESPEARE INSTITUTE, Stratford-upon-Avon, Warwickshire (tel. Stratford-upon-Avon 3138). The purpose of the inst. is primarily to encourage and promote advanced work in Shakespearean studies and in related subs.—the Elizabethan age, drama and theatre. See also p 813.

INSTITUTE OF EDUCATION (see also 'Teaching Staff', above). The inst exists primarily to co-ordinate the training of teachers in the W Midlands area under the general responsibility of the univ, and to recommend to the Ministry of Educn for qualification those students who have satisfactorily completed their training. A cert in educn is granted to students after 1-yr, 2-yr. and 3-yr courses of trg. A 1-yr full-time or 3-yr pt-time course for dipl in educn has been instituted, and is open to qualified teachers with not less than 5 yrs' approved professional experience. A supplementary cert is offered to candidates

who successfully complete 1-yr full-time supplementary courses. The inst also offers courses in youth service (2 yrs full-time), maths (2 yrs. pt-time) and sch librarianship (2 yrs pt-time).

The inst maintains a strong res. dept., the staff of which are members of the univ educn. dept. The res. dept. is situated at Selly Wick House, Selly Wick Rd, Birmingham, 29, and includes a dept of child study. The inst publishes a journal, *Educational Review*, 3 times a yr. The governing body of the inst. is the delegacy, which is responsible to senate.

INSTITUTE FOR ENGINEERING PRODUCTION, Southfield, Norfolk Rd, Edgbaston, Birmingham, 16 (tel. Edgbaston 0390). The inst, which is under the direction of the hd of the dept. of engin production, was opened in 1953, and provides a series of short courses of study and discussions on a residential basis for sr production engineers, operational res, personnel and indust managers. See also p 813.

ADMISSION See Appendix III

NON-MEMBERS OF THE UNIVERSITY. Occasional students, who are not matriculated or of grad. status, who wish to enter the univ for the purpose of attending individual courses, must supply evidence, satisfactory to the dean of the fac and the hd of the dept., that they are qualified to enter upon such courses. Such students will be subject to the univ regns, but are not entitled to wear academic dress.

FIRST DEGREES. 3 yrs.—BA (spec), BA (combined subs), BSc in pure sci., BSc in appl sci., BCom, BScSc, LLB, 3 or 4 yrs. according to

qualifs. on entry—BMus; 5½ yrs.—BDS; 6 yrs.—MB ChB.

Candidates who do not reach the required standard for an hon's degree in any fac may qualify for an ord. degree.

BA with hon's may be obtained in any one of the following sp schs: classics, Latin, Greek, anc hist & archaeol, anc & mediev hist, mediev & mod hist., Engl., French, German, Italian, Russian, Spanish, philos., soc & pol. philos., maths., geog., theol., linguistics. Hon's may also be obtained in the exam for the BA degree in combined subjects.

BSc hon's in pure sci may be taken in any of the hon schs in maths, mathl. phys., phys., chem., zool., bot., genetics, bacteriol., microbiol., geol., geog., anatomical studies, physiol. studies, med biochem. studies. BSc hon's in appl sci may be taken in engin (mech., civil, electr., chem., petroleum, prodn.), metall (phys or indust.), mining (coal or metal) & minerals engin and biochem. Courses in mining involve practical work underground.

Candidates who, before admission, pass certain exams of other approved univs in sci or engin, may be permitted to take the final exam for the BSc (hon's) at the end of their 2nd yr, and to do advanced or res. work in their 3rd yr.

Subject to certain provisos, grads of Oxford with hon's in the final hon sch of nat sci (engin sci) or of Cambridge with 1st or 2nd class in mech scis tripos are eligible for the BSc degree in mining after 2 yrs' study at Birmingham, suitable engin grads of other approved univs are also eligible for the degree under similar conditions.

Prelim science year. There are sp. arrangements whereby candidates who have taken arts subjs as their main subjs at sch may obtain a univ trg. in the scis. Consideration for admission to this 1st yr (of a 4-yr degree course) may also be given to candidates from schs, where the facilities for teaching sci are limited.

BCom with hon's (a) general course, (b) sch. of Russian studies, (c) for qualified sci. students.

BSocSc with hon's in schs. of econ., pol. & sociol., soc. study, Russian studies, maths, econ. & statistics, geog.

Med students may spend their 1st yr at any sch or schs of med recog by the univ, and the senate may recognize exams. passed therein as exempting from the 1st med exam. They may obtain the BSc as well as their med degrees by devoting 7 yrs instead of 6 to study in the univ.

GENERAL INFORMATION

Univ. Coll, Bristol, was establd in 1876 and in 1893 the Bristol Med School, which dates from 1833, became incorporated in it. The univ. received its charter in 1909

CONSTITUTION. The court, comprising some 400 leps. of local authorities and organizations, learned institutions, benefactors, staff and grads., meets annually to receive a report from council, pass accounts and a balance sheet, appoint univ officers and amend ordinances. Executive control rests during the yr with council, whose 46 members are nominated by court, the local authorities of the region, the Soc of Merchant Venturers, senate, the non-professional teaching staff and convocation. Senate, numbering over 60 and consisting of the profs and a no. of other members of the teaching staff, controls, under council, the academic affairs of the univ and receives reports from the fac boards. There are 5 facs (*see below*) each having at its head a dean, who holds office for 2 or 3 yrs. The principal academic officer of the univ is the vice-chancellor, whose appt is permanent. The grads of the univ form convocation, which meets annually and may discuss and pronounce an opinion on any matter relating to the univ.

INCOME (1959-60). Total income, £1,757,448 (Treasury grants, 70 per cent; other grants and contributions for services rendered, 13 per cent; fees, 11 per cent; grants from local authorities, 2 per cent; other sources, 2 per cent).

GONVILLE AND CAIUS COLLEGE

Founded in 1348 as Gonville Hall by Edmund Gonville, the name of the college and its situation were both changed by William Bateman, Bishop of Norwich, his executor, in 1353, when it became the Hall of the Annunciation of Blessed Mary the Virgin. In 1558 John Caius obtained a royal charter confirming the earlier foundations and establishing his own, and by this charter the college received its present name. Junior members in residence (1960-61), 466. Telephone Cambridge 53275.

TRINITY HALL

Founded in 1350 by William Bateman, Bishop of Norwich, and especially designed by him for the study of law. This has been recognized by the establishment of law lectureships, law studentships, open scholarships for intending students of law, and foundation scholarships, but members of the college are not restricted to any particular subject of study, and a normal balance of numbers is maintained among all the usual subjects. Junior members in residence (1960-61), 366. Telephone Cambridge 59447.

GENERAL INFORMATION

The univ received formal recognition as a *studium generale* from Pope John XXII in 1318, but it was well established by that time and had already been given important privileges by King Henry III Its origins probably date from 1209 when, following disturbances at Oxford, a number of scholars migrated to Cambridge The first coll., Peterhouse, was founded by Hugh

de Balsham, Bishop of Ely, in 1284, and was followed by most of the others in the next three centuries.

In the period from the foundation of King's Coll (1441) to the foundation of Trinity Coll. (1546) the univ. expanded considerably, and achieved a European reputation. The high-water mark was perhaps reached during the chancellor-

ship of John Fisher (1504-35), who introduced Erasmus to Cambridge. The Reformation, and in particular the dissolution of the monasteries, had a disturbing influence, and ushered in a series of constitutional changes, the chief result of which was to give the colls a more important place in the constitution of the univ. The constitution of the univ. was stabilized when it received a new code of statutes from Queen Elizabeth in 1570, and was incorporated by act of parliament in 1571. Under the new statutes, which remained in force for nearly 300 years, all students had to be members of colls, and the govt of the univ was largely in the hands of the heads of colls.

There were few major developments in the 17th or 18th centuries. No new colls were founded between 1596 (Sidney Sussex) and 1800 (Downing). The decline in the number of students which was brought about by the civil war was temporarily checked by the Restoration, but in the next hundred years the average number of students matriculating each yr fell by two-thirds. But a number of professorships were founded, and under the influence of Sir Isaac Newton, who was Lucasian prof of maths for 33 yrs, maths. became the main subject of study, from 1750 onwards it was compulsory.

By the end of the 18th century written exams had taken the place of the earlier 'disputations'. Most of the teaching was done in colls. There were a few endowed univ professorships and univ lectureships, but the trust deeds governing them were often out of date, and the stipends attached to the posts very low. The Elizabethan statutes were so far unrelated to the conditions of the time that many were ignored.

Changes were urgently required, and the univ did not escape the reforming agitation of the 19th century. Its affairs were investigated by royal commissions in 1850 and 1872, and the univ. statutes were subsequently revised by statutory commissions. The classical tripos was introduced in 1824, and, after the maths tripos had ceased to be compulsory in 1850, the range of subjects of study was steadily widened. In 1856 nonconformists were allowed to graduate; in 1858 the local exams (for schools) were instituted; in 1869 the first women's coll, Girton, was founded; in 1871 all religious tests were abolished by the Universities Tests Act, and in the same yr the Cavendish physics lab was established; in 1872 the bd of extra-mural studies was instituted to organize univ extension lectures. During the century the average annual total of admissions increased by nearly 6 times.

In the early yrs of the present century the univ was in serious financial difficulties, which were aggravated by the war of 1914-18. The univ received a Treasury grant in 1919 on the condition that there should be an enquiry into its resources and organization. A royal commission appointed in 1920 recommended that the univ. (but not the colls) should receive an annual Treasury grant, and should be reorganized so as to take over some of

the teaching previously done by colls. In consequence the statutes were again revised, the facs. reorganized, and many more univ. lectrs appointed, thenceforward lectures, etc., were organized solely by the univ instead of partly by the colls. The univ has continued to expand, especially since the end of the 1939-45 war.

CONSTITUTION The univ is a self-governing body, the legislative authority is the *regent house*, which consists of those members of the teaching and admin staff of the univ. and colls who have the MA or a higher degree. The *senate*, which consists of all the holders of the MA or higher degrees, has the right of voting on certain formal matters. The chief admin. body of the univ is the *council of the senate*, which is elected by the regent house. The *general board of the faculties* co-ordinates the educational policy of the univ and the *financial board* supervises its financial affairs.

The nominal and ceremonial hd of the univ. is the chancellor, who is elected for life. The vice-chancellor is a head of a coll who normally holds office for 2 yrs. He presides over *congregations* (meetings of the regent house or the senate) and is chairman of the council of the senate and the more important of the many *boards* and *syndicates* which manage the affairs of the univ.

Changes in the *ordinances*, or regulations of the univ., are proposed by the board or syndicate concerned in the form of reports which, after being approved for publication by the council of the senate, are published in the *Cambridge University Reporter*. Such reports can be criticized by members of the senate at *discussions* which are held once a fortnight in full term. A report may be amended after remarks made in the discussion. Subsequently a *grace*, which is a motion for the approval of its recommendations, is submitted to a vote of the regent house. Minor amendments of ordinances are proposed in *graces* which the council of the senate submit for the approval of the regent house without the formality of report and discussion. Ordinances may not infringe the *statutes*. Procedure for amendments of statutes is the same, but such amendments require the approval of the Queen in Council, after the approval of the regent house has been obtained.

The **COLLEGES** are independent self-governing corporate bodies quite distinct from the univ., with their own property and income. Their affairs are regulated by their own statutes, though these cannot be altered without the approval of the univ. and the Queen in Council, and they are also bound by some of the univ. statutes. The governing body of a coll consists of a *master* (or *provost* or *president*) and a group of *fellows*. Most of the fellows are also members of the staff of the univ; most of the staff of the univ. are either fellows or members of colls.

There are 19 colls for men and 4 colls (or similar institutions) for women. In addition there is a collegiate institution for men, Fitzwilliam

House, which is under the direct control of the univ. With the exception of Hughes Hall, which is reserved for women reading for the cert of educn., all colls accept both undergraduate and postgraduate students in any subject. The colls provide lodgings, corporate life and personal tuition. All students are required to be members of a coll (or one of certain recognized institutions), all the univ. lectures, labs, libraries, exams and degrees are open to members of any coll., whether men or women.

The principal coll officers are the *tutors*, who are responsible for the welfare and discipline of the students assigned to them and advise them about their studies and any other problems that may arise. Each student is also allotted a *supervisor*, who gives him personal tuition, and corrects his written work.

The coll. bldgs are usually grouped round one or more courts. Each coll has a hall (in which meals are served), a chapel, a library, and jr and sr. common-rooms. The rest of the bldgs are divided into rooms for students and fellows. Because of the increase in the numbers of students in recent years, only about half are able to live in rooms in their coll. The rest live in lodgings (which must, for undergraduates, be recognized by the lodging-houses syndicate), but they continue to have access to all the other facilities of their coll. Usually undergraduates are able to live in coll for one or two of the three yrs. required for a degree.

DISCIPLINE outside the colls is maintained by the *proctors*, who are responsible for enforcing the *edicts* of the univ. Proctorial permission is required for such purposes as running a motor vehicle, holding a party for more than 15 persons, or organizing a club or society. Students are required to have gowns, which must be worn at most lectures, in the univ. library, in the streets after dusk, for dining in hall and for official visits to members of the staff.

The **INCOME** of the univ. is derived mainly from the Treasury grant, partly from the fees of students, grants for res., endowments and contributions from the colls which are graduated according to coll. revenues. In 1959-60 the income was £4,454,598, of which £2,873,179 was from the Treasury recurrent grant, £470,330 from fees, £458,836 from grants for res., £327,817 from endowments, £123,121 from colls and £201,315 from other sources.

FACULTIES. Teaching and res. are organized in 20 *faculties*, each under the supervision of a *faculty board*. The *fac*s are: classics, div, Engl, fine arts, mod & mediæv langs, music, oriental studies, econ, & pol, hist, law, moral sci., engin., geog & geol., maths, phys & chem, agric, archaeol. & anthropol., biol 'A' (comprising bot & zool.), biol 'B' (comprising anat, biochem, pathol., etc.), and med. Several of the *fac*s are further divided into *depts*, and there are also the following *depts.* independent of any *fac.* educn.,

estate management, chem engin. and the observatories.

There is no **UNIV. PRECINCT** in the accepted sense. The colls, and univ. bldgs are spread out on the west side of the town. Bldgs in course of constrcn include extensions to the new chem and engin. labs and improved accomm. for arts *fac*s.

The **UNIVERSITY LIBRARY** (tel. Cambridge 56261) contains about 2,000,000 vols., including many early printed books, and over 10,000 MSS and 350,000 maps. It is entitled under the Copyright Act to a copy of every book published in Gt Britain & Ireland, and a large number of foreign books and periodicals are acquired by purchase. It contains, amongst others, the following notable collections: Acton libr. (mediæv., eccles. and mod. hist., 60,000 vols.), W. G. Aston's Japanese libr., Sir T. Wade's Chinese books, J. W. Clark collection (Cambridge books, pamphlets, papers, etc.). Annual budget about £100,000.

In addition there are over 50 *fac.*, deptl. and sp. libraries, containing in all about 500,000 books. Among the most important are the Balfour libr. (zool.), the Marshall libr. (econ.), the Seeley memorial libr. (hist.) and the Squire law libr. The Philosophical libr. is the libr. of the Philosophical Soc., but other members of the univ. may consult its books on maths and the sci.s.

The colls have their own libraries for the use of members of the coll. only. In addition to modern text-books for the use of students, most also contain important collections of old books or MSS, these include the Robertson Smith collection of oriental books in Christ's Coll., the Matthew Parker MSS in Corpus Christi Coll., 800 MSS., 60 incunabula, heraldic collections of Dr John Knight (17th cent.) and 1300 books and pamphlets of Dr Wm. Branthwaite (d. 1619) in Gonville & Caius Coll., the Rowe music libr. and the Keynes libr. (which contains Newton MSS) in King's Coll., the Pepys libr. in Magdalene Coll., the Perné libr. in Peterhouse, and the Capel collection of Shakespeariana in Trinity Coll.

MUSEUMS. The *Fitzwilliam Museum* (Dir.—C. Winter, [Trin.], MA), Trumpington St., Cambridge (tel. Cambridge 50023), contains extensive art and archaeological collections. The chief collections comprise Egyptian, Greek and Roman antiquities, coins and medals, paintings, prints, mediæv. and mod. MSS, ceramics, textiles, mediæv. and Renaissance objects of art. The collection of paintings includes examples of the Italian, Flemish, Dutch, French, British and Spanish schools, among which are a number of masterpieces. The library contains about 25,000 vols. incl. 12,000 relating to the arts, a collection of early printed books and the music collection. The museum is open free to the public.

The *Museum of Classical Archaeology* (Curator—Prof. Jocelyn M. C. Toynbee, [Newn.], DPhil Oxon., MA, FSA, FBA), Little St. Mary's Lane, Cambridge (tel. Cambridge 52410), contains a

collection of casts illustrating the hist. of Greek sculpture

The Museum of Archaeology and Ethnology (Curator—G. H. S. Bushnell, [Down], MA PhD, Asst Curator—Mary D. Crafter, [Girton], MA Oxon & Camb., Downing St., Cambridge (tel. Cambridge 50937), has a large and increasing collection, incl. Saxon urns and ornaments, casts of central American monuments, Egyptian stone implements, unique Fijian collections and numerous others resulting from scientific expeditions by Cambridge men

The Museum of Zoology (Dir.—F. R. Parrington, [Sid.], ScD, Downing St., Cambridge (tel. Cambridge 58717))

Sedgwick Museum of Geology (Curator—A. G. Brighton, [Chr.], MA, Downing St., Cambridge (tel. Cambridge 50129))

Whipple Museum of the History of Science (Curator—G. Buchdahl, [King's], MA Melb. & Camb., Downing St., Cambridge)

LABORATORIES The principal labs are agric., anat., biochem., biol. and parasitol. (Molteno Inst.), bot., chem., chem. engn., colloid sci., engn., ethnol., exper. phys. (Cavendish), genetics, human anat., maths. (for res. on computing machinery), med., metall., mineral & petrol., pathol., phys. chem., physiol., psychol., statistical, vet. sci., zool.

BOTANIC GARDEN (Dir.—J. S. L. Gilmour, [Cla.], MA, FLS., Bateman St., Cambridge (tel. Cambridge 50101))

OBSERVATORIES (for staff, see *Astrophys.*, p. 841), Madingley Rd., Cambridge (tel. Cambridge 52413), are about a mile from Cambridge and have a 36-in. reflector, a 17-in. Schmidt telescope and a 12-in. horizontal solar telescope with spectrographic equipment. There are a number of smaller instruments, a well-equipped workshop, a small optical shop and a good library.

SCOTT POLAR RESEARCH INSTITUTE (Dir.—G. de Q. Robin, [Cai.], MSc Melb., PhD Brim., MA), Lensfield Rd., Cambridge (tel. Cambridge 56457), is the most important repository in the Commonwealth of information about arctic and antarctic regions.

MADINGLEY HALL (Warden—E. Miller, [Joh.], MA), Madingley, Cambridge (tel. Madingley 307). A large country house, dating in part from 1540, about 4 mls. west of Cambridge. In term time accommodates about 50 grad. students (who must be members of one of the colls.) in study-bedrooms. In vacations the hall is made available to the bd. of extra-mural studies (see below) for residential courses.

DEPARTMENT OF EDUCATION (for staff, see *Educ.*, p. 844), 17 Brookside, Cambridge (tel. Cambridge 55271). Prepares students for the cert. in educ. awarded by the Cambridge Inst. of Educ. (see below). The 1-yr. course includes 1 term's teaching practice and is open to grads. of

any univ. Candidates must obtain admission to a coll. (in the case of women, to Hughes Hall) before applying for admission to the dept.

The univ. dept. of educ. is a corporate member of the Cambridge Institute of Education, 8 Brookside, Cambridge (tel. Cambridge 56207/9). Dir.—W. O. Bell, [Cath.], MA, Sec.—F. P. C. Edmonds, [Qu.], MA.

ADMISSION See Appendix III. Students must be admitted to a coll., admission to a coll. automatically secures admission to the univ. Most colls. have entrance exams, but they may admit persons who have exceptional qualifs. without requiring them to take an exam. Enquiries should be addressed to the tutor for admissions of the coll. concerned (to the sec. of Girton or Newnham Coll.). Candidates for admission to courses of 1es must also obtain the status of 1es student (see below).

The Adviser to Overseas Candidates for Admission (N. S. Wilson, [Pemb.], MA), at 17 Silver St., Cambridge (tel. Cambridge 58923), is able to give information and advice to applicants for admission resident outside the U.K. and to govt. depts. acting on behalf of such students.

NON-MEMBERS OF THE UNIVERSITY. Certain classes of persons who are not members of the univ. may be admitted to lectures or allowed to work in univ. labs. for limited periods. Enquiries should be addressed to the registry.

FIRST DEGREES. The BA is the first degree in all subsys. The qualifs. for the BA hons. are (i) 9 terms' residence; (ii) reaching the hons. standard in any 2 of the exams known as 'tripos' exams (in certain cases, noted below, one such exam is a sufficient qualif.). In most subsys. there are 2 tripos exams, the first of which (pt. I) is taken after a 1 or 2-yr. course of study, and the 2nd (pt. II) after 1 or 2 yrs. of more specialized study in certain aspects of the suby. It is possible to take the 2 tripos exams in certain different subsys.

There are the following tripos exams. *agric.*, pts. I & II, Anglo-Saxon (which consists of one pt. only), archaeological & anthropological, pts. I & II, archit. & fine arts, pts. I & II, chem. engn. (which consists of one pt. only and can only be taken after obtaining hons. in certain other exams); classical, pts. I & II, econ., pts. I & II, Engl., pts. I & II, geographical, pts. I & II; historical, pts. I & II, law, pts. I & II, mathematical, pts. I, II & III (pt. II qualifies for the BA without further exam, pt. III is normally taken only by the most advanced students who have omitted pt. II), mech. scis. (engn.), pts. I & II (pt. I qualifies for the BA without further exam.), mod. & mediæv. langs., pts. I & II, moral scis., pts. I & II, music, pts. I & II, nat. scis., pts. I & II (pt. I qualifies for the BA without further exam. In pt. I a student must read 3 or 4 scientific subsys. in pt. II he specializes in one scientific suby.), oriental studies, pts. I & II, and theological, pts. I, II & III (pt. IA is intended for those who have previously obtained hons. in another suby.).

There are also exams. in agric., estate management and Christian theol., leading to the ord BA degree. Outside these subsj only students intending to follow an honrs course are normally admitted. If a student fails to reach the standard required for honrs in his first tripos, he will not be admitted to a 2nd tripos, but may be given an allowance towards the ord. BA degree and, after passing one or two of the special exams which are held in most of the subsj. covered by the triposes, be admitted to that degree.

Most exams are held at the end of the Easter term.

AFFILIATED STUDENTS. Grads of many other univs., having degrees approved for the purpose by the council of the senate, may be allowed to proceed to the BA degree after 6 terms' residence and obtaining honrs in one tripos exam only, usually a pt II. (For details, see *The Student's Handbook*.)

HIGHER DEGREES. Without taking any further exam a BA may be admitted to the degree of MA after 6 yrs have elapsed from the end of his 1st term, provided that at least 2 yrs. have elapsed from his admission as BA. The MA does not represent any addnl academic qualif, but confers seniority, including membership of the senate and certain privileges in the use of the univ library and other univ. institutions. An MA is conferred on the principal members of the staff who have degrees of other univs (in some cases after an interval of 3 yrs). Other members of the grad staff have the status of MA, which confers most of the privileges of the MA except membership of the senate and regent house.

Graduates of Oxford or Trinity Coll., Dublin, who become members of the staff, may by 'incorporating' be admitted to a degree which corresponds to that which they already hold and confers the same seniority.

The main res. degrees are the PhD, MLitt and MSc. See 'Research Students', below.

Law. A person may be a candidate for the LLB exam. if he has obtained honrs in either pt. of the law tripos, or if he is a BA and qualified to practise as a barrister or solicitor in England or Ireland or as an advocate or law agent in Scotland, or if he has passed a law exam. in another univ. approved by the fac. bd.

Medicine. The course leading to the degrees of MB BChir normally lasts 6 yrs. At least 9 terms must be spent at the univ., during which the candidate must complete the 1st MB exam., the qualifying exam. in anat and physiol., the exam in pharmacol., and obtain honrs in a tripos (usually pt. I of the nat. scis. tripos). At this stage he is usually qualified to proceed to the BA. He must then spend at least 2 yrs. 9 mos. in clinical study at a hosp. (usually in London) and pass the final MB exam. before proceeding to the degrees of MB BChir, which are qualifs for provisional registration under the Medical Act, 1950. Not less than 2 yrs. after passing the final

exam. for the MB BChir, a person may be a candidate for the degree of MChir.

Music. The qualifs. for the MusB are: (i) 9 terms' residence, (ii) passing 2 sections of the MusB exam. Candidates must first have obtained honrs in one pt. of the music tripos.

Veterinary Medicine. The course leading to the degree of VetMB normally lasts 6 yrs. The candidate must first complete the 1st MB exam., the qualifying exam. in vet. anat. and vet. physiol., the exam. in pharmacol., and obtain honrs in a tripos (usually pt. I of the nat. scis. tripos). He must then spend 3 yrs. completing specified courses at the school of vet. med. and obtaining practical experience before being admitted to the final vet. exam.

The other higher degrees, which are open only to members of the univ., are: MusM—3 yrs. from MusB; LLM—2 yrs. from BA or LLB (but at least 6 yrs. from first term of residence), BD—5 yrs. from BA; DD, LLD, MD, ScD, LittD, MusD—8 yrs. from BA or other first degree.

HONORARY DEGREES may be conferred on persons who have done good service to the univ. or are of great distinction. They are normally one of the following: DD, LLD, ScD, LittD, MusD or MA.

The univ. does not award EXTERNAL DEGREES.

DIPLOMAS. The following dipls. are open to grads of any univ. whose qualifs. are approved (usually a degree in the same subsj. is required): agric. sci., 1-2 yrs.; agric., 2 yrs.; classical archaeol., 1 yr.; criminol., 1 yr.; mathl. stats., 1-2 yrs.; numerical analysis and automatic computing, 1 yr.; Roman law, 1 yr.; and slavonic studies, 1 yr. Candidates are required to become members of the univ. and reside for 3 terms.

The dipls. in archit. and estate management are open only to persons with the Cambridge BA degree in those subsj. The dipl. in educn. is open only to persons who have previously obtained the cert. in educn. at Cambridge.

The dipls. in compar. legal studies, econ. and internat. law are open only to registered res. students. See 'Research Students', below.

CERTIFICATES. The following certs. are open to grads of any univ. whose qualifs. are approved: advanced study in chem. engin. and in engin. (either in theory of structures and strength of materials, or in control engin.), postgrad. study in chem. engin., engin., chem., metall., phys., chem. microbiol. and plant biochem., hist. studies, and hist. and philos. of sci. Candidates are required to become members of the univ. and reside for 3 terms. For the cert. in educn. see 'Dept. of Educn.' above. Certs. of proficiency are awarded with ord. BA degrees in agric., Christian theol. and estate management.

Certs. in soc. anthropol., phys. anthropol. and prehist. archaeol. are open to any member of the univ. who has been accepted by fac. bd. of

archaeol and anthropol. and who has received instructn in Cambridge under direction of fac bd for 1 academic yr

Certs of competent knowledge in mod. langs are open to any member of the univ who has resided for 2 terms

RESEARCH STUDENTS Grads of any univ, and in exceptional cases non-grads, who can give evidence of ability to profit from a course of supervised res may be admitted as candidates for the degrees of PhD, MLitt or MSc. They must first obtain admission to the status of res student, and become members of a coll or Fitzwilliam House. Enquiries about admission to the status of res student should be made to the sec. of the Bd of Res Studies (L. M. Harvey, [Cath.], MA), The Old Schools, Cambridge (tel. Cambridge 58933). Res students are admitted to work in any fac

Candidates for the degree of PhD are required to pursue a course of res for 3 yrs, for the degrees of MSc and MLitt for 2 yrs., and for the dipls in compar legal studies, econ. and internat law or the certs of postgrad study in nat scis for 1 yr, they are placed under the direction of a supervisor, and are required to reside in the univ during full term, save that in certain cases a candidate for the PhD may be allowed to spend 1 yr working under supervision elsewhere, or may be granted exemption from 1 yr on the ground of res done before admission to Cambridge. After completing the course, candidates are required to submit a dissertation, or thesis, embodying the results of their res, and also (except for the dipls) undergo an oral or written exam.

Res. students may be admitted, normally for a period of not more than 1 yr, as candidates for degrees of other univs

EXPENSES Students are required to pay both univ and coll fees. The only recurrent univ fee is the univ composition fee (£11 a term in arts facs and £19 a term in sci facs). Since coll fees vary from coll to coll, it is not possible to give precise information. Total annual term-time expenditure is likely to be about £450, this would include some allowance for personal expenses. Attendance at long vacation courses would be addnl, and since the univ terms only cover about half the yr, a student who has to maintain himself during vacation will usually need £600-£700 a yr. The following initial fees must be paid before coming into residence: coll admission fee (£2 to £5); univ matric fee (£5); and, at most colls, 'caution money'. The latter is a sum of about £30 (increased by some colls in the case of students not normally resident in the U.K.) which is returned when the student completes his course. The univ. BA degree fee is £3.

ACADEMIC YEAR The academic yr is divided into 3 terms: Michaelmas term Oct 1-Dec 19, Lent term Jan. 5-March 25, Easter term April 10-June 18. In order to count a term towards the qualifs required for a degree, a

student is required to reside in the univ precincts for three-quarters of the term. Most students therefore reside during full term, which also lasts for three-quarters of each term, since regular teaching and lecturing are only given in full term. Dates of full term for academic yr 1962-63: Oct 9-Dec 7, Jan. 15-March 15, April 16-June 7.

During a period from the Thursday following July 6 to the Saturday following Aug 12 there are addnl lecture courses in agric, engin, law and most scientific and med. subs., which students may attend. Students in other subs may come into residence in this period to use libraries, etc., but will not receive formal teaching.

Most libraries and labs are open throughout the yr except for short periods at Christmas, Easter and in Sept.

The BOARD OF EXTRA-MURAL STUDIES undertakes the liberal educn. of adults, mainly in the eastern counties, and in a few centres farther afield. The Workers' Educatl Asscn, together with other voluntary asscns and the local educn. authorities, are represented on the bd, and are closely associated with the arrangement of its teaching work. Consultation also takes place through the East Anglian Regional Advisory Council for Further Educn. The teaching of the bd consists mainly of: (a) univ. tutorial classes, extending over 3 winter sessions, (b) univ sessnl. classes, usually of 20-24 meetings; (c) univ extension lecture courses, usually of 10-12 meetings, (d) other special courses, many of a pioneer type. Bursaries are awarded annually to men and women in the adult educn. movement who have shown themselves to be capable of profiting by a course of univ study, but who, for various reasons, have not had the opportunity.

Summer Schools. The bd. holds vacation courses, incl. (a) an annual summer sch., in co-op with the WEA, mainly for students from tutorial and sessnl. classes, incl. a trg course for potential tutors in adult educn; (b) vacation courses for students from overseas, mainly Europe, (c) occasl summer schs., in co-op with facs or depts. of the univ to meet special requirements. For an experimental period the univ. has placed Madingley Hall at the disposal of the bd in vacations, and the bd has arranged there a considerable no. of residential courses for adults. These include courses for army and R.A.F. officers and also for members of the U.S.A.F., for managers, supervisors and apprentices in industry, for trade unionists and for teachers.

Further particulars from the sec., G. F. Hickson, [Cla.], MA, Stuart House, Cambridge (tel. Cambridge 56275). Asst secs.: J. M. Y. Andrew, [Cath.], MA, F. V. H. Ramsbottom, [Cath.], MA; A. A. M. Stripp, [Trin.], MA. For names of full-time tutors, see p. 854. The bd also has the services of about 90 pt-time tutors and lectrs.

SCHOLARSHIPS AND STUDENTSHIPS There are a limited no. of univ awards, but most are for postgrad study and are open only to members of the

univ. A larger no. of awards are offered by the colls. These include many open entrance scholops and exhibitions, which are competed for by exams held in Dec (Feb for Fitzwilliam House and March for St Catharine's Coll.). Full details are given in a sp. number of the *Camb. Univ. Reporter* publd annually in May and obtainable from the univ. press (for addresses, see p. 875) price 6d.

Trinity Coll. offers exhibitions to enable students of Commonwealth univs. outside the U.K. to read for a BA, LLB or dipl. at Cambridge, particulars from the sr. tutor, Trinity Coll. Applicants must be made through the principal authority of the student's univ., and must reach the sr. tutor by May 1. For postgrad. awards open to grads. of other univs., see p. 808.

APPOINTMENTS BOARD. The bd. helps undergrads to decide upon the careers which might suit them, and brings together employers seeking recruits and undergrads seeking employment. 962 permanent appts. were obtained in 1960. For officers, see 'Admin and Other Staff', p. 855. Address: 6 Chaucer Rd., Cambridge (tel. Cambridge 54242). Telegrams: Appointments, Cambridge.

THE WOMEN'S APPOINTMENTS BOARD is also at 6 Chaucer Rd., Cambridge (tel. Cambridge 52629). 101 permanent appts. were obtained in 1960.

GRADUATE ASSOCIATIONS. There is no soc. of univ. grads., but each coll. has its own grads. assoc.

UNIVERSITY MILITARY AND AIR FORMATIONS. Cambridge univ. officers trg. corps provides service trg. for students who wish to join regular army and for candidates for commissions in army emergency reserve and territorial army. H.Q. The Rifle Range, Grange Rd., Cambridge (tel. Cambridge 50995).

Cambridge univ. air squadron is establd. to promote interest in R.A.F. at the univ. and to attract entrants of good calibre and learning into the service by providing facilities for students to become acquainted with flying and its associated problems. Flying instrcn. given at Cambridge airport. H.Q. 2 Chaucer Rd., Cambridge (tel. Cambridge 56942).

THE UNIVERSITY HEALTH SERVICE (tel. Cambridge 58217) is part of the dept. of human ecol. (For staff, see *Human Ecology*, p. 852). All students are invited to attend for a med. exam in their 1st term. The Univ. Health Centre includes a gymnasium, and is situated at *Fenner's*, the univ. cricket and tennis grounds.

UNION SOCIETY. The Cambridge Union Soc. is open to all male members of the univ. Its best-known activity is debating, but it also contains a libr., restaurant and rooms for soc. activities.

THE OXFORD AND CAMBRIDGE SCHOOLS EXAMINATION BOARD, establd. 1873, examines or inspects and reports on the work of schs. which

provide educn. of the highest grade. It also holds yearly exams and awards a General Cert. of Educn. (G.C.E.) which exempts the holder, under certain conditions, from responsns., the min. entrance requirements of London and other univs., and the prelim. exams of various professional bodies, etc. Its exams are held at schs. in the British Isles, and also in the Middle East, the W. Indies and British Guiana. The regns. of the bd. are publd. by the Cambridge Univ. Press (post free, 2s. 6d.), for addresses, see p. 875. Secs. at Cambridge—A. E. E. McKenzie, [Trin.], MA, 10 Trumpington St. (tel. Cambridge 50658), at Oxford—G. J. R. Potter, MA *Oxon*, 74 High St. (tel. Oxford 43549).

THE UNIVERSITY OF CAMBRIDGE LOCAL EXAMINATIONS SYNDICATE is one of the examining bodies in England and Wales approved for sec. sch. exams by the Ministry of Educn. Its membership includes univ. members, principals of schs. and reps. of local educn. authorities. The syndicate conducts sch. exams in Gt. Britain and overseas, and exams in Engl. for foreign students.

General Cert. of Educn. The exam. for the G.C.E. (at advanced and scholp. levels in June and at old level in July and Dec.) is entrusted to a sch. exams. cttee., one-half of whose members are teachers apptd. by the Jt. Cttee. of the Four Secondary Assocs. Sch. teachers, as members of suby. cttees., and as examiners, take a prominent part in this exam. The cert. exempts the holder, under certain conditions, from univ. entrance requirements and the prelim. exams. of various professional bodies, and is endorsed by the Ministry of Educn. This exam. is not held in this form outside Europe. Special arrangements are made for the examination of members of H.M. Forces.

School Exams Overseas. The jt. exam. for the sch. cert. and G.C.E. and the higher sch. cert. exam. is held in Dec. in India and Pakistan, Malaya, W. and E. Africa, the Fed. of Rhodesia and Nyasaland, the W. Indies, Mauritius and elsewhere in conjunction with the educn. authorities, and in schs. for the British community in some foreign countries. In Malaya, the H.S.C. exam. is conducted jointly with the Univ. of Malaya. The exam. for the Federation of Malaya cert. of educn. is held in conjunction with the sch. cert. exam. in the Federation of Malaya. In W. Africa the sch. cert. is awarded jtdly. with the W. African Exams. Council and is named West African Sch. Cert. In the Sudan it is awarded jtdly. with the Sudan Exams. Council and is named Sudan Sch. Cert. Govt. scholps. to univs. in Gt. Britain are awarded on the syndicate's exams in a number of countries of the British Commonwealth. The subys. of these overseas sch. exams correspond closely to those of the G.C.E. and normally carry the same exemptions in the U.K. In most areas where the exam. is taken candidates can obtain a G.C.E. cert. as well as or instead of a sch. cert. if they reach the necessary standard in 3 subys.

Exams in English These exams for foreign students, which are conducted in assoc. with the British Council, are held in Gt. Britain and about 50 countries overseas. The cert. of proficiency in English*, which exempts the holder from the entrance test in English at certain univs., and the dipl. of English studies, which is intended to be of the same standard as a first exam for a univ. hons. degree, carry the official approval of the Ministry of Education. There is also an exam for a lower cert. in English.

The exam for the *Cambridge Dipl. and Cert. in Religious Knowledge* is held in June; it is designed for teachers, church workers and others who desire a satisfactory proof of their knowledge of the subj.

§ The warden of the Durham Colls and the rector of King's Coll are alternately vice-chancellor and pro-vice-chancellor for 2-yr. terms.

GENERAL INFORMATION

The univ. was establd. in 1832. The Coll. of Medicine, founded in Newcastle in 1834, was associated with the univ. first in 1852 and more closely in 1870. The Durham Coll. of Physical Sci., later Armstrong Coll., was founded in 1871 in Newcastle as a part of the univ. The reconstitution of 1908 brought the Durham Colls., the Coll. of Medicine and Armstrong Coll. into a closer relationship. The reconstitution of 1937 carried the process further, establishing a central financial control. It also merged the two Newcastle colls. in King's Coll., Newcastle upon Tyne.

A further reconstitution is now planned which will lead to the existence of separate univs. in Durham and Newcastle.

CONSTITUTION. The univ. is governed by a visitor, chancellor, vice-chancellor, pro-vice-chancellor, convocation, court, senate and bds. of facs. It includes two divisions, namely, the Durham Division and the Newcastle Division. The Durham Division is governed by a council, an academic bd. and a warden, the Newcastle Division by a council, an academic bd. and a rector. The warden and rector are alternately vice-chancellor and pro-vice-chancellor of the univ. for 2-yr terms.

Convocation is the body of grads. which may make representations to the univ. on any univ. matter. The court appoints profs. and readers on the recommendation of senate, determines the allocation of all funds at the disposal of the univ. and represents the univ. in all negotiations for obtaining grants from public bodies. Senate determines the conditions on which academic distinctions are awarded and are the supreme governing and executive body of the univ. in all academic matters. The central activities of the univ. controlled by senate and court include all degree exams and a number of specialized activities such as the appts. bd., publicans bd., sch. exams bd. and the inst. of educn.

The divisions control admission to courses and all teaching. The councils are the governing and executive bodies of the divisions and are advised on academic matters by the academic bds.

For the divisions and affiliated colls., see below and p. 877.

INCOMES (1959-60) £3,264,054, incl. recurrent Treasury grant allocated to the divisions (Durham division, £427,938; Newcastle division, £1,396,179).

FACULTIES AND DEANS (1961-63) *Agric.*, Prof. M. M. Cooper, *appl. sci.*, Prof. G. H. Chambers (marine engin.), *arts*, Prof. K. W. Britton (philos.), *econ. studies*, A. D. Airth, *law*, Prof. D. W. GENERAL INFORMATION

The univ was founded in Durham in 1832 after two abortive attempts in earlier centuries. Halls of residence were opened and were later recog. as constituent colls at various times during the course of the last hundred yrs. Women have been admitted to Durham since 1896 and non-collegiate students since 1871. Until 1946 all Durham Colleges' students lived in coll, but post-war expansion has made this impossible, and approx one-fifth of the total number live in licensed lodgings as members of St Cuthbert's Soc (men) or St Aidan's Coll (women). Teaching is organized centrally, and all colls and socs. take students for all courses. St Chad's and St John's Colls are also recog. theol colls of the Church of England, and provide full postgrad trg for ordination candidates.

Various depts of the division are now housed in different parts of the city, and a plan showing their position is publd in the *Durham Colleges Handbook*

GENERAL INFORMATION

The Newcastle upon Tyne Sch of Med & Surg was founded in 1834, became associated with the Univ of Durham in 1852 and adopted the title of Univ of Durham Coll of Med in 1870. Armstrong Coll, Newcastle upon Tyne, so named in 1904, was founded in 1871 as the Univ of Durham Coll of Physical Sci. In 1937 the two colls were merged to form King's Coll, Newcastle upon Tyne, in the Univ. of Durham. The univ. court has decided to promote legislation to amend existing Univ of Durham acts, so as to separate King's College, Newcastle, from the Univ of Durham and to establish it as an independent univ. It is expected, therefore, that King's College will attain the status of an independent univ during 1962-64.

INCOME (1959-60) £1,910,302

DEVELOPMENT OF COLLEGE AREA Devel. is taking place on a site not far from the city centre, around the original bldgs of Armstrong Coll. New bldgs completed since the war include chem block, Stephenson bldg (various engin. depts. and maths.), civil engin. bldg, a new arts block, an extension to the chem. block, an extension to library, extensions to halls of residence and a new phys. bldg. A new phys. res block is nearing completion. Work has begun on new bldgs. to accomm. depts of agric, chem engin, electr engin. and maths and on extensions to students' union.

LOCATION OF DEPARTMENTS, etc., not in main college area Cockle Park Exper Stn (agric), Morpeth, Northumberland, Dove Marine Lab. DEPT. MUSEUMS. Anat, pathol, dent, zool, geol, mineral, chem., mining, anthropol, Roman-British archaeol Technol specimens.

LABORATORIES with spec. facilities for res in mech., marine, civil, elect and chem. engin., naval archit, mining and metall; in chem., phys, geol, bot and zool (incl marine biol. at Dove marine lab.), and in agric. (incl agric engin.).

The agric dept. manages the coll. farm at Nafferton and the coll. exper stn at Cockle Park, it also has the use of other county and crown estates for teaching, res and demonstration purposes.

UNIVERSITY COMPUTING LABORATORY Housed in Newcastle upon Tyne, with a Pegasus electronic digital computing machine ('Ferdinand'). The lab works in close contact with depts in both divs and is available for use by interests outside the univ. Dir E S. Page, MA PhD Camb., BSc Lond

ADMISSION. Those wishing to read in the coll for a degree (awarded by the Univ of Durham) must satisfy the univ matric requirements (see Appendix III). There are reduced requirements for admission to study for the univ dipls. in econ. studies, pub admin, for the univ. cert in soc. studies, and for the coll. certs in archit., fine art and town planning; candidates for admission to the cert. in soc. studies course should be over 20.

Enquiries concerning admission to non-med depts of the coll. should be addressed to the Registrar, King's Coll, Newcastle upon Tyne, 1, students wishing to read med. should write to the Asst Registrar, the Med Sch, King's Coll, and dent surg to the Admin Asst, Sutherland Dent. Sch., Northumberland Rd., Newcastle upon Tyne, 1

The last dates for receipt of applicns. are, for med., Nov. 30, for all other courses, incl. dent. surg, Jan. 31, preceding the Oct. of entry.

GENERAL INFORMATION

The Univ of Exeter had its origin in the local demand for a centre for higher educn in the S.W. of England in the yrs following the great exhibition of 1851. The successful establt of a sch. of art in 1851 was followed by the erection in 1865 of a bldg. to house a county museum, library and sch. of art as a memorial to the Prince Consort. Univ. extension lectures were organized in this bldg., and candidates prepared for South Kensington sci and arts exams. In 1895 classes were extended and Exeter Tech and Univ Extension Coll. was establd, becoming in 1895 the Royal Albert Memorial Coll. The preparation of students for London Univ external degrees began in 1901. In 1922 the coll was reconstituted as the Univ Coll of the South West of England, and received its first Treasury grant as a recog univ instn. The residential nature of the present univ was early establd., and there are now 9 halls of residence. In 1955 a royal charter founding the Univ. of Exeter empowered the univ. to incorporate the univ. coll.

CONSTITUTION. The supreme governing body of the univ. is the court, comprising some 230 reps. of local authorities and organizations, learned bodies, benefactors and local schs., the officers, officials and reps of staff and grads. The court meets annually to receive reports of council and senate, pass the audited statement of accounts, appoint univ. officers, and amend or repeal statutes. The chief executive body is the council, whose members include the officers of the univ., reps of court, senate, convocation and local authorities. Academic matters are controlled by the senate, which comprises the profs and hds of all teaching depts and 6 reps. of the non-professional staff. The bds of the 4 facs, under the chairmanship of their deans, are responsible to the senate for teaching and exams. within the facs. The deans, elected by the bds. of facs., hold office for periods of 1 to 4 yrs. The chancellor, as chief officer of the univ., presides over court and council. In her absence, a pro-chancellor acts as chairman of these bodies. The vice-chancellor, the chief academic officer, is *ex officio* chairman of senate. The registered grads of the univ. form convocation, which elects reps to serve on court and council, and meets annually to discuss and comment on any matters concerning the univ.

INCOME (1959-60) £531,688 (Treasury grant, 75 1 per cent; grants from local authorities, 6 2 per cent., fees, 13 6 per cent; misc, 5 1 per cent)

FACULTIES AND DEANS (1961-62) *Arts*, Prof R. Niklaus (French), *law*, Prof C F Parker, *sci*, Prof D Rees (pure maths), *soc studies*, Prof A. Davies (geog.)

UNIVERSITY PRECINCT. Accommodn was originally provided in extensions of the Royal Albert Memorial Bldg in Queen St. In 1906 the univ was moved to a new bldg in Gandy St., which is now occupied by the fac of law, the dept of extra-mural studies, the psychol. section of the dept of educn., and the inst of educn. In 1922 the Streatham estate was acquired, partly by gift of W H. Reed, former mayor of Exeter. To this site, which now covers 200 acres on the northern side of the city, the univ. is being gradually transferred. Bldgs already erected incl the Washington Singer labs (1931), the Roborough library (1940), the Hatherly biol labs (1952), the Mary Harris chapel (1958) and the Queen's bldg (1958) housing the facs of arts and soc. studies and the dept of geol. Northcote House (admin depts), Devonshire House (guild of students) and the univ. refectory were completed and occupied in the summer of 1960.

LIBRARY. Roborough library, 130,000 books, incl some rare editions and early printed books. The univ. is responsible for the admin of Exeter cathedral library (20,000 vols) and for the capitular archives, incl the Exon Domesday and the Exeter Book.

LABORATORIES. Bot., cancer, chem, geol, phys, psychol., zool.

OBSERVATORY. The Norman Lockyer observatory, Sidmouth, became a constituent part of the univ in 1948.

INSTITUTE OF EDUCATION (see also 'Teaching Staff', above). Gandy St., Exeter (tel. Exeter 77911). Constituent members. univ dept of educn (Prof—R D'Aeth, AM *Harv*, PhD *Camb*), St Luke's Coll, Exeter (men) (principal—J L Smeall, JP, MA), Rolle Coll, Exmouth (women) (principal—Doris E L Spicer, MA BCom) Associate member Dartington Coll. and Arts Centre (dept of music educn)

GENERAL INFORMATION

The Univ. Coll of Hull, incorporated in 1927 and opened in 1928, was founded through the generosity of the Rt Hon. Thomas Robinson Ferens, High Steward of Hull and a leading industrialist in the city, who in 1925 donated £250,000 to endow a univ. coll. This was followed by grants from the corp. of Kingston upon Hull who gave £150,000 towards the cost of bldgs and equipment and also an annual grant towards maintenance, and from another industrialist, Mr G F Grant, who donated £100,000. In 1945 it was recognized by the Univ. Grants Cttee. for state grants and in 1954 was merged in the Univ. of Hull on the grant of a royal charter.

CONSTITUTION. The supreme governing body of the univ. is the court, presided over by the chancellor and consisting of about 280 members rep. of educnl. bodies, local authorities, parliament, benefactors, churches, learned socs, professional bodies, comm and industry. The executive body is the council, which consists of academic and lay members under the chairmanship of one of the pro-chancellors. The academic authority is the senate, presided over by the vice-chancellor, and consisting of all profs and hds of depts. of the univ. and 4 elected members of the non-professional teaching staff. The fac bds are responsible under the senate for the teaching and exams within the facs.

INCOME (1960-61). Total income, £688,111 (Treasury grant, 74.4 per cent., local authorities' grants, 2.9 per cent., fees, 13.3 per cent., endowments, 6 per cent., other sources, 3.4 per cent.)

FACULTIES AND DEANS. *Arts*, Prof R. L. Brett (Engl); *sci.*, Prof. N. B. Chapman (chem.), *soc. scis. & law*, Prof H. R. Wilkinson (geog).

UNIVERSITY PRECINCT. The main site of the univ is in Cottingham Rd, about 2½ miles from the centre of the city, and includes teaching accomm for all depts except educn, maths, German and adult educn, which occupy houses adjacent to the main site. The original bldgs for arts and sci were erected about 1928. Permanent bldgs. erected since the war include a chem.

block, students' union and refectory, boiler house, changing rooms, library, health centre, extensions to halls of residence, and a new hall of residence completed in 1957. Extensions for chem., a new bldg for bot and zool and a new bldg for phys are now in hand. The univ has ample space on its present sites for all foreseeable development in teaching and res accomm. The univ halls of residence are all situated in the village of Cottingham, some 2-3 miles from the univ. The univ coll was developed on a fully residential basis, and although this is no longer possible with increasing nos in the univ, it is hoped to continue to develop as a residential univ in the future. The sites in Cottingham have ample space for bldg. addnl halls, and new halls and extensions to the present halls are planned in the next few yrs. Future plans on the main site include a new hall of residence for postgrads and sr students, an exam hall, an arts bldg., an assembly hall, a bldg for appl sci and a sports centre.

LIBRARY. Over 150,000 vols., includes material for advanced res. More than 1700 periodicals and annuals currently taken.

LABORATORIES, ETC. Bot, chem (org, phys & inorg), geog, geol., phys, psychol, zool, teacher trg. lab.; bot garden; bot. field station, Spurn Head, coastal res. unit (geog), Spurn Head, marine biol lab (zool), Scarborough.

GENERAL INFORMATION

The Leeds Sch. of Medicine, founded in 1831, and the Yorkshire Coll. of Science, founded in 1874, were united in 1884. The coll. formed part of the Victoria Univ., Manchester, from 1887 to 1904, when a Univ. was establd. in the city of Leeds by royal charter.

The Univ. has for many years maintained the balance of its facs, arts being at present the largest numerically. Through close connexions

with and generously sustained help from industry, however, special strengths in pure and appl. scis. have been developed. In recent yrs., the use of special supplementary Treasury grants for the devel. of higher technol. educn. has made possible further major advances in these fields. Recent devels. incl. a high energy radiation lab. at Cookridge and a fully staffed and equipped electronic computing lab.

CONSTITUTION The court is the governing body of the univ. and is empowered to regulate and determine all univ. matters in the ways required by the charter and statutes. It includes in its membership the council, reps of the senate, teaching staff, convocation, professional bodies, local authorities, other univs, colls, and schs. The council also has a widely representative membership and is the executive body of the univ., exercising such powers as are granted to it by the court and by statute, incl. the institution, after a report by senate, of teaching offices, and management of the financial affairs of the univ. Subject to statutes and ordinances and to review by the court, the senate controls and generally regulates instruct and educn. The chancellor is the hd and chief officer of the univ. and is pres. of court and council. In her absence, the pro-chancellor presides at meetings of these two bodies; the vice-chancellor is *ex-officio* chairman of senate. The chancellor, pro-chancellor and vice-chancellor are elected by the court on the nomination of council.

INCOME (1959-60) Total income, £2,492,694 (parliamentary grants, 73 per cent, local authorities' grants, 3 per cent, fees, 11 per cent, interest on investments, 1 per cent, other sources, 12 per cent.)

FACULTIES AND DEANS *Arts*, Prof G T Clapton (French), *econ & soc. studies*, Dr L F Henriques (soc studies), *law*, Prof P S James, *med*, A B Pain (surg), *sci*, Dr D Bunn (phys chem), *technol.*, Dr J E Garaid (fuel technol.)

GENERAL INFORMATION

The Univ. Coll. of Leicester was founded in 1918. The original site and bldgs, which date from 1837, were given by the late T. Fielding Johnson in 1919, and a substantial endowment fund was subscribed by leading citizens. In 1945 the coll was recognized by the Univ. Grants Ctee. and placed on the list of univ. instns receiving grants from the Treasury; in 1950 it received a royal charter of incorporation as a univ. coll. The coll was incorporated in the Univ. of Leicester, constituted by royal charter, in 1957.

CONSTITUTION Under the charter the governing body is the univ. court. The council is responsible to the court for the management of the whole of the univ.'s affairs. The senate, an academic body consisting entirely of members of staff, controls, under the council, the academic affairs of the univ. The bds. of the facs. are responsible to senate for the work of the respective facs. Convocation consists of all grads of the univ., together with the officers and academic staff. It appoints repps. on court, and may communicate with court, council or senate on any matter affecting the univ.

INCOME (1960-61) £595,000 (endowments, etc. 1 per cent; fees, 13 per cent; local grants, 2 per cent; govt. grants, 78 per cent; other sources, 6 per cent).

FACULTIES AND DEANS *Arts*, Prof. P. H. Powell (German); *educn.*, Prof. A. J. Allaway (adult educn.); *sci.*, Prof. T. G. Tutin (bot.); *soc. sci.*, Prof. J. D. B. Miller (pol.).

UNIVERSITY PRECINCT The main univ. bldgs are in University Rd., about 1 ml. from the city centre. The original bldg has been considerably altered and extended; new bldgs were opened for biol. in 1951, refectory and students' union in 1958, chem. in 1960, phys. in 1961. New bldgs for engin., maths, geog., geol. and adult educn. are under constrn. Vaughan Coll. (Great Central St.) is the main centre in Leicester for the adult educn. dept. Halls of residence are situated at Oadby (for men) and at Knighton (for women). 2 new halls were opened in 1960 and 1961 and 2 are under constrn. The bot. gdns are at Beaumont Hall, Stoughton Drive South.

LIBRARY 135,000 vols.; special collections: the Robjohn collection of bibles, the works of Bunyan and early printed books, the Hatton topographical library, transport hist. A large extension to the library was completed in 1954.

DEPT. OF EDUCATION The offices of the dept are at 152 Upper New Walk, Leicester (tel. Leicester 24740).

INSTITUTE OF EDUCATION (see also 'Teaching Staff', above). The inst. occupies separate premises at 328 London Rd., Leicester (tel. Leicester 78133), where it provides lecture rooms, reading rooms, library (20,000 vols.) and an

information service for teachers. The inst. is an area training organization for the trg. of teachers. It comprises the following constituent member instns.—the univ. dept. of educn., Leicester Coll. of Art; City of Leicester Trg. Coll., Leicester Domestic Science Trg. Coll.

GENERAL INFORMATION

Univ Coll, Liverpool, founded by royal charter 1881, was admitted into the Victoria Univ, Manchester, in 1884. In 1903 the Univ. of Liverpool was established by royal charter and the coll. was absorbed in it. Expansion was rapid, both in bldgs and in numbers of students. To the older degrees in arts, sci, med and law, degrees in archit., dent. surg. and engin. were soon added. A sch. of vet med was established in 1904, affiliated to the Royal Coll of Vet Surgeons, and in 1914 degrees in vet sci. were established. Devel. was halted by the outbreak of the first world war, towards the prosecution of which the univ. made notable contributions in the fields of sci. and med. Between 1918 and 1939 the numbers of students and staff increased steadily, and despite financial stringency, devel. included the bldg. of a geol. lab., an animal hosp., the extension to the students' union, a new lib. and a hall of residence for men students. From 1945 to the present day the univ. has been engaged in an unprecedented expansion, and in addn. to other bldgs., new chem. labs., a new med. sch., phys. bldg., civil engin. and bldg. sci. labs. and 2 halls of residence (one for men and the other for women) have been erected.

CONSTITUTION The supreme governing body of the univ. is the court which, subject to the charter, statutes and legislation, has absolute power within the univ. It consists of the members of the council and senate, reps. of local authorities, profess. bodies, schools, colls. and convocation, and of certain officials *ex officio*. It meets annually to consider the report of the council and of the univ., and to approve the accounts and alterations to ordinances.

The council is the executive body of the univ. and consists of the officers of the univ. and reps. of the court, city council, senate, facs. and convocation; it administers the whole revenue and property and conducts all affairs of the univ., and, on nomination of the facs. and senate, appts. profs. and members of the teaching staff.

The senate is responsible to the council for the general regulation of discipline, instruct., res. and exams. within the univ. and for recommendations for degrees, dipls., certs., scholps. and prizes.

Each of the facs. of the univ. is responsible to the senate for courses of study and regns. as to awards, and, in general, the various business transactions falling within each fac's province.

INCOME (yr. ended July 31, 1959). Total income, £1,941,101 (Treasury grants, 69.8 per cent., other govt. depts., 4.5 per cent., local authorities, 2.6 per cent., endowments, 8.5 per cent., fees, 11.6 per cent., other sources, 3 per cent.).

FACULTIES AND DEANS (session 1960-61). *Arts*, Prof. K. Muir (Engl. lit.), *engin.*, Prof. J. M. Meek (electr. power engin.); *law*, Prof. D. R. Seaborne Davies, *med.*, J. M. Leggate, *sci.*,

Prof. K. F. Bowden (oceanog.) (full-time sub-dean), Dr. V. J. Oocleshaw, *vet. sci.*, Prof. J. G. Wright (vet. surg.).

UNIVERSITY PRECINCT The univ. occupies an area of some 80 acres lying between Pembroke Place and Myrtle St., and the admin. centre is in the Victoria Bldg., Brownlow Hill, within about a mile of the city centre. A long-term bldg. programme is being undertaken, and bldgs. which have been completed and occupied include nuclear phys., civic design, instg. & phys. chem., med. sch., univ. press, dent. sch. extn., civil engin. & bldg. sch., phys., maths & oceanog., and vet. anat. & pathol. In course of construction are bldgs. for org. chem., arts lecture theatre block, and students' union extn.

LIBRARY About 470,000 vols. Most important collections received by gift or bequest. Thomas Glazebrook Rylands (1900), rich in early geog., astron., maths. and British local hist., William Noble (1912), containing most of the finely printed books published in England since about 1880, R. A. Scott Macfie (1935), entirely devoted to the gypsies. The library possesses a small but fairly representative collection of mediev. MSS., including an important text of *Piers Plowman*, and about 250 incunabula. In addition to the Harold Cohen library, opened in 1938, there are numerous external libraries administered by the univ. librarian.

LABORATORIES, ETC. Equipment for advanced study and res. in all depts. There is a marine biol. stn. (for Staff, see p. 944) at Port Erin, Isle of Man, univ. bot. gdns. at Ness, Wirral, a vet. field stn. at Neston, Wirral, and a tidal inst. and observatory (for Staff, see p. 944) (The Observatory, Bidston, Birkenhead, Cheshire, tel. Cloughton 5455).

U.K.—ENGLAND (LONDON)

The univ. was constituted by royal charter in 1836 as a body empowered to grant degrees to students of approved instns. after exam. and, until 1900, its work was confined to the examination of students. The system whereby entrance to its exams. was restricted to students of certain affiliated colls. was abolished, except for exams in med., in 1858. In 1878 its degrees were thrown open to women, London being the first of the univs. of Gt Britain to adopt this policy.

In 1900 the univ. was reconstituted so as to strengthen the ties between it and the instns engaged in higher educn. in the London area. The senate was empowered to admit as *schools of the univ.* instns., situated within the admin. county of London and not carried on for the private gain or profit of the owners, which provide educn. of univ. standard, and was required to obtain reports at prescribed intervals on the efficiency of such schs. A sp. form of recognition could be given to an instn. within the same area founded for res. or the cultivation of any sp. branch of sci. or learning, and the Lister Inst. of Prev. Med. has been admitted in this category.

The two original colls. of the univ. have been incorporated in it, Univ. Coll. in 1907 and King's Coll. in 1910, by special acts of parliament.

There are now 14 non-med. and 15 med. schs. (incl. 2 postgrad.) in receipt of U.G.C. grants, and 4 schs. not in receipt of U.G.C. grants. In addn. there are 10 univ. institutes. There are 17 non-univ. instns. having some *recognized teachers*.

CONSTITUTION The univ. is governed under statutes made under the Univ. of London Act, 1926.

The court has the custody, control and disposition of all the property, funds and investments of the univ. and controls its finances. It comprises the chancellor, vice-chancellor, chairman of convocation and 14 other members, of whom 6 are apptd. by the senate, 4 by H.M. in Council and 3 by local authorities, 1 member being co-opted. One of its most important duties is to apply for the grants for univ. purposes to the Univ. Grants Cttee., the London County Council, county councils and county borough councils of the home counties, and other public bodies, and to distribute the sums so received between univ. instns. and those schs. which receive financial aid from the univ.

The court is also responsible for the devel. of the univ. precinct (*see below*).

The senate is the supreme governing and executive body of the univ. in all academic matters. It is composed of reps. of the facs and of convocation, the principal, and certain hds. of schs. All *appointed teachers* at schs. of the univ. are apptd. by the senate, which also has power to recognize as teachers of the univ. members of the teaching staff of certain approved public educn. instns., whether schs. of the univ. or not.

Convocation consists of grads. of the univ. who have attained the age of 21 yrs., together with

members of the 5 standing ctees. of the senate, who have paid the prescribed fees. It elects the chancellor, and 18 members of the senate in addn. to the chairman of convocation, who is *ex officio* a member of the senate and court. Convocation may discuss any matter relating to the univ. and declare its opinion thereon to the court or senate.

INCOME (1959-60) The total income for recurrent purposes of the univ., incl. all its schs. and instns., was £16,732,107 (Treasury grants, 73 per cent.; grants from other govt. depts., 0.1 per cent.; grants in aid from local authorities, 2.5 per cent.; fees (incl. Ministry of Educn. tuition grants for teachers in trg.), 9 per cent.; endowments for both particular and general purposes, 1.5 per cent.; donations and subs., 0.5 per cent.; grants for res. and income from res. contracts, 8.4 per cent.; contributions for services rendered, 3.3 per cent.; other sources, 1.7 per cent.).

FACULTIES AND DEANS. *Arts*, Prof. J. S. Spink (Bedford Coll.); *econ.* (incl. *comm.* & *industry*) and *pol. sci.*, H. Tout (Univ. Coll.); *engin.*, Prof. J. Greig (King's Coll.); *law*, Prof. G. D. Nokes (King's Coll.); *med.*, Dr. H. B. May (London Hosp. Med. Coll.); *music*, , *sci.*, Prof. J. A. B. Gray (Univ. Coll.); *theol.*, Rev. G. F. Nuttall (New Coll.).

UNIVERSITY PRECINCT. The administration of the univ. is centred at the Senate House, W.C.1, which provides accomm. for offices and the univ. library, as well as for the Insts. of Educn., Historical Research and Slavonic Studies. The bldg., designed by Charles Holden and opened in 1936, was erected on part of the Bloomsbury site, an area of 11½ acres purchased in 1927. A further 13½ acres were purchased from the Bedford estate in 1951. Substantial purchases of property have also been made on behalf of Univ. Coll., which now owns the greater part of the rectangle in which it is situated. This rectangle, together with the original Bloomsbury site and the areas purchased from the Bedford estate since the war, provides a compact area between the British Museum and the Euston Rd. for development for univ. purposes and a comprehensive outline development plan for the area has been prepared by Prof. Sir Leslie Martin.

The **UNIVERSITY LIBRARY** is a general library incl. all subs. studied in the univ., but it is specially strong in the humanities, particularly in Engl. lit., incl. large Shakespeare collection. It contains about 700,000 vols. and 4000 current periodicals, and provides reading accomm. for 450 readers and an extensive loan service for members of the univ. Among its sp. collections are the Goldsmiths' libr. of econ. lit. (c. 70,000 vols. & pamphlets), the Durning-Lawrence libr., containing an important collection of books by and about Sir Francis Bacon, and a good working libr. on Shakespeare including the four folios, the De Morgan libr. of mathl. and astronomical books, the Quick memorial libr. of books on educn., especially rich in old text-books for the

school-room, the Harry Price libr of magical lit., the Eliot-Phelps collection of Spanish books and works on the history of Spain, and the Sterling libr of rare Engl books.

The music libr contains books and periodicals on music, music scores and gramophone records. The photographic dept. is equipped to produce photostats, microfilms, enlargements, reflex and dino copies, and work is undertaken both for insts and members of the univ and also for those unconnected with the univ.

Each sch and institution of the univ. has its own library, and some particulars of these will be found in the respective *Yearbook* entries below. For further details of the libraries of the univ, see R. Irwin & R. Staveley *The Libraries of London, 1961*, and L. M. Harrod *The Libraries of Greater London, 1951*.

University library depository provides facilities for co-operative storage of books which libraries of the univ are unable to house in their own bldgs. It came into use in May 1960 and the present bldg accommodates about 250,000 vols. *Address* Spring Rise, Egham, Surrey (tel. Egham 4560). *Librarian-in-Charge* J. P. Mansbridge, BA.

ADMISSION Intending students who are suitably qualified (see Appendix III) must apply to the sec. to the univ. entrance requirements dept., on form M (obtainable from the sec.), for a 'statement of eligibility'. They must apply to the sch. of their choice (see pp. 950-951) for admission. The admission of students, provided they satisfy univ. entrance requirements, is entirely a matter for the individual schs. In all facs, except theol., med., laws and econ., fac. requirements (see Appendix III) must also be satisfied.

DEGREES. BD, MTh, DD, BA, MA, DLat, LLB, LLM, LLD; BMus, DMus, MB BS, MD, MS; BDS, MDS; BVetMed, MVetMed, BPharm, MPharm, BSc, MSc, DSc; PhD (in all facs).

The BSc and DSc are granted in the facs of sci. (incl. agric., hort., and, for internal students, BSc in household sci., nutrition and in archit.), engin., and econ. (incl. estate management and sociol.), the MSc in sci. (incl. agric., hort., and, for internal students, household sci. and nutrition), engin. and econ. (incl. estate management).

EXTERNAL STUDENTS are permitted to proceed to the degrees of BD, BA, LLB, BMus and BSc (in the facs of sci. and econ.) without restriction on the nature of the course of study, which may be pursued in a teaching instn in London (not forming part of the Univ. of London), in a teaching instn. situated elsewhere in the United Kingdom or overseas, or by private study. Exams. are held each yr. at centres located in many parts of the U.K. and in many countries overseas.

External students are also permitted to proceed to the degrees of MB BS, BDS, BPharm and BSc (in the fac. of engin.) provided that an approved course of study has been completed in a teaching

instn. which has been recognized by the Univ. of London for the purpose of these exams. (With very few exceptions, all such instns. are situated in the U.K.)

External students who wish to proceed to the degree of BA or BSc with sociol. as the principal subj. are normally required to pursue their studies in the U.K. and to attend course at approved instns., but exceptions may be made in sp. cases.

A student who wishes to proceed to the external higher degrees of MTh, MA, LLM, MD, MS, MDS, MPharm and MSc (in the facs of sci., engin. and econ.) and/or to the external degree of PhD (in all facs) must normally already possess an appropriate bachelor's degree of the Univ. of London.

The degrees of DD, DLat, LLD, DMus and DSc (in the facs of sci., engin. and econ.) are not differentiated between internal and external students, but all candidates for these degrees are required to hold at least one degree of the Univ. of London in the appropriate fac.

All external students are required to register, and all must previously have matriculated or must satisfy the min. entrance requirements of the univ. at the time of first registration and the addnl. requirements prescribed before admission to the exams. for the particular degree. Copies of all regns. may be obtained from the external registrar.

An **INTERNAL STUDENT**, before being allowed to enter as such for any exam., must, unless specially exempted, have attended courses in all the subsj. thereof. For a 1st degree in any fac. he must have completed an approved course of study extending over at least 3 yrs. which must, ordinarily, have been continuously pursued, but not necessarily all at one institution. As a general rule, hons. may be taken at the final exams.

Diplomas Postgrad dipl in pub admin., normally 2 yrs., dipl in soc studies (external), normally 2 yrs.

SCHEMES OF SPECIAL RELATION WITH UNIVERSITY COLLEGES OVERSEAS These schemes originated in proposals made by the Commission on Higher Education in the Colonies which was apptd by the secretary of state in 1943 under the chairmanship of Mr. Justice, later Lord, Asquith. The report of the commission (cmd 6647 of 1945) explains the background to the proposals and the broad outline of the schemes. Their purpose is to enable univ. colls, during their transition to full univ. status, to enter their students for degrees of the Univ. of London which are awarded upon the results of special exams. The syllabuses of these exams are adjusted to the geographical, linguistic and educnl conditions of the territory, but represent no relaxation in the standards of the univ.

Certain conditions are laid down limiting the admission of univ. colls to these schemes. A coll must satisfy the univ. that its staff, resources, equipment and machinery of government are appropriate to an instr. aspiring to univ. status, and in particular that it possesses an academic body charged with the duty of formulating academic policy. This policy must include the encouragement of the pursuit of a regular and liberal course of educn. and of a corporate life among its students, the promotion of res. on the part of staff and postgrad students, and willingness to accept the responsibilities of intellectual leadership in the community it serves. The conditions for the admission of students must also be considered appropriate.

The main objects of these schemes of 'special relation' may be summarized as follows. (1) the establt. of direct and easy co-operation between the academic boards of the overseas colls and the univ., (2) the institution of a regular system of consultation between the authorities of the univ. and the staffs of the colls. on questions of syllabus and exam requirements, (3) the promotion of personal contact between the examiners appointed by the univ. and the teachers in the colls., (4) the participation by members of the staff of the colls. in the actual work of examining their own students, (5) the interchange of visits and the

giving of assistance and advice by the univ on such matters as the colls. overseas may desire

There are at present schemes with the Univ Coll. of the West Indies, Univ Coll, Ibadan, Nigeria, Makerere Coll, the Univ Coll of East Africa, the Royal Coll, Nairobi, the Univ Coll of Rhodesia and Nyasaland

Each set of exam regns has been approved by the senate of the univ. on the initiative of, or in consultation with, the individual coll concerned All exams. held at a coll. are conducted in accordance with the regns. approved for that coll.

POSTGRADUATE STUDY AND RESEARCH In most schs. of the univ. sp arrangements are made for res students, and the facilities offered are not restricted to internal grads of the univ External grads and grads. of other approved univs are allowed, under certain conditions, to enter as internal students for the degree of bachelor or of PhD in the several facs, and for the degree of MTh, MA, LL.M, MSc or MSc(Eng) Every candidate must submit evidence of graduation, etc., together with a cert. from the authorities of the sch. or institution of the univ. at which he proposes to study, stating that the student is, in their opinion, a fit person to undertake the proposed course of study and res, and that they are willing to supervise his work An overseas student may himself submit an applicn on the prescribed form, and the univ will, if so requested, advise on the selection of the sch. or institution at which, and teacher under whom, he should study Applicn. for such advice should be addressed to the academic registrar of the univ. Overseas students should apply for registration before coming to London, and their applicns should reach the univ. if possible 12 mos before the commencement of their course, and at the latest by March 1, to enable them, should their applicns be successful, to enter upon their course of study in the following Oct, i.e. at the beginning of the session Students whose applicns are approved are required to pursue a course extending over at least 2 yrs

An internal student who is a candidate for the PhD degree must have graduated in the univ or have been registered as a candidate for the degree after passing approved exams. for a degree in another univ. An internal student is further required to pursue a course of study of not less than 2 yrs' full-time, or 4 yrs' pt-time, training in res and res methods Any grad. of the univ may become a candidate for the PhD degree in his first degree fac as an external student on receiving the approval of the council for external students It should be noted that only grads. of the Univ of London may register as external students for a master's or PhD degree

FEES *Registration* (non-recurrent and incl. matric)—internal normal 1st degree 3 gs., postgrad. 6 gs., external normal degree 5 gs., postgrad. 2 gs., advanced students 5 gs. *Exam. fees* (no graduation fees)—arts and sci., from £18 to £20, med, vet. med, and dent., from £33 to

£47 Details of *annual tuition fees* are given in the sections relating to the schs., below

EXTRA-MURAL STUDIES The area of operation of the council for extra-mural studies includes the counties of London, Middlesex and Surrey, S-W Essex and S Hertfordshire, and the county boroughs of Croydon, E Ham, W Ham and Southend-on-Sea. The work is divided into 4 sections and the chief admin officers of the dept are dir of dept — ; dep dir. (extension) — C P Thomas, BA *Wales*, dep. dir (tutorial classes) — F G Brook, BSc(Econ) PhD, hd of vocational dipls section — R. A. S Knowles;

hd of sp. courses section — Winifred Bamforth, MA.

(a) *Univ Extension Courses* have been carried on since 1902 (prior to that, 1876–1902, by the London Soc. for the Extension of Univ Teaching). The sessal and terminal courses provided cover various fields of knowledge — archaeol, hist, lit, econ, sociol, bibl studies, internat affairs, music, visual arts, geog, transport studies, phys and biol sci, and allied subsjs. Short courses of a pioneer or illustrative kind are also arranged. An exam is held, where reqd, at the end of a sessal course. Continuous study is encouraged by the *dipls in the humanities* (hist, lit, econ, sociol, hist of art, biblical and relig studies, internat affairs, visual arts, archaeol, hist of music) awarded to students who complete approved courses of study, usually covering 4 yrs, and pass annual exams and by 3-yr course for the *cert in transport studies*. Provision is made, where required, for post-dipl study. Vacation courses and study tours at home and abroad are arranged. More than 30 week-end courses are held each yr. Work is carried on mainly by pt-time lectrs. There is a staff lectr. in phys scis — H G Frost, BSc.

(b) *Tutorial Classes* have been provided since 1909 in close co-operation with the WEA. The classes extend over 3 yrs, usually with a max membership of 24 students. Sessal classes and advanced classes lasting one session are also provided. Summer schs. and week-end courses are held each yr. There are no exams but all students undertake to do written work arranged with the tutor to suit individual needs. The subsjs. include archaeol, art, econ, hist, internat. relations, lit, music, philos, pol. and psychol. Work is carried on partly by pt-time tutors but also by staff tutors — G. Bush, MA DMus *Oxon.*, D. Butt, BA *Oxon.*; J. P. Carruthers, MA *Glas*; P. J. Cronin, BA *Brist*, BLitt *Oxon*; E. M. Eppel, MA EdB *Glas*; H. Fyrrh, BSc(Econ); W. J. A. U.K.—ENGLAND (LONDON)

GENERAL INFORMATION

The inst was established as pt of the post-war expansion of the Univ of London and occupies premises near the Senate House. Its aim is to act as a focal point for legal res., to provide seminar classes for students reading for higher degrees in law at a sch of the univ., and to build up a good working res. library in law. The inst. has collated particulars of legal res. undertaken in Britain and the Commonwealth, and is in a position to pass this information on to res. workers and other enquirers. An annual list of topics in progress is prepared.

Teaching at the inst. is undertaken by members of the law teaching staffs of colls and schs in the univ. with a fac of laws, in addn. to the dir of the inst.

LIBRARY The library now consists of over 60,000 items. The inst. has acquired practically all U.K. law reports and statutes and basic works, particularly those of use for seminar purposes. Through continued purchases made possible by the generous gift from the Nuffield Foundation, the Nuffield library of Commonwealth law is nearing the stage when it can be regarded as comprehensive. The U.S. holdings continue to increase. Over 100 U.S. law reviews are received regularly, about two-thirds of which are not known to be taken elsewhere in Britain. Earlier vols. are being acquired whenever possible.

FIRST DEGREES No courses provided for first degrees.

ADMISSION. Admission to the inst. may be granted, without fee, to teachers of law in univs and univ. colls., both in the U.K. and overseas, and to teachers in other law schs. who are qualified to become members of the Soc. of Public Teachers of Law, to postgrad. students engaged on approved res., and to other univ. students attending

a class or seminar at the inst.; and to other persons by permission of the dir. Persons who already hold a res. degree or have publd the results of their researches, or have had considerable trg. or practical experience in the law, may be admitted to the use of the inst., either on payment of a fee, or without fee, if duly invited and willing to assist in the work of a seminar held at the inst.

Postgrad. students, whether reading for a degree or dipl. or not, must register at a coll. or sch. of the univ. with a fac of laws (i.e. at King's Coll., Univ. Coll., L.S.E. or the Sch. of Oriental and African Studies). When so registered, they will become eligible, on the recommendation of their teachers, for admission to the inst.

GENERAL INFORMATION

The inst. was establd in 1949 to promote advanced study of the Commonwealth. Its field of interest is primarily, but not exclusively, that of the soc. scis. It encourages collaboration at postgrad level between workers who are employing different techniques of res. in the study of Commonwealth problems. It provides a meeting-place both for postgrad students and members of the academic staffs of univs and res. instns in the U.K. and overseas countries of the Commonwealth. Seminars are held for advanced students during the univ. terms. Admission to them is on recommendation by supervisors of studies or at the discretion of the dir. Meetings on sp. topics are arranged during univ. terms for members of staff and other specially invited persons.

LIBRARY Approx. 29,350 vols and papers. The library does not set out to compete with the great collections but selects material of sp. value for res. and postgrad teaching. It places particular emphasis upon primary material relating to govt., econ. and soc. devel., race relns and demography, and with this object it acquires official publications, stats., guides to archives, etc., of the U.K. and other Commonwealth countries. It is also acquiring a good selection of secondary works on the devel. of the Commonwealth during

the past century. It subscribes to periodicals of significance for the study of the Commonwealth.

A strong bibliog. section is being built up by the acquisition of bibliogs., indexes to periodical lit., guides and indexes to official publications and parliamentary papers of the U.K. and Commonwealth countries, and similar aids to res. A bibliog. of bibliogs. in the library and a register of deposited theses in London and other U.K. univs are maintained.

ADMISSION The following persons may be admitted to the inst.: grad. res. workers and members of the academic and admin. staff of the Univ. of London and of other univs and univ. colls. in the U.K. and Commonwealth, other persons approved by the dir. or oftee. of management. Forms of applcn. may be obtained from the asst. secretary.

FIRST DEGREES No courses provided for first degrees.

PUBLICATIONS The inst. publishes an *Annual Report* and a series of *Commonwealth Papers*, and issues a series of *Reprints*; a *Guide to Resources for Commonwealth Studies* and a *Union List of Commonwealth Newspapers* have also been publd.

GENERAL INFORMATION

London Day Training Coll was founded by the L.C.C. in 1902 as an instn in connexion with the univ working under the regns of the bd. of educn for the trg of teachers. The first principal (1902-22) was Prof (later Sir) John Adams. From 1909 to 1932 the coll. was a sch. of the univ in pedagogy, and as such was governed by a coll. council composed equally of reps of the L.C.C. and of the senate. In 1932, as the result of an agreement between the bd of educn, the L.C.C. and the univ, the coll was transferred to the educn and financial control of the univ, and its title was changed to 'Univ. of London Institute of Education'. The inst was administered as a 'central activity' of the univ by a delegacy apptd by the senate, and composed of reps of that body, of the L.C.C. and of the teaching staff, together with certain co-opted members. In 1938 the inst was transferred to the new bldg on the Bloomsbury site provided by a sp grant from the council to the univ.

In accordance with the recommendation of the McNair cttee on the trg of teachers and youth leaders, the Univ. of London Inst of Educn. now comprises the 'central activity', two constituent depts and 34 constituent colls. The inst is the area trg organization for the counties of E. Sussex, Essex (except Mid-Essex and N.E. Essex), Kent, London, Middx, Surrey and the county boroughs of Brighton, Canterbury, Croydon, Eastbourne, E Ham, Hastings, Southend and W. Ham. Its purpose is to advance the knowledge and practice of educn. by res., to encourage the univ. study of educn, and to improve, co-ordinate and extend the provision for the trg. of teachers within the area.

Students are trained under the Regns for the Training of Teachers (H.M.S.O., Kingsway, London, W.C.2) for primary and secondary schs. Grads may devote themselves continuously for a yr. to the theory, etc., of educn and obtain the univ postgrad cert in educn.

Particulars of the courses provided in the constituent depts. and colls may be obtained from the sec. of the inst.

LIBRARY The inst library houses 70,000 vols. and is an important centre of pedagogical res., with special collections on Commonwealth and comparative educn; about 1000 periodicals are taken annually.

FIRST DEGREES No courses provided for first degrees.

HIGHER DEGREES (of Univ of London). *At central inst.* MA and PhD in educn.

GENERAL INFORMATION

The coll. was founded by royal charter in 1907 'to give the highest specialized instructn. and to provide the fullest equipment for the most advanced trg. and res in various branches of sci, especially in its appln. to industry' It is a federation of 3 instns. of earlier origin—the Royal Coll. of Science, the Royal Sch of Mines and the City and Guilds Coll The coll was admitted as a sch of the Univ of London in 1908

The three constituent colls have kept their identity, and, closely linked within the Imperial Coll framework, they divide the work of the Imperial Coll. between them The Royal Coll of Science conducts the work in pure scis. chem, phys., maths, bot, zool, geol. and meteorol; the Royal Sch of Mines concentrates on mining, mineral technol., metall, mining geol, oil technol and appl geophys, the City and Guilds Coll. is concerned with the main branches of engin: aeronaut, chem, civil, electr and mech

The coll was selected in 1953 to be the spearhead of the national attack on the problem of providing more univ.-trained scientists and engineers The coll agreed to double its size, to provide for 3000 students and to carry out this operation in 10 yrs By the beginning of the session 1960-61 student numbers had risen to a total of 2683 and over 44 new posts as prof or reader in the Univ of London had been establd and filled at the coll

The main academic devel is taking place on the 16-acre site bounded by Queen's Gate, Prince Consort Rd, Exhibition Rd and Imperial Insti-

tute Rd. The expansion plan involves major new bldgs and many alterations and adaptations in those existing The first new bldg, to house the depts of aeronautics and chem engin, was opened in 1957, while 2 further projects, a new bldg for phys. and the first section of a large new mech. engin block, were completed and occupied during the session 1959-60. New bldgs for the depts of civil engin. and electr. engin. as well as the second stage of the new mech. engin. block are in the course of constrcn, and are scheduled for completion in the session 1961-62 A large scheme for new halls of residence was made possible by the acquisition in 1956 of the neighbouring Prince's Gdns The first new hall, provided through the generosity of Messrs. Vickers Ltd, was opened in Sept 1959, and, on the south side of Prince's Gdns, work is now in progress on 4 more halls and gen. refectory facilities which are due for completion in 1962

ADMINISTRATION. The admin of the Imperial Coll is vested in a governing body of 52 members representing the crown, the self-governing countries of the Commonwealth, the Minister of Educn, the Univ of London, the London County Council, the City and Guilds of London Inst., the Royal Commissioners for the Exhibition of 1851, the Royal Society, the teaching staff of the Imperial Coll, and professional socs The rector of the Imperial Coll and the deans of the 3 constituent colls are members *ex officio*

INCOME (1959-60) Total income. £2,366,801

(govt grants, 75 per cent; self-balancing res contracts, 14 per cent; fees, 6 per cent; other sources, 5 per cent)

LIBRARIES Each dept has its own library for reference and loan. Central library services are provided in the Lyon Playfair library (93,000 vols). The Haldane library (7500 vols) is the non-sci library. In addn the library of the Science Museum is available for the use of students

Large FIELD STATION at Silwood park nr. Ascot, MINE at Tywarthale nr. Truro

ADMISSION See p 953 and Appendix III. The conditions of admission are in accordance with univ requirements and the procedure is in general accordance with the recent recommendations of the Cttee of Vice-Chancellors and Principals; details in coll prospectus

The min age for admission is 17. Women are admitted on the same terms as men.

FIRST DEGREES (of Univ of London) AND **DIPLOMAS** The same courses and exams serve for the coll associateship and for the BSc (spec.) or BSc(Eng) degree of the Univ of London Courses for degrees with hons (each 3 yrs) are as follows: BSc (spec) and ARCS in bot., chem., geol., maths, phys., zool.; BSc (spec) and ARSM in mining geol., oil technol., BSc(Eng) and ARSM in metall., mining, mineral technol., BSc(Eng) and ACGI in aeronaut. engin., chem engin., civil engin., elect. engin., mech engin.

HIGHER DEGREES (of Univ of London) AND **DIPLOMAS** Courses of 1st and advanced study open to grads of other univs and leading to the PhD in a min of 2 calendar yrs from BSc, to the MSc and also to the DIC, are given in the following depts and sub-depts. of the coll: aeronautics (aerodynamics, aeronaut structures & aircraft propulsion), bot & plant technol (analyt cytol., bacteriol., biochem., ecol., microbiol., plant pathol., plant physiol., taxonomy); chem engin & chem technol. (chem engin., chem engin sci., combustion, fuel, high pressure, low temperature, ceramic & nuclear technol., chem phys.), chem (phys., org., inorg., analyt.), civil engin (concrete technol., engin. hydrol., highways, hydraulic engin & fluid mechanics, hydro power, pub. health, soil mechanics, struct. engin.), elect. engin (appl. electron phys., automatic control systems, communics & electronics, elect. machines & power systems, elect. traction), geol (appl. geophys., engin. geol., geochem., micropaleontol. & palaeo-ecol., mining geol., mineral exploration, oil technol., petroleum reservoir engin.), maths (mathl phys., pure maths., appl. maths., stats., numerical analysis), mech engin (appl. mechanics, thermal power & process engin., nuclear power, production engin., operational res & management studies), metall (extraction metall., phys. metall.), meteorol. & mining & mineral technol. (mining, mineral technol.); phys (high energy phys., theoret. phys., cosmic ray phys., electron phys., technical

optics, instrument technol., cloud phys., high temperature phys., spectroscopy, acoustics, ionk magnetism); zool & appl entomol (entomol., appl. entomol., parasitol., nematol.)

Postgrad courses open to grads of other univs and leading to the DIC normally in 1 yr from BSc and in some cases to the MSc are given in: aeronautics, bot & plant technol (microbiol., plant pathol.), chem engin & chem technol (chem engin., chem technol., indust. safety, nuclear technol (chem)), chem (analytical chem.), civil engin (struct. engin., concrete structures & technol., hydro-power engin., engin. hydrol., highway engin., pub. health engin., soil mechanics), elect. engin. (elect. machines & power systems, communics & electronics, automatic control systems & allied subjects, appl. electron phys., elect. traction), geol (engin. geol., micropaleontol. & palaeo-ecol., mineral exploration, appl. geophys., petroleum reservoir engin.); maths (mathl phys., pure maths., appl. maths., numerical analysis, stats.), mech. engin (appl. mechanics, thermal power & process engin., nuclear power, prodn engin., operational res & management studies), meteorol., mining, phys (tech. optics, photo-electronics), zool & appl. entomol (appl. entomol., nematol.)

In collaboration with L S E the coll arranges postgrad studies in technol., econ and admin. The courses in pub. health engin. are run in conjunction with the London School of Hygiene

ASSOCIATIONS WITH OTHER INSTNS An arrangement has been made for the exchange of staff and students with the Swiss Federal Inst. of Technol., Zurich, and for exchange studentships with the Techn. Hochschule Aachen, and with a German univ. The Massachusetts Inst. of Technol. also stands in special relationship to the coll.

FEES. Registration (undergrad), £2, entrance (postgrad), £2, tuition, undergrad and postgrad res. and courses (incl. union membership) sci. and engin., £64 p.a. (postgrad course in nuclear power, £124 p.a.).

Note: tuition fees will be increased to £75 p.a. from Oct. 1962 (subject to review)

ACADEMIC YEAR Oct to June 3 terms of 10 wks each.

SCHOLARSHIPS Royal scholps., entrance scholps. and exhibitions for undergrad courses awarded on an exam held at schs., sp. scholps. available in mining

POSTGRADUATE AWARDS open to grads of other univs. see p 808

APPOINTMENTS BOARD The coll appts bd assists associates and members of the coll to find employment on the completion of their coll courses

GRADUATES' ASSOCIATIONS Each constituent coll has its own old students' assocn., namely, the Royal Coll of Science Assocn., the Royal Sch. of Mines Assocn. and the Old Centralians Assocn.

The latter perpetuates the original name of the City and Guilds Coll. and has branches in many parts of the world

STUDENT RESIDENCES Best Hall, Prince Consort Rd., London, S W 7 (96 men, 17 women), fees £50-£60 p.a., Weeks Hall, Prince's Gdns, S W 7 (66 m.), fees £66 p.a., Garden Hall, 12 Prince's Gdns, S W 7 (26 m.), fees £50-£53 p.a., Sellkirk Hall, 50 Holland Pk., W 11 (15 m.), fees £73-£79 p.a. Catering available for residents in coll refectories at cost of about 10s a day and meals are provided at Sellkirk Hall for students living there. Opening in 1962-63 will be 4 new halls of residence in Prince's Gdns (South Side) accommodating 388 men. All enquiries to clerk for halls of residence, Imperial Coll., Prince Consort Rd., S W 7 (tel. Kensington 5111)

STUDENT HEALTH SERVICE The coll health room at 13 Prince's Gdns. has 2 full-time nurses and a doctor attends during certain hours each day. Overseas students are required to undergo a med. exam on entry to the coll.

STUDENTS' UNION The Imperial Coll. union bldg in Prince Consort Rd. is the home of various students' orgns incl the Imperial Coll. union, the Royal Coll of Science union, the Royal Sch of Mines union and the City and

Guilds Coll. union. Accommodates refectories, reading rooms, canteen rooms, a concert hall and a gymnasium. The coll bookstall is in the Best bldg, adjoining the union.

The Imperial Coll. union, guided by the union council, whose members are mainly present students, looks after the leisure side of the student's life and controls and encourages the clubs and socs, about 100 in all, which among them cover all sides of athletic and soc activities.

GENERAL INFORMATION

Founded by royal charter in 1289 for 'instruction in the various branches of literature and sci. and the doctrines and duties of Christianity', King's Coll. consisted at first of a sch and depts. of general lit., sci and med, to which were added successively engin, theol and oriental depts. The hosp was built in 1839; the evg. classes were started in 1856, and a women's dept in 1881. In 1910 the coll sch. became a separate corporation, the hosp and advanced med. sch were made indep., the other depts (except the theol.) doing work of univ standard were incorporated in the Univ of London with the name of Univ of London King's Coll, while the council remained the governing body of the theol dept, which became a sch of the univ. The coll as a whole retained the name of King's Coll, London. In 1915 the arts and sci depts of King's Coll for Women, previously housed in Kensington, were transferred to the Strand bldg of King's Coll, and the household & soc. sci dept to new bldgs on Campden Hill. The dept. of household & soc sci became a separate instn in 1928 under the title of King's Coll of Household and Soc Sci, now Queen Elizabeth Coll. In 1917 the oriental dept was transferred to the new Sch of Oriental Studies. The Sch. of Slavonic and East European Studies, founded in 1915, was constituted a separate dept. of the univ in 1932.

CONSTITUTION Univ. of London King's Coll, consisting of the five facs named below, is incorporated in the Univ of London, and is governed by a delegacy of the senate. It is also, with King's Coll Theol. Dept (see p 1037), an integral part of King's Coll, London. The principal of King's Coll, London is apptd by the crown, the dean of King's Coll. Theol. Dept, elected by the council, is equally dean of the whole coll. The soc, librarian and registrar also serve the whole coll

and are apptd by the governing bodies jointly. The fac of arts includes profs. of div and eccles hist.

GENERAL INFORMATION

Queen Mary Coll derives from the New Philosophical Institute founded in the earlier part of the 19th cent. by J T Barber Beaumont to provide educn for people of the East End. He died in 1841, providing in his will a trust fund for continuation of the inst. The trustees later became associated with the Drapers' Co., with whose assistance the People's Palace Technical Schs were opened in 1887, superseding the New Philosophical Inst and later known as East London Technical Coll. With addn of arts courses, the name was changed to East London Coll. In 1907 univ recognition was granted for instructn for bachelor's and higher degrees in arts, sci and engin and in 1915 the coll was admitted as a sch. of the univ. A royal charter was granted in 1934 when the coll's name was altered to Queen Mary Coll in acknowledgment of the honour accorded by Queen Mary in presenting the charter. Queen Mary became the first patron and hon. fellow of the coll.

GENERAL INFORMATION

The Veterinary Coll. of London was formed in 1791 under the presidency of the Duke of Northumberland, beginning with 14 students upon the site at Camden Town that it occupies to-day. The coll. received its first charter of incorporation from Queen Victoria in 1875 and is now governed under a charter granted in 1936 by H.M Queen Elizabeth. With the help of govt grants and other donations the coll was entirely rebuilt, and the new bldg was officially opened in 1937. The coll., which since 1906 has had recog teachers of the Univ of London, was admitted as a sch. of the univ in the fac of med. with effect from Oct 1949.

GENERAL INFORMATION

As a result of the recommendations of the Reay Cttee. in 1908, the sch. was establd. by royal charter in 1916 as the 'School of Oriental Studies, London Institution', in Finsbury Circus, it was granted the status of a sch. of the univ. and was later allocated space for a permanent (not yet fully completed) bldg on the Bloomsbury site of the univ. In 1938, among other amendments to the

charter, the title of the sch. was changed to 'School of Oriental and African Studies'. During the second world war a large number of intensive courses were given for service personnel, esp. in Chinese, Japanese, Burmese, Arabic, Turkish, Persian and Urdu, and much translation work was done for the various ministries as well as censorship duties. Largely as a result of the sch.'s

initiative an inter-dept commission was set up under the Earl of Scarborough's chairmanship to report on the provision for teaching and res at univ level in Oriental, Slavonic, E European and African studies. The commission recommended * a substantial expansion of existing facilities, and from 1947 large grants for Oriental and African studies have been made by the U G C. In accordance with the commission's recommendation that the whole field of Oriental and African studies should be developed in London, as against a more restricted devel in other univs, the sch. devoted its energies in the first post-war quinquennium to building up strong, coherent academic depts, in which a proper balance is sought as between linguistic and cultural studies and the classical and mod aspects of those studies. During the quinquennium 1952-57 expansion continued steadily, though at a slower rate, and the staff was strengthened by numerous new appts

GENERAL INFORMATION

The sch., founded by the Pharmaceutical Soc. of Gt. Britain in 1841, was admitted as a sch. of the univ. in 1925. Control of the sch. was transferred from the Pharmaceutical Soc. to a company limited by guarantee in 1949. A royal charter of incorporation was granted to the sch. in 1952. The council of the sch., as now constituted, includes reps. of the Univ. of London, the Pharmaceutical Soc. and the academic bd., as well as certain co-opted members. There is an academic bd. which acts in an advisory capacity.

The sch. is now housed in a new bldg. in Brunswick Sq. which was officially opened by H. M. The Queen Mother in April 1960.

LIBRARY is in course of formation and is available to all students.

ADMISSION The sch. is open to men and women students. For admission requirements see p. 953 and Appendix III. Foreign students are

admitted on the same terms as British, but are expected to produce identification papers.

FIRST DEGREE (of Univ. of London) All undergrad entrants to the sch. work for the BPharm hons degree (3 yrs.).

HIGHER DEGREES (of Univ. of London). MPharm and PhD in pharmaceutical chem., pharmaceutics, pharmacol., pharmacognosy, pharmaceutical engin. sci. All depts of the sch. are available for postgrad. and res. work, and the respective profs. and hds. of depts. are always prepared to advise students wishing to undertake res.

FEES Composition fee (incl. union membership), £64 p. a.

GENERAL INFORMATION

University Coll, London, was founded in the
year 1826 and opened on Oct. 1, 1828, under the
title of the University of London. It was incor-

porated as University Coll., London, by royal
charter dated Nov. 28, 1836. This charter was
annulled by act of parliament, passed June 24,

U.K.—ENGLAND (LONDON)

1869, whereby the coll was reincorporated with addnl. powers and divested of its proprietary character. On Jan. 1, 1907, in accordance with the provisions of the University Coll London (Transfer) Act, 1905, passed July 11, 1905, the coll was incorporated in the Univ of London. The facs of arts and laws, and med., were establd in 1832, the fac of sci. in 1870 and the fac. of engin. in 1908, the Slade Sch of Fine Art in 1871, the Bartlett Sch. of Archit in 1913, and the Sch of Librarianship in 1919. Full admission of women to the coll. was permitted in 1878.

GENERAL INFORMATION

King's Coll Hospital Med Sch. was founded in 1831 and was admitted as a sch. of the univ. in the fac. of med. in 1909. The med sch. provides the clin. trg. for students reading for the degrees of London, Oxford and Cambridge univs. Under the conditions of the incorporation of King's Coll. in the univ., the univ. continues to teach in the King's Coll. bldgs. the prelim. and inter. med. studies leading to the MB BS and BDS degrees of the Univ. of London.

The new bldgs. of the med sch. were opened in 1933, and the new dent sch. in 1940. A further extension to the med sch. was completed in 1958. The present bldgs. incl. a library (7000 vols.) and reading-room and a pathol. museum. The students' hostel is within 5 minutes' walk of the hosp. and med. sch., and the athletic ground is within 10 minutes' walk. There is a 2nd athletic ground near by.

GENERAL INFORMATION

The sch. was built as a complete med. sch. for the teaching of anat. and physiol., chem., phys. and biol. in 1835, but teaching in the wards had begun in the earliest days of the hosp.'s existence, nearly 100 yrs. before.

The first section of the new pre-med. and pre-clin. sch. was occupied in Jan. 1960. It comprises large teaching labs. and lecture theatres.

The second section will contain professional rooms, res. labs., dining hall, admin. rooms, etc., and the final phase will be the residential coll. for 175 students which will also contain student amenities.

The theoretical and practical teaching of all the subjects of the med. curriculum, incl. chem., phys. and biol. for the 1st MB exam, is carried out within the sch., which contains the Bland-Sutton Inst. of Pathol., with museum and labs.; Barnato-Joel res. labs. (phys.); S. A. Courtauld Inst. of Biochem.; Ferens Inst. of Otol.; Meyerstein Inst. of Radiotherapy; clin. res. inst.; professional med. unit and surg. unit.

LIBRARY. The Boldero library (5015 vols.) is open to all students of the sch. and contains the latest med. text-books and the leading med. journals.

ADMISSION. See p. 953 and Appendix III.

ALLIANCE. An exchange scheme exists at consultant and professional level with the med. fac. of the Univ. of Toronto.

STUDY LEAVE. Applicants for study leave are considered individually by the sch. council.

FEEs. Entrance, £15.15s.; annual tuition fee, £60 p.a.; clubs' sub. (compulsory), £7:7s. p.a.

SCHOLARSHIPS AND PRIZES. Numerous scholships and prizes are awarded annually to a total value of over £1000. These incl. 2 entrance scholships to the value of £100 each, 2 scholships value £100 each for Univ. of London students of the med. sch. who have completed studies in anat. and physiol., and 2 open to students of the univs of Oxford and Camb. who have completed the curriculum for, or passed, the exams in anat. and physiol.

POSTGRADUATE AWARDS open to grads. of other univs. see p. 808.

RESIDENCE. There is limited accomm. for resident students. Surgical dressers live in during their 'emergency week', as do the extern clerks during their course in midwifery.

PUBLICATIONS. *Med. School Prospectus* (annually in mid-Sept.); *The Story of the Middlesex Hosp. Med. School 1835-1935*, by Dr H. C. Thomson (written for sch.'s centenary); *Middlesex Hosp. Journal* (produced by students bi-monthly).

THE YEAR 1960

PRINCIPAL BENEFACTIONS. Lord Astor of Hever, £200,000 for rebuilding fund; Wellcome Foundation, £83,000 for pharm. res. labs.; Nuffield Foundation, £45,000 for Res. Unit in dept. of biol. as applied to med.

DEATHS. Dr R. E. Apperly (hon. cons. anesth.); Sir Harold Boldero (hon. cons. phys.); Sir Gordon Gordon-Taylor (hon. cons. surg.); Sir Harold Graham Hodgson (hon. cons. radiol.); Dr A. E. W. Idris (hon. cons. anesth.).

GENERAL INFORMATION

St. George's Hosp. was opened in 1734 and the physicians and surgeons were permitted to have a limited number of pupils from its inception. The

sch has been unchanged since 1868 until the present rebuilding scheme was begun. Since 1906 the teaching in the sch has been devoted entirely

to the clin. subj's, although recently univ units in med and surg have been set up and a prof has been apptd to a chair of med. By arrangement, students entering for the full course do the pre-clin work at King's Coll, London, but clin students are also accepted from the univs of Cambridge and Oxford. The numbers entering are deliberately kept small, and, in spite of recent increases, it has been possible to maintain the old tradition of individual teaching.

LIBRARY, MUSEUM, ETC. The sch library (5848 vols) contains text-books and journals dealing with all branches of clin study. The pathol. dept. contains labs of morbid anat., bacteriol., hæmatol. and chem pathol.

ADMISSION See p. 953 and Appendix III

RESEARCH Qualified students wishing to undertake res are encouraged to do so. Small annual grants from endowments are available for the purpose.

FEES Annual composition fee (incl. union membership), £67.7s

SCHOLARSHIPS Six entrance schols of the total value of £800 are offered for competition annually. The subjects of exam are either anat and physiol. or pathol. Prizes of the total value of £260 are also offered for competition each year.

GENERAL INFORMATION

The history of University Coll. Hosp Med Sch is closely bound up with the history of University Coll. From the time of the opening of the coll in Oct 1828, until its incorporation in the Univ of London in 1907, the fac of med was governed by the corporation and council of Univ Coll. Following the National Health Service Act, 1946, the sch became a body corporate.

The present med sch bldgs were erected in 1907 as the result of funds subscribed by Sir Donald Currie, and the sch was admitted as a sch of the univ. in the fac of med. on Jan. 1, 1907.

The prelim and inter med. studies are held at Univ Coll.

LIBRARY AND MUSEUM. The general library contains about 30,000 books, incl. text-books, books of reference and sets of med. periodicals. The Graham library is a separate collection of books and periodicals, and contains complete sets of British, American, French and German journals of interest to the workers in many branches of med. The Radcliffe Crocker library, which consists of a collection of dermatol vols, is housed in the Royal Soc. of Medicine library, 1 Wimpole St, London, W 1. The museum of pathol. anat (curator W. R. Merrington) contains a collection

of med., surg., obstet and gynaeol. specimens. Microscopic sections of most of the specimens are available for the use of students.

ADMISSION See p 953 and Appendix III

FEES. For the complete clin course (Univ. of London), £225 annual composition fee (incl union membership), £75

SCHOLARSHIPS. One Goldsmid entrance scholp entitling the holder to the final course of med. study, 1 Goldsmid entrance exhibition entitling the holder to a reduction by £126 of the fees due for the full course of final med. study; one Pillitter entrance scholp. in pathol., entitling the holder to a reduction of £123 of the fees for the full course of final med study. In addn., scholps and prizes are available to the approx. annual value of £3000

GENERAL INFORMATION

The federation was establd by the senate in
1945 for the further devel. of postgrad med.
educn. in London. It was incorporated by royal
charter in March 1947, and admitted as a sch.
of the univ. in Dec 1947. The purpose of the
federation is to provide organized and correlated
facilities for postgrad teaching and res. for
qualified med. and dent. practitioners from the
U.K. and other countries in and outside the
Commonwealth, and to co-operate with univs.,
med schs, the royal colls and other bodies in
their provisions for postgrad med educn. The
federation provides (i) trg for prospective
specialists, supplementing the work of the under-
grad. med and dent schs; (ii) advanced revision
for practising specialists; (iii) instructn for med.
and dent. practitioners who, though not specialists,

desire more detailed knowledge of any branch of
med. or dent., (iv) continuing educn. of general
practitioners

The federation comprises at present : *federated
institutes*—Postgrad Med. Sch. of Lond., Inst
of Basic Med Scis; Inst of Cancer Res. Royal
Cancer Hosp., Inst of Cardiol., Inst. of Child
Health, Inst of Dent Surg, Inst of Dermatol;
Inst. of Dis of the Chest, Inst of Laryngol. &
Otol; Inst of Neurol (Queen Square); Inst.
of Obstet & Gynaecol., Inst. of Ophthalmol;
Inst of Orthopaed, Inst of Psychiatry, Inst
of Urol.

Postgraduate educn at the insts. and the hosp.
associated with them includes full-time and pt-
time courses of advanced instructn., clin clerk-
ships, jr. and sr. resident hosp. appts. and oppor-

tunities for res. Provision is made for candidates for the MD, MS, MDS and PhD degrees, and courses are held for the academic postgrad dipl in clin. pathol and psychol med of the univ. In addn most insts hold conferences and symposia for consultants

The federation organizes short courses for gen med and dent practitioners and med officers of local authorities at hosps in the 4 London metropolitan regions and the Wessex region, these incl a number of courses consisting of half-day sessions, at undergrad and postgrad. teaching hosps. The admin of the federation is carried out by the central office, which maintains a bureau of information on postgrad. med educn. in the U.K., and arranges annually a series of lectures on 'the scientific basis of med.'. Three lectures on 'the scientific basis of dent.' will again be held in 1962. These are designed for res. workers and specialists in trg, and are given by well-known experts from centres throughout the country.

The federation awards a limited number of travelling fellowships annually to medically or dentally qualified men and women who are holding appts at undergrad or postgrad. teaching hosps

or med schs of the Univ of London *See also* p 808

Following the institution of the national health service in July 1948, the federation appointed to the staff of the central office a regional adviser for postgrad med educn in each of the 4 metropolitan regions to carry out the policy of the univ and the federation in arranging postgrad educn for the practitioners, both specialist and gen, in the region. The S.W. metropolitan region was divided into 2 in 1959, the more distant part being separated from the S.W. region and named the Wessex region. In Oct 1956 a regional adviser in postgrad dent educn was apptd. The regional advisers are members of the admin. staff of the central office (*see above*)

PUBLICATIONS *Annual Report and Handbook*, information leaflet concerning federation; table of postgrad med. courses held at univs in the U.K., programmes of courses for gen med and dent practitioners organized by federation, programmes of symposia for consultants held at insts of the federation, vol of lectures arranged by the federation, entitled *The Scientific Basis of Medicine—Annual Reviews* (Athlone Press).

THE YEAR 1960

RETIREMENTS. Prof. Sir Francis Fraser (dir, 1945-60)

STUDENT NUMBERS are shown below for each inst. The majority of postgrads of the fed. (there are no undergrad. students) stay only 1 or 2 terms of the session at an inst. and very few remain over from one yr. to another, as they are encouraged to take hosp. appts as part of their clin trg. The numbers of full-time students given below for each inst. are those who attended full-time for 1 term

or more of the yr. Pt-time includes those who attended for less than 1 term, whether full-time or pt-time, and those who attended pt-time for any period of the yr incl occasl. lectures, etc. Most of the pt-time students spend the rest of their time at other hosps in London or in reading for exams. Students from other countries, 2607. GENERAL INFORMATION

Owens Coll, named after a Manchester merchant who bequeathed £96,000 for its foundation, was opened in 1851. The Manchester Sch. of Med was united with it in 1872. The charter of 1880 by which the Victoria Univ was founded established a federal constitution and made Owens a constituent coll of the univ. Subsequently Univ Coll, Liverpool, and Yorkshire Coll, Leeds, were admitted as constituent colls. A new charter was issued on July 15, 1903, reconstituting the univ. under the name of the Victoria Univ of Manchester and freeing it from liability to admit or remain in assocn with any coll other than Owens, and on June 24, 1904, the act for the incorporation of Owens Coll with the univ was passed. In 1905, on the establishment of the fac of technol, the work of univ standard at the Municipal Sch (later Coll) of Technol was included in the univ. Under a charter granted in 1955 the Coll of Technol was establd in 1956 as the Manchester Coll of Sci & Technol.

CONSTITUTION The governing body of the univ is the court of governors, whose exec cttee. is the council; the senate, which consists of all the profs of the univ, regulates academic matters. Facs are controlled by their own bds within the authority granted by the charter. The chancellor presides over the court, the council elects its own chairman, and the vice-chancellor presides over the senate.

Under the charter of 1955 the Coll of Sci and Technol operates under a court and council. Academic matters other than those appropriate to the bd of the fac of technol are regulated by an academic bd.

INCOME (year ended July 31, 1960) excl Coll of Sci and Technol. Total income, £3,726,507 (Treasury grants, 73.5 per cent, other govt depts, 2.3 per cent, fees, 10.4 per cent, endowments, 3.7 per cent; local authorities, 1.3 per cent., other items, 8.8 per cent.)

Income of the Coll of Sci. and Technol. Total income, £1,423,729 (Treasury grants, 61.7 per cent, fees, 7.8 per cent; local authorities, 17.7 per cent., other items, 12.8 per cent.).

UNIVERSITY PRECINCT Most of the bldgs erected from time to time during the past 50 yrs are situated about a mile from the centre of the city. The bldg for clin scis is $\frac{1}{2}$ mile distant, adjoining principal hosp. The main athletic grounds are at Fallowfield (30 acres), about 1 $\frac{1}{2}$ miles distant, and at Wythenshawe (68 acres), about 3 miles distant. Darbushire House (health centre) is $\frac{3}{4}$ mile distant.

LIBRARIES. In all, about 700,000 vols., in addition, there are over 130,000 publicns. in microprint or microfilm. The main library (over 540,000 vols.) is housed in 2 divs. books concerning the arts and allied facs. in the new bldg., books on scientific subjs. in the old (Christie) bldg., which also contains the libr. of the Manchester Museum. Med libr. (over 107,000 vols.) is housed in the med. sch. Libr for deaf educn. (8660 vols.) is available to all interested in educn of the deaf. The John Rylands libr. in Manchester includes the famous Althorp libr. and the Crawford MSS. It contains one of the most important collections of early printed books and Bibles in existence, many first editions of English and foreign classics, rare bindings, and an extensive collection of charters, manorial and legal records and family muniments relating to almost every county in England. The ancient Chetham libr. (65,000 vols.) has valuable mediev. MSS. and printed books of 17th and 18th cents.; it specializes in local hist. and topography. The municipal reference libr. (500,000 vols.) includes a technical and sci. libr. of 90,000 vols. One of the most important sp. reference collections deals with British parliamentary papers from 1833, with a considerable no. of earlier date. The Coll. of
